Products to Keep Everyone Safe and Healthy

Re-opening your workspace or office requires a combination of cleaning and disinfectant products and PPE to keep the space virus free and your people and customers healthy. Our team has put together everything you need to reopen safely. For large quantities, please contact your account manager or customer service.

Alumni Desk Dividers
Premium Health Shields

The Alumni Premium Health Shields are made from 5mm thick clear plexiglass panels. They are available in multiple sizes to fit our most popular desks.

These Health Shields have Surface Mounting Pucks with patented Releasable Adhesive to ensure the Shields can securely attached to the desk top.

Other design features on the Premium Health Shields include: the ability to fold for compact flat storage, rounded corners, and two full length hinges to increase stability and prevent panels from separating.

Economical Health Shields

The Alumni Economical Health Shields are made from 3mm thick clear plexiglass panels. They are available in multiple styles including the Alumni Boomerang Desk and Hex Desk.

These Health Shields attach to the desk top by using "T"-Slot Mounting Pads with Releasable Adhesive to ensure the Shields are secured onto the desk top.

Other design features on the Economical Health Shields include: flexible 3M tape hinge which allows for panels to fold flat, and slightly rounded corners.
For Teacher Desks we offer a 36” Clear Plexiglass Panel that is 5mm thick and 20” in height.

For extra separation within the classroom we offer the Mobile Floor Cart made with a Clear 3mm thick Plexiglass Panel.
Hon Gen 2
Transaction
Germ Shield
