South Carolina College of Pharmacy Senators
Kailey Mattison
Travis Mulholland

I am interested in becoming a USC Senate member for the School of Pharmacy. I will be a P3 in the 2019-2020 school year and would like to use the skills and connections I have made to represent COP in the USC student government. Working as a float TA with community lab helped me develop time management, communication, and organization skills. Being active in the COP organizations has showed me the importance of community involvement.
My name is Mary, and I would love to represent the College of Pharmacy as a senator. I would love to develop a stronger relationship between the COP and Big USC. It’s my goal to give our college a strong voice within big USC and make an impact. I will represent our student body with professionalism and give students from every class the opportunity to express changes they would like to see.
