APEX is an intense preparation program for med school applicants. It is also an opportunity for a trip to the gross anatomy lab at the USC School of Medicine, shadowing in the hospitals, and lots of tips about how to make your application accentuate your experiences and highlighting your strengths. We will have two current medical students with us the entire time to answer your questions and provide insight about med school. The application prep portion includes a comprehensive AMCAS overview, personal statement workshops, interview skills workshops, two simulated, true to life med school interviews for each participant, and discussions about current health care issues. This program will provide shadowing opportunities and help highly-motivated students learn how to showcase their abilities, skills, and motivation throughout the application process to allopathic and osteopathic med school and dental school.

Must have 60 hours of earned college credit to attend.

University of South Carolina
