

# GRADUATE MEDICAL EDUCATION COMMITTEE

The Graduate Medical Education Committee oversees all ACGME-accredited and non-accredited post-graduate residency programs. The GMEC is operational.

GMEC membership consists of appointed members including all program directors, the Housestaff Liaison Committee President, and the DIO. The GMEC ensures that each graduate medical education program provides effective educational experiences for residents and fellows that lead to measurable achievement of educational outcomes using the ACGME competencies. The GMEC oversees all GME activity, including communication between programs and the residency review committees. The Committee also reviews reports from site visits and subsequent progress reports in order to ensure that problems are addressed and additional resources made available to respond to deficiencies.

Meets the 4th Thursday of every month.

## ARCHIVE

[2013-2014 Committee Members](#)
