B.S. BIOMEDICAL ENGINEERING

Each year of this plan includes milestones that support the four pillars of career development — self-discovery, exploration, experience, and action. These milestones are here to guide you, not limit you — your journey may move at a different pace, and that's completely okay.

YEAR 1 | BUILD FOUNDATIONS

- ❍ Visit Garnet Gate & the August Student Org Fair to explore and join clubs or orgs for your major
- ❍ Check your major map & verify all first year academic grade requirements and understand the biomedical engineering curriculum
- ❍ Examine success/support options, including the Office of Student Advocacy
- ❍ Explore biomedical engineer employers online
- ❍ Review your personal brand, specific interests & next steps with a MCEC CC
- ❍ Attend the Part-Time Job Fair & STEM Career & Internship Fair in the fall/spring
- ❍ Identify your career goals and take career & personality assessments to understand your skills, interests, values and strengths
- ❍ Explore biomedical engineering major learning outcomes and full course descriptions to understand your goals for this major & the future
- ❍ Explore your options to see where biomedical engineering alumni are working & what skills they have developed
- ❍ Get involved to build on the eight Career Competencies employers look for
- ❍ Meet with MCEC CC to develop a customized career plan and resume

YEAR 2 | EXPLORE POSSIBILITIES

- ❍ Consider new experiences, part-time on-campus jobs, undergraduate research, pathways for mechanical engineers within research, and leadership roles to gain experience
- ❍ Review biomedical engineering overview
- ❍ Join Mentorship Hub and LinkedIn to connect with USC Alumni
- ❍ Visit the MCEC Career Center in Swearingen and have your resume reviewed
- ❍ Explore the Career Center Toolkit for additional career readiness resources
- ❍ Explore the MCEC Student Experience
- ❍ Investigate Graduation with Leadership Distinction for senior year
- ❍ Review biomedical engineering research, and read MCEC news and events to stay current
- ❍ Consider pursuing an Interdisciplinary Certificate
- ❍ Look into the different research path options, as research is a core experiential education path for biomedical engineers
- ❍ Start looking for a summer internship or co-op in the fall, or consider a Research Experience for Undergraduates
- ❍ Explore companies that typically hire USC interns and local biomedical engineering companies

YEAR 3 | FIND FOCUS

- ❍ Assess previous involvement & participate in leadership roles
- ❍ Join a new major-related club or organization to network and enhance skills
- ❍ Secure a summer internship/co-op, micro-internship, job shadowing or faculty research experience to build on skills and enhance professionalism
- ❍ Explore trainings to enhance skills and knowledge for employability
- ❍ Attend panels, workshops, on-site visits (MCEC tabling), job shadowing on-site and informational interviews to gain confidence & grow connections
- ❍ Reflect on your experiences and skills to see what areas need more development and update your resume
- ❍ Review past career assessments to see what your top work values and skill sets are during year 3
- ❍ Maintain relationships with MCEC biomedical engineering faculty and past employers for networking and assistance
- ❍ Start thinking about after graduation plans & desired career path and work with a MCEC CC to make a game plan
- ❍ Use online resources and the Career Center to connect with alumni and employers

YEAR 4 | PREPARE FOR LAUNCH

- ❍ Reach out to professors, supervisors, and key connections to write recommendation letters or to serve as references
- ❍ Join professional groups and set job alerts for your search
- ❍ Utilize any relevant resources to network and reach out to contacts
- ❍ Research online to know more about the companies and positions you are interested in and explore career paths, job titles and salaries
- ❍ Investigate graduate school vs. full-time job and confirm your path for applications
- ❍ Verify graduation requirements and complete GLD
- ❍ Review & update your professional documents and online profiles
- ❍ Review your top skills & experiences from the last four years that are most relevant to a professional career
- ❍ Participate in the Senior Design Course to gain project experience & enhance to resume
- ❍ Meet with a MCEC CC or PPA to create a plan for your job search or grad school applications
- ❍ Engage in interview preparation & practice — create a document with your most relevant experiences and apply the STAR method
- ❍ Complete the graduation survey to share your post-grad plans
