Narrative

The University of South Carolina Columbia and the regional Palmetto College campuses assign the primary responsibility for program coordination, curriculum development and curriculum review within each college or school to the department chair or program director. The selection of department chairs is governed by [ACAF 1.24 Selection of Department Chairs and School Directors](#). According the *Faculty Manuals (Columbia | Palmetto Colleges)*:

Department chairs are appointed by and serve at the pleasure of the dean of a school or college. The dean notifies the provost of the appointment of department chairs. The chair has a responsibility to departmental faculty in matters relating to teaching and research and is responsible also to the dean of the college and other officers of the university for implementing university policies as they apply to the affairs of the department. The department chair is responsible for the general conduct of departmental affairs and reports to the dean of the college or school. The chair is responsible for appointments and non-reappointments, promotions and tenure, except as delegated to the faculty in the Faculty Manual, resource allocation, and all other matters relative to the successful implementation of the department's educational and scholarly objectives in accordance with university policies. The chair will consult with and seek the advice of appropriate committees of the faculty with respect to educational policy and departmental governance.

Given the wide scope of many departments and programs within each College and School, some department chairs or program directors often delegate curricular oversight duties to experienced faculty, sometimes called academic program coordinators. As a result, the term "academic program coordinator" may include several positions and titles used in the university such as undergraduate director, program coordinator, director, and graduate director. Regardless of the internal title, the University has a practice of identifying individuals in each College and School for every degree program that carry out the duties of an academic program coordinator. The duties of the academic program coordinator role are outlined in [ACAF 1.25 Academic Program Coordinators for Degree Programs and/or Departments](#) and include:

1. Coordination of the administration of the degree programs within their purview;
2. Oversight of student academic progression;
3. Maintenance of records of students' programs of study; and
4. Communication of program policy and processes to students and faculty.

The Academic Program Coordinator will review the curriculum to assess its educational quality and soundness. The Academic Program Coordinator will consult with and seek the advice of appropriate committees of the faculty with respect to curricula. Any concerns will be reported to the appropriate program chair or director.

Since before the last reaccreditation in 2011, the [Academic Program Liaison \(APL\)](#) Committee, comprising representatives from each of the colleges, schools and comprehensive campuses of the University, has served as an additional level of quality control on program coordination. The APLs are tasked with monitoring the progress of program proposals in their respective units, and ensuring that they move expeditiously according to the submission cycle timelines. Nearly all of the APLs are faculty, and they work closely with the faculty chairs and undergraduate and graduate program directors to help them accomplish their curricular coordination duties. The process of curriculum development and review is governed by [ACAF 2.00 Creation and Revision of Academic Programs](#), and [ACAF 2.03 Creation and Revision of Academic Courses](#). These policies identify the department chair or program director as the individual with primary responsibility for approving new or revised programs and curricula at the unit level, and for transmitting program proposals to the campus, college or school level for approval. Faculty undergraduate and graduate program directors are expected to play a role in shepherding proposals through the faculty governance process.

The list of qualified individuals charged with ensuring that each academic program contains essential curricular components, has appropriate content and pedagogy, and maintains discipline currency can be found in the table below.
