Common questions regarding the Center for Applied Innovation partnership with IBM

IBM and the university have partnered to create a new Center for Applied Innovation on the Columbia campus. Experts from both entities will work together to create systems to better serve the university and other higher education institutions nationwide. A list of common questions that outlines what will happen in the next few months is [available online](#).

Have old documents destroyed permanently

[SecureCarolina](#) has partnered with Shred360 to hold a UofSC Shred Day. The event will be held from 10 a.m. to 2 p.m. on Thursday, February 12 in the parking lot across from the Colonial Life Arena. The event is open to all students, alumni, faculty, staff, and community members and is free-of-charge. Shredding services are limited to two boxes of material per person. For additional information, [click here](#).

Article by @UofSC professor was sixth most popular on EDUCAUSE website in 2014

The article, “Understanding the Learning Personalities of Successful Online Students,” coauthored by Professor of Integrated Information Technology Tina Crews, was the sixth most popular article on the *EDUCAUSE Review*® in 2014. The *EDUCAUSE Review*® is an open-access publication for the higher education IT community. It takes a broad look at current developments and trends in information technology, how they may affect the college/university as an institution, and what these mean for higher education and society. Crews serves as the Director of Online Learning for the College of Hospitality, Retail, and Sport Management (CoHRSM) and previously served as the Associate Director of Technology Pedagogy for the Center for Teaching Excellence at the university. Jeanne Skul named Director of Network Services at University of Wisconsin-Madison

Jeanne Skul, vice chancellor for information technology and services at the University of South Carolina Upstate has been named Director of Network Services at the University of Wisconsin-Madison. She will begin her new role on March 30, 2015. The Director of Network Services is responsible for the operation and delivery of technology services to the campus and ensures a solid network and telecommunications infrastructure is always in. For more information, [click here](#).

Mainframe to shut down after full launch of OneCarolina

The university is committed to developing and maintaining a dynamic, state of the art technology infrastructure that supports and enhances academic and business functions of the university. To this end, the university has invested in new technology to replace older, outdated systems.

As part of the final implementation of OneCarolina, UTS will retire older legacy hardware and software systems as soon as possible based upon business requirements. Data stored within IMS, CMS, TSO and elsewhere on the UTS legacy mainframe system will be impacted by this retirement. University Technology Services (UTS) will work with departments and owners of data on the legacy mainframe to provide information,

recommendations and plan solutions for transitioning off the legacy systems. Data access management will be a primary focus of the project team as they work to identify data owners and access ids. All unclaimed access IDs will be disabled at the point of final legacy system retirement.

If you have access to data and/or systems on the legacy mainframe and have not used your access privileges in the last year, please contact the UTS Service Desk at 777-1800 or servicedesk@sc.edu.

ACRL Scholarly Communications Road Show

Thomas Cooper Library will host “Scholarly Communication: From Understanding to Engagement” on Friday, March 13. Sponsored by the Association of College & Research Libraries (ACRL), the workshop is designed to enable participants to engage in new methods of scholarly communication outreach. It will focus on access, emerging opportunities, intellectual property, and engagement. The registration deadline is February 11. For more information, or to register, [click here](#)

This communication is distributed by the Division of Information Technology. Please contact Michelle Foster at mfoster@mailbox.sc.edu with any comments or suggestions.
