AFRICAN-AMERICAN STUDIES 201
INTRODUCTION TO AFRICAN AMERICAN STUDIES

BULLETIN INFORMATION
AFAM 201 - Introduction to African American Studies: Social and Historical Foundations (3 credit hours)

Course Description:
Introduction to the key debates, figures, and concepts that are fundamental to the interdisciplinary study of the historical, political, and social development of black life in America.

SAMPLE COURSE OVERVIEW
This course is an introduction to the social, historical and political contours of African American life and the interdisciplinary study of the Black/African American experience. With the Carolina Core, this course meets the Global Citizenship and Multicultural Understanding: Social Sciences (GSS) learning outcome in that it uses social science-related principles to understand how the Black/African American experience provides an indispensable lens for exploring the diversity of American cultural identities. This course is critical to a fuller understanding of the multicultural contexts and forms of citizenship that are so central to the American and global experiences. This course is organized to provide: (1) a thematic introduction to the discipline of African American/Black Studies including an understanding of canon-formation; (2) a broad overview of key periods in African American history from their African origins to the Civil Rights/Black Power Era; and (3) a topical discussion of persistent issues in African American life. This course is not a history course, but a basic historical foundation is important for all students to understand African American Studies. During the last few weeks students are provided a present day framework with which to view African American life as taught from the disciplinary emphasis of the specific instructor of this course – e.g. anthropology, history, sociology, political science, education, among others. But the broad approach of this course, like African American Studies, is interdisciplinary so students will learn from integrative models of study and not just isolated disciplinary approaches. We will regularly discuss assigned readings, while integrating aspects of mainstream media (movies, songs, and television programs) to add context to our discussions.

ITEMIZED LEARNING OUTCOMES
Upon successful completion of African-American Studies 201, students will be able to:

1. Apply various social science-related theories to critical thinking about the Black experience, the persistent challenges and contradictions of race and racism, and the barriers race and racism have erected to the realization of American citizenship and equal opportunity.
2. Trace the broad contours of African American history from their African origins up to the Civil Rights/Black Power Era, using the interdisciplinary insights of African American Studies.

3. Explain the diversity of Black/African American life and the ways in which gender, class, and ideology among other factors have ensured the Black experience has great breadth, depth, and relevance to other cultural identities.

4. Discuss the Black experience using state-of-the-art social science-related scholarship in African American Studies.

SAMPLE REQUIRED TEXTS/SUGGESTED READINGS/MATERIALS

2. Readings: Please note all readings from the Marable and Mullings text are denoted by a “*”. All other readings are denoted by a (BB) and can be found on Blackboard (http://blackboard.sc.edu/).

SAMPLE ASSIGNMENTS AND/OR EXAMS
1. Quizzes: To ensure each student is completing assigned readings and understanding key lecture points, quizzes will be in-class and closed book. There will be at least (3) quizzes in this course so each student is advised to remain informed. The instructor reserves the right to announce or not to announce when quizzes will be given.

2. Written Assignment(s): This assignment will consist of a single paper or a series of papers (with the instructor specifying the length) and is an opportunity for each student to expand her or his knowledge and pursue through research her or his interests on a topic relevant to African American Studies. The instructor will provide further details about this assignment (or assignments).

3. Exams: There will be two (2) exams in this course. Exam questions may consist of any combination of multiple choice, true/false, short answer, and essay questions. These questions are designed to measure each student’s knowledge of course materials and command of course concepts. Exam questions will cover class lectures, readings, and discussions. The instructor will inform as to the topics/material each exam covers.

SAMPLE COURSE OUTLINE WITH TIMELINE OF TOPICS, READINGS/ASSIGNMENTS, EXAMS/PROJECTS

Weeks 1-4    Theories, Perspectives, and Frames
