SOUTH CAROLINA COLLEGE OF PHARMACY

Administration
Philip D. Hall, Pharm.D., Campus Dean, MUSC Campus
Stephen J. Cutler, Pharm.D., Campus Dean, USC Campus
Jennifer L. Baker, Pharm.D., Director of Experiential Programs, USC Campus
Wayne E. Buff, Pharm.D., Senior Associate Dean, USC Campus
Kim E. Creek, Ph.D., Chair, Department of Drug Discovery and Biomedical Sciences, Associate Dean for Research USC Campus
Shannon J. Drayton, Pharm.D., Assistant Dean for Curriculum and Assessment, MUSC Campus
Brianne L. Dunn, Pharm.D., Associate Dean for Outcomes Assessment and Accreditation, USC Campus
Heather Easterling, Pharm.D., M.B.A., Clinical Associate Dean for Health System Affairs, MUSC Campus
Amy D. Grant, Pharm.D., M.B.A., Associate Dean for Student Affairs and Diversity, USC Campus
Daniel L. Logan, Pharm.D., Assistant Dean for Finance, USC Campus
Caitlin Mardis, Pharm.D., Director of Continuing Education and Professional Development, USC Campus
John Pearson, Pharm.D., NEEDS TITLE, GHS Campus
Douglas Pittman, Ph.D., Director of Graduate Studies, USC Campus
Kelly R. Ragucci, Pharm.D., Chair, Department of Clinical Pharmacy and Outcome Sciences, MUSC Campus
S. Scott Sutton, Pharm.D., Vice Chair, Department of Clinical Pharmacy and Outcome Sciences, USC Campus
Cathy L. Worrall, Pharm.D., Associate Dean for Student Affairs and Experiential Education, MUSC Campus
Patrick M. Woster, Ph.D., Chair, Department of Drug Discovery and Biomedical Sciences, MUSC Campus

Professors
Hamano Angeli,
Craig C. Beeson, Ph.D., University of California, 1993, MUSC Campus
Charles L. Bennett, M.D., Ph.D., Graduate School, 1989; University of Pennsylvania, 1981, USC Campus

Hamano Angeli
Katherine H. Chessman, Pharm.D., Medical University of South Carolina, 1988, MUSC Campus
Kim E. Creek, Ph.D., Purdue University, 1980, USC Campus
Stephen J. Cutler, Pharm.D., University of Georgia, 1989, USC Campus
Sandra S. Garner, Pharm.D., Medical University of South Carolina, 1989, MUSC Campus
Philip D. Hall, Pharm.D., Medical College of Virginia, 1988, MUSC Campus
Mark T. Hamann, Ph.D., University of Hawaii, 1992, MUSC Campus
Lorne J. Hofseth, Ph.D., Simon Fraser University, 1996, USC Campus
Marc Lapointe, Pharm.D., Medical University of South Carolina, 1995, MUSC Campus
John J. Lemasters, M.D., Ph.D., Johns Hopkins, 1975, MUSC Campus
Campbell McInnes, Ph.D., University of Edinburgh, 1991, USC Campus
Jean Nappi, Pharm.D., University of Texas, 1977, MUSC Campus
Kennerly S. Patrick, Ph.D., University of Iowa, 1978, MUSC Campus
Kelly R. Ragucci, Pharm.D., University of Toledo, 1997, MUSC Campus
Igor Roninson, Ph.D., Massachusetts Institute of Technology, 1982, USC Campus
Edward E. Soltis, Ph.D., University of Florida, 1984, MUSC Campus
S. Scott Sutton, Pharm.D., University of South Carolina, 1998, USC Campus
Kenneth Tew, Ph.D., University of London, 1976, MUSC Campus
Roger L. White, Pharm.D., Medical College of Virginia, 1983, MUSC Campus
Cathy L. Worrall, Pharm.D., University of Florida, 1993, MUSC Campus
Patrick M. Woster, Ph.D., University of Nebraska, 1985, MUSC Campus

Associate Professors
Betsy W. Blake, Pharm.D., Medical University of South Carolina, 2000, USC Campus
Nicole Bohm, Pharm.D., University of Florida, 2003, MUSC Campus
P. Brandon Bookstaver, Pharm.D., University of South Carolina, 2004, USC Campus
Kristy H. Brittain, Pharm.D., Wilkes University, 2005, MUSC Campus
Philip J. Buckhaults, Pharm.D., University of Georgia, 1996, USC Campus
Wayne E. Buff, Pharm.D., University of South Carolina, 1997, USC Campus
Celeste R. Caulder, Pharm.D., University of North Carolina, 2004, USC Campus
Sherine Swee Lin Chan, Ph.D., University of Western Australia, 2002, MUSC Campus
James M. Chapman, Ph.D., University of North Carolina, 1981, USC Campus
Chung Jen James Chou, Ph.D., University of Washington, 2004, MUSC Campus
Christina L. Cox, Pharm.D., University of South Carolina, 2006, USC Campus
Thomas A. Dix, Ph.D., Wayne State University, 1983, MUSC Campus
Shannon J. Drayton, Pharm.D., University of South Carolina, 2000, MUSC Campus
Brianne L. Dunn, Pharm.D., Medical University of South Carolina, 2008, USC Campus
Patricia H. Fabel, Pharm.D., University of Rhode Island, 2006, USC Campus
Joli Fermo, Pharm.D., University of Nebraska, 1993, MUSC Campus
Jason S. Haney, Pharm.D., Medical University of South Carolina, 2007, MUSC Campus
Hippocrates Kiaris, Ph.D., University of Crete, 1997, USC Campus
Bryan L. Love, Pharm.D., University of South Carolina, 1997, USC Campus
Kevin Lu, Ph.D., University of Maryland, 2011, USC Campus
Whitney Maxwell, Pharm.D., Medical University of South Carolina, 2008, USC Campus
Anna-Lisa Nieminen, Ph.D., University of Kuopio, Finland, 1991, MUSC Campus
C. LeAnn B. Norris, Pharm.D., University of South Carolina, 2004, USC Campus
Nicole Pilch, Pharm.D., MSCR, University of Wisconsin-Madison, 2003; University of Cincinnati, 2008
Douglas Pittman, Ph.D., University of Iowa, 1996, USC Campus
Ozgur Sahin, Ph.D., University of Heidelberg, 2008, USC Campus
Michael Shitutman, Ph.D., Russian Cancer Research Center, 1996, USC Campus
Danyelle M. Townsend, Ph.D., University of Virginia, 2001, MUSC Campus
Christopher Wisniewski, Pharm.D., University of Sciences in Philadelphia, 2004, MUSC Campus
Michael D. Wyatt, Ph.D., University College London, 1996, USC Campus
Pei Sheng Xu, Ph.D., University of Wyoming, 2007, USC Campus
Zhi Zhong, Ph.D., University of North Carolina, 1996, MUSC Campus
Jun Zhu, M.D., Ph.D., Fukui Medical University, 1998, USC Campus

**Assistant Professors**

Michaela Almgren, Pharm.D., South Carolina College of Pharmacy, 2010, USC Campus
Jennifer L. Baker, Pharm.D., University of South Carolina, 2002, USC Campus
Scott W. Bragg, Pharm.D., West Virginia University, 2011, MUSC Campus
Eugenia Broude, Ph.D., Ukrainian Academy of Sciences, 1990, USC Campus
Anthony DeClue, Pharm.D., Medical University of South Carolina, 2016, MUSC Campus
Heather Easterling, Pharm.D., M.B.A., Medical University of South Carolina, 2001, MUSC Campus

**Research Associate Professors**

Nickey Evans, Pharm.D., South Carolina College of Pharmacy, 2013, USC Campus
Jing Fang, M.D., Ph.D., Shanghai Second Medical University, 2004, USC Campus
Amy D. Grant, Pharm.D., M.B.A., Medical University of South Carolina, 2004, USC, 2013, USC Campus
Julie Ann Justo, Pharm.D., University of Florida, 2009, USC Campus
Mythreye Karthikeyan, Ph.D., University of North Carolina, Chapel Hill, 2005, USC Campus
Yangmei Li, Ph.D., Zhejiang University, 2005, USC Campus
Eduardo Maldonado, D.V.M., Ph.D., Universidad Nacional del Sur, Bahia Blanca, Argentina, 2001, MUSC Campus
Caillt Marda, Pharm.D., South Carolina College of Pharmacy, 2011, USC Campus
Sajeh Mathew, Ph.D., Indian Institute of Technology Kanpur, 2008, USC Campus
Karen H. Mcgee, Pharm.D., University of South Carolina, 1989, USC Campus
Jill E. Michels, Pharm.D., University of South Carolina, 1996, USC Campus
Cynthia M. Phillips, Pharm.D., University of Tennessee, 1991, USC Campus
Dave Shirley, Pharm.D., Medical University of South Carolina, 2002, MUSC Campus
James J. Sterrett, Pharm.D., Medical University of South Carolina, 1997, MUSC Campus
Emmeline Tran, Pharm.D., University of Utah, 2014, MUSC Campus
Jill R. Turner, Ph.D., Georgetown University, 2007, USC Campus
Erin R. Weeda, Pharm.D., University of New Mexico College of Pharmacy, 2014, MUSC Campus
Jennifer Wisniewski, Pharm.D., University of Tennessee, 2008, MUSC Campus

**Instructors**

Kathy Quarles-Moore, B.S., Pharm., University of South Carolina, 1986, USC Campus

**Research Associate Professors**

Yuri Peterson, Ph.D., Louisiana State University Health Sciences Center, 2004, MUSC Campus

**Part-Time and Adjunct Faculty**

Anthony Abramczyk, Pharm.D., Shenandoah University, 2008, MUSC Campus
Glen Albright, Pharm.D., University of Florida, 2007, MUSC Campus
Dave Amsden, Pharm.D., University of Nebraska, 1981, Palmetto Health Richland, USC Campus
Melissa Baird, Pharm.D., University of South Carolina, 1994, MUSC Campus
Doug Baldwin, Pharm.D., University of Utah, 1994, MUSC Campus
Christopher M. Bland, Pharm.D., University of South Carolina, 2000, USC Campus
Rodel Bobadilla, MSN, BSN, University of South Carolina, 1996, USC Campus
Carolyn M. Smith Bondarenka, Pharm.D., M.B.A., Albany College of Pharmacy, 2006, MUSC Campus
Nicole K. Bookstaver, Pharm.D., University of South Carolina, 2009, USC Campus
Melody Brannham, B.S., Pharm., University of South Carolina, 1987, MUSC Campus
Jeff Brittain, Pharm.D., Wilkes University, 2005, MUSC Campus
Frank Brunson, B.S., Pharm., Medical University of South Carolina, 1976, USC Campus
Wendy Bullington, Pharm.D., Medical University of South Carolina, 2003, MUSC Campus

Sharon Castle, Pharm.D., University of Kentucky, 1994, MUSC Campus
Kimberly Clark, Pharm.D., University of North Carolina, 2005, GHS Campus
Toby Clark, M.Sc, Pharm., Wayne State University, 1970, MUSC Campus
Jason Cooper, Pharm.D., Medical University of South Carolina, 1996, MUSC Campus
Toby Cox, Pharm.D., University of North Carolina, 1995, MUSC Campus
Lucy Crosby, Pharm.D., University of Georgia, 2004, GHS Campus
Kelly Crowley, Pharm.D., Howard University, 2010, MUSC Campus
James H. Davis, M.B.A., Charleston Southern University, 1995, MUSC Campus
Robert E. Davis, Pharm.D., Medical University of South Carolina, 1975, USC Campus
Tracie Delay, Pharm.D., Northeastern University, 2001, MUSC Campus
Ashley Donato, Pharm.D., University of South Carolina, 2000, MUSC Campus
Christopher Dunne, Pharm.D., Auburn University, 2007, MUSC Campus
Hugh Durrence, M.D., Medical University of South Carolina, 1995, MUSC Campus
Heather Eddy, Pharm.D., University of South Carolina, 2000, GHS Campus
Todd Eddy, Pharm.D., Ferris State University, 2005, GHS Campus
Kathy R. Edwards, Pharm.D., Medical University of South Carolina, 1987, MUSC Campus
Jennifer Endres, Pharm.D., The Ohio State University, 2008, GHS Campus
Mark Erwin, B.S., Pharm., Creighton University, 1991, MUSC Campus
Carmen Fauver-Fennell, Pharm.D., University of North Carolina, 2002, GHS Campus
Jenna L. Foster, Pharm.D., South Carolina College of Pharmacy, 2012, USC Campus
Edward Vess, Pharm.D., University of South Carolina, 1980, MUSC Campus
Jon Wallace, RPh., JD, University of South Carolina School of Law, 2003, MUSC Campus
Courtney Suzanne Watts, Pharm.D., Auburn University, 2013, GHS Campus
Kristin G. Wellborn, Pharm.D., Medical University of South Carolina, 2009, GHS Campus
Barbara Wiggins, Pharm.D., Virginia Commonwealth University/Medical College of Virginia, 1998, MUSC Campus
Connie Williams, Pharm.D., University of Illinois, 1990, MUSC Campus
Tom Worrall, Pharm.D., University of Florida, 2003, MUSC Campus
Thomas D. Wyatt III, B.S. Pharm., University of South Carolina, 1978, USC Campus

Deans Emeritus
John F. Cormier, Pharm.D., Medical University of South Carolina, 1975, MUSC Campus
Joseph T. DiPiro, Pharm.D., University of Kentucky, 1981
Julian H. Fincher, Ph.D., University of Connecticut, 1964, USC Campus
William H. Golod, Ph.D., Purdue University, 1957, MUSC Campus
Arnold W. Karig, Ph.D., Purdue University, 1971, MUSC Campus
Randall C. Rowen, Pharm.D., Northeastern University, 1983, USC Campus
Farid Sadik, Ph.D., University of Mississippi, 1968, USC Campus

Emeriti Faculty
Robert L. Beamer, Ph.D., Medical College of Virginia, 1959, USC Campus
Sondra H. Berger, Ph.D., Roswell Park, State University of New York at Buffalo, 1982, USC Campus
John A. Bosso, Pharm.D., State University of New York at Buffalo, 1973, MUSC Campus
Deborah S. Carson, Pharm.D., Medical University of South Carolina, 1982, MUSC Campus
Michael Dickson, Ph.D., The Ohio State University, 1972, USC Campus
Joseph W. Kosh, Ph.D., University of Colorado, 1971, USC Campus
Brooks C. Metts, Pharm.D., University of Tennessee, 1970, USC Campus
William Alexander Morton Jr., Pharm.D., University of California at San Francisco, 1976, MUSC Campus
Ronald O. Nickel, Ph.D., University of Iowa, 1984, MUSC Campus
C. Eugene "Gene" Reeder, Ph.D., University of South Carolina, 1983, USC Campus
Joseph Roberts, Ph.D., McGill University, 1964, USC Campus
Richard Schulz, Ph.D., University of North Carolina, 1983, USC Campus
Joseph W. Sowell, Ph.D., University of Georgia, 1972, USC Campus
C. Wayne Weart, Pharm.D., Philadelphia College of Pharmacy and Science, 1974, MUSC Campus
Donald B. West, Pharm.D., Medical University of South Carolina, 1985, MUSC Campus
John C. Voris, Pharm.D., University of Nebraska, 1979, USC Campus

Policies and procedures outlined in this document apply to the South Carolina College of Pharmacy (SCCP) at the MUSC, USC, and GHS campuses. Additional policies and procedures related specifically to the MUSC Campus, www.musc.edu, and USC Campus, www.sc.edu, are defined by the appropriate academic bulletins of the individual universities and Carolina Community for the USC campus. GHS Campus students default to their campus of origin for policies and procedures not addressed in this academic bulletin.
Vision, Mission, and Core Values Statements

Vision

“Improving Health through Leadership and Innovation in Pharmacy Education, Research, and Patient Care.”

Mission

The SCCP is an education, research, and service enterprise that makes the best use of state resources, student tuition, grant funds, and endowment funds to:

- Produce pharmacists at an advanced level of practice to provide pharmaceutical care and serve the health needs of SC citizens related to medications.
- Develop and apply expertise in economics, epidemiology, and health outcomes assessment to guide population-level drug policy at local, state, and federal level to make the best decisions regarding medications.
- Develop and apply research skills in biomedical sciences to discover, develop, and test new drug therapies to treat or prevent important health problems.
- Serve as a national leader in pharmacy education and research.
- Promote life-long learning for practitioners.
- Seek and welcome students, faculty and staff members regardless of factors such as gender, race, age, nationality, religion or disability and recognize the benefits of diversity.

Core Values

- We share a commitment to excellence in education, research and practice.
- We recognize and embrace the importance of professional service on a local, regional, national, and international level.
- We provide community leadership and support.
- We foster an environment where integrity, accountability, respect and collegiality are expected.
- We advance the tenet that the SCCP is a member-driven organization that has accessible administrative leadership that empowers faculty, staff, students, and alumni to shape the direction of the College.
- We actively promote diversity in an environment where students, faculty, and staff are welcome regardless of factors such as race, gender, nationality, religion, or disability.

Degree Offered

The Doctor of Pharmacy (Pharm.D.) degree is offered. This is a full-time degree program requiring four academic years, which includes introductory practice experiences and advanced practice experiences that must be completed during the summer semesters. For students entering the program in Fall 2011, a total of 214 hours (66 hours of prepharmacy and 148 hours of professional program courses) are required; for students entering the program Fall 2012 and Fall 2013, a total of 215 hours (66 hours of prepharmacy and 149 hours of professional program courses) are required for completion of the Doctor of Pharmacy degree. For students entering the program in Fall 2014 and beyond, a total of 214 hours (66 hours of prepharmacy and 148 hours of professional program courses) are required for completion of the Doctor of Pharmacy degree.

The maximum length of time that will be allowed for a student to complete the four-year South Carolina College of Pharmacy (SCCP) Doctor of Pharmacy professional degree program will be six consecutive academic years from the date of their original entry into the professional program. Any student who wishes to extend the time allowed for completion of the program beyond the six-year limitation will be required to submit a petition request to the SCCP Scholastic Standing and Petitions Committee; the petition will be reviewed and a decision for a time extension will be based on the individual student circumstances.

Important Information About Doctor of Pharmacy Degree Program and Licensure

Each state has its own pharmacy licensing board with its own state specific licensing requirements. Consequently, although the South Carolina College of Pharmacy Doctor of Pharmacy professional degree program is fully accredited by the Accreditation Council for Pharmacy Education (ACPE), making its graduates eligible to sit for the NAPLEX and MPJE exams and for licensure in the state of South Carolina, we cannot confirm that the program meets all the requirements for professional licensure in another state. For students not living in South Carolina, the following link provides National Association of Boards of Pharmacy (NABP) information regarding individual state boards of pharmacy and licensure specific to individual states throughout the U.S. where a non-resident student lives: https://nabp.pharmacy/boards-of-pharmacy/. Additional information may be found at the Academic Programs Professional Licensure website: www.sc.edu/about/offices_and_divisions/provost/planning/academicprograms/state.

Beginning with the Class of 2019, students admitted to the University of South Carolina Campus of the South Carolina College of Pharmacy who completed pharmacy prerequisites but have not yet received a Bachelor’s degree in any discipline prior to entering the professional Pharm.D. program may be eligible for the Bachelor’s degree in Pharmaceutical Sciences. A total of 128 hours (66 hours of undergraduate and 62 hours of professional program courses) are required for completion of the Bachelor’s degree in Pharmaceutical Sciences; a combination of undergraduate courses, Carolina Core course requirements, and first and second year professional Pharm.D. courses comprise this degree.

As of Fall 2016, the South Carolina College of Pharmacy no longer accepts admission applications nor matriculates students into the Doctor of Pharmacy program. All entrance requirements, pharmacy prerequisite requirements, and policies relating to international applicants refer to requirements for Doctor of Pharmacy students who are currently enrolled in the South Carolina College of Pharmacy.

Entrance Requirements

Admission to the SCCP is competitive and based on the applicant’s completion of Pre-Pharmacy course requirements, GPA, academic record, letters of recommendation, interview evaluations, PCAT scores, honors/awards, extracurricular activities, pharmacy exposure, student personal statement concerning their goals for a career in pharmacy, and diversity statement. Applicants must complete the PCAT and have official scores reported prior to the end of the application period, on or before the application deadline published on the SCCP website in the year of anticipated admission. Applicants will apply through the PharmCAS system and complete the supplemental application for the South Carolina College of Pharmacy through CollegeNet.

Applicants must provide an official copy of all college transcripts to PharmCAS at the time of application submission. A second transcript is required to be submitted to PharmCAS upon receipt of final fall semester grades. Subsequent transcripts are required to be submitted directly to the preferred campus as indicated in the
supplemental application upon receipt of final spring and summer grades. As a state-supported institution, preference will be given to in-state applicants. In-state students are defined as S.C. residents and any non-S.C. resident attending a S.C. college or university. In-state status as defined here only applies to the admission process. Residency for the purpose of tuition will be determined by the institutions residency offices (MUSC or USC) where the student enrolls for the Doctor of Pharmacy program. All accepted students will be required to submit to a criminal background review prior to matriculation into the program.

*A combination of either a separate Human Anatomy (3 hours) and Human Physiology (3 hours) or a combined Anatomy & Physiology I (3 hours) and Anatomy & Physiology II (3 hours) will fulfill this requirement.

All pre-pharmacy course requirements must be successfully completed with a “C” or better prior to the Fall semester of SCCP professional year one.

SCCP Policy for International Admissions to the PharmD Program

The South Carolina College of Pharmacy is welcoming to international students within the policy described below. Individual Doctor of Pharmacy program applicants who meet these requirements may apply.

The SCCP also considers a limited number of international applicants to the doctor of pharmacy program who have completed at least a 5-year bachelor of science in pharmacy degree and when there is a prior written agreement between the SCCP and an international sponsoring university, government, or agency (International Partnership Program).

Individual International Applicant Requirements

1. At least 42 hours of SCCP prerequisite courses must have been completed at a college or university accredited in the United States (excluding courses delivered via electronic media), including English language prerequisites.
2. An international student admitted to the College must be proficient in English with a score of at least 550 on the Test of English as a Foreign Language (TOEFL) paper based exam, 77 on the internet-based TOEFL, or 210 on the computer-based TOEFL.
3. Applicants must be eligible to receive a Pharmacy Intern Certificate based on the South Carolina Board of Pharmacy requirements. The Pharmacy Intern Certificate is a requirement for students to complete Introductory and Advanced Pharmacy Practice Experiences portion of the PharmD curriculum.
4. Students who have attended post-secondary educational institutions, colleges or universities outside of the United States are required to submit a professional credential evaluation of all work completed. This is generally referred to as a course-by-course transcript evaluation. A course-by-course transcript evaluation should be sent directly to the Office of Enrollment Management from the evaluation service, which must be a member of the National Association of Credential Evaluation Services (NACES). The web address is www.naces.org.
5. Students currently enrolled in a term or semester should contact the evaluation service for a partial evaluation. A final evaluation will be required prior to enrollment. A fee from the student is required for the evaluation of credentials. The payment and all contact regarding this process is done directly with the evaluation service of your choice. Below is the contact information of two companies that frequently provide us with evaluations.

   Josef Silny & Associates, Inc.
   International Educational Consultants
   7101 SW 102 Avenue
   Miami, FL 33173
   Web: www.jsilny.com
   Phone: 305-273-1616

   World Education Services, Inc.
   P.O. Box 5087
   Bowling Green Station
   New York, NY 10274-5087
   Web: www.wes.org
   Phone: 212-966-6311

6. Official documents (photocopies are acceptable) certifying that the student will have sufficient funding to attend the South Carolina College of Pharmacy for one academic year are required. This evidence will be used to issue the student an immigration document (F-1 or DS-2019) which will be required to obtain the F-1 or J-1 student visa at a US embassy or consulate. If you are a permanent resident, you do not need to provide this information. International students may not be eligible for student loans through the FAFSA process. All international students will be considered out-of-state during the admissions processes and for tuition purposes.
7. The applicant is responsible for obtaining a proper visa, if accepted.
8. Applicants admitted to the doctor of pharmacy program must comply with all student policies and requirements as detailed in the SCCP Academic Bulletin (www.sccp.sc.edu) and all admission procedure requirements including a background check and health/immunization policies.
International Partnership Program Applicant Requirements

International Partnership Applicants to the SCCP doctor of pharmacy program may apply only after a written agreement between the SCCP and the international sponsoring university, government, or agency has been completed. The number of international partnership applicants admitted each year will be determined by SCCP, and a signed partnership agreement does not guarantee admission of individual applicants. For admission of international BS degree pharmacists, applicants must meet admission criteria shown below. The SCCP may grant advanced status, depending on the individual’s academic record or practice experience. International applicants must have graduated within 10 years of the date of application.

1. An international partnership program student admitted to the College must be proficient in English with a score of at least 550 on the Test of English as a Foreign Language (TOEFL) paper based exam, 77 on the internet-based TOEFL, or 210 on the computer-based TOEFL.
2. Applicants must be eligible to receive a Pharmacy Intern Certificate based on the South Carolina Board of Pharmacy requirements. The Pharmacy Intern Certificate is a requirement for students to complete Introductory and Advanced Pharmacy Practice Experiences portion of the PharmD curriculum.
3. Students who have attended post-secondary educational institutions, colleges or universities outside of the United States are required to submit a professional credential evaluation of all work completed. This is generally referred to as a course-by-course transcript evaluation. A course-by-course transcript evaluation should be sent directly to the Office of Enrollment Management from the evaluation service, which must be a member of the National Association of Credential Evaluation Services (NACES). The web address is www.naces.org. A fee from the student is required for the evaluation of credentials. The payment and all contact regarding this process is done directly with the evaluation service of your choice.

Below is the contact information of two companies that frequently provide us with evaluations.

Josef Silny & Associates, Inc.
International Educational Consultants

Phone: 212-966-6311

4. Official documents (photocopies are acceptable) which certify that the student will have sufficient funding to attend the South Carolina College of Pharmacy for one academic year is required. This evidence will be used to issue the student an immigration document (I-20 or DS-2019) which will be required to obtain the F-1 or J-1 student visa at a US embassy or consulate. Students who are permanent residents do not need to provide this information.

5. The applicant is responsible for obtaining a proper visa, if accepted.

6. Applicants admitted to the doctor of pharmacy program must comply with all student policies and requirements as detailed in the SCCP Academic Bulletin (www.sccp.sc.edu) and all admission procedure requirements including a background check and health/immunization policies as well as University requirements.

Technical Standards of the South Carolina College of Pharmacy

One of the primary missions of the College of Pharmacy is to prepare outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the state and society and to enhance the delivery of essential pharmacy services for all citizens. The faculty of the South Carolina College of Pharmacy strives to deliver an education that will, through the graduates of the Doctor of Pharmacy Program, attain the highest levels of this goal.

The professional program leading to the Doctor of Pharmacy degree and eligibility for pharmacist licensure requires a certain level of cognitive, behavioral and technical skill and ability inherent in a professional education. These principles and standards hold for admission, progression, retention and completion of the program. The primary role of the pharmacist is to provide safe and effective health care to the patients served. Patient safety must be considered in the selection and education of student pharmacists. In order to foster patient safety, the South Carolina College of Pharmacy requires all student pharmacists to demonstrate the ability to meet the minimum standards set forth herein. Standards are developed as criteria to achieve the Doctor of Pharmacy degree in preparation for licensure as a practicing pharmacist and for postgraduate professional training and education in any of the varied fields of pharmacy.

Student pharmacists must reasonably contribute to a safe environment through their personal physical and mental health and social behavior. Students must complete the academic program in a reasonable length of time, must be able to acquire a pharmacist intern license by their first semester in the College and maintain the pharmacist intern license during their educational program, and must be eligible for a pharmacist license after they complete the Doctor of Pharmacy program.

All students are expected to successfully fulfill the same core educational requirements. Reasonable education-related accommodations will be provided, where possible and within the guidelines of the South Carolina College of Pharmacy and its founding institutions, Medical University of South Carolina and University of South Carolina.

The five standards listed below describe the essential functions students must demonstrate in order to fulfill the requirements of a general pharmacy education, and thus are prerequisites for entrance to, continuation in, and graduation from the South Carolina College of Pharmacy. A student must meet or exceed the required aptitude, abilities, and skills outlined below. Certain chronic or recurrent illnesses and problems may interfere with didactic studies, delivering or providing patient care or compromise patient safety and may be incompatible with pharmacy training or practice.

Technical Standards:

Observation: Observation necessitates the functional use of visual, auditory and somatic senses. Students must have the ability to observe and evaluate, in classrooms and patient care areas, demonstrations, experiments and patients, including performing physical assessments. Observation of the technical quality of pre-manufactured as well as compounded medications is essential.
Communication Skills: As appropriate for each stage of their education, student pharmacists must be able to communicate effectively and efficiently in oral and written English, to hear, and to listen to patients in order to elicit information; describe changes in mood, activity, and posture, and perceive verbal as well as non-verbal communications. Students must also communicate effectively and efficiently in oral and written English, to hear, and to listen to faculty, staff, other health care professionals, and preceptors. Communication includes not only speech, but also reading, writing, hearing, and computer literacy. They must be capable of completing professional communication activities in a timely manner.

Motor: Student pharmacists must have the coordination of muscular movement with accommodation if necessary to undertake the preparation of all routine forms of medication orders, the use of diagnostic equipment for patient assessment, and the direct delivery of patient therapies. Such actions require coordination of both gross and fine muscular movement, equilibrium, and functional use of the senses of touch and vision.

Intellectual, Conceptual, Integrative And Quantitative Abilities: As appropriate for each stage of their education, student pharmacists must demonstrate a fundamental and continuing ability to use analytical reasoning to independently and in collaboration with a health care team synthesize knowledge, solve problems and explain health care situations. Information must be obtained, retrieved, evaluated and delivered in an efficient and timely manner. Students must be able to demonstrate good judgment in patient care and assessment and have the ability to incorporate new and changing information obtained from the practice environment.

Behavioral And Social Attributes: Student pharmacists must demonstrate professional and ethical demeanor appropriate to their educational level. Students must be able to function within the regulatory and institutional limits of the educational environment and modify behaviors based on criticism. Students must demonstrate compassion and integrity and a concern for others. This requires responsibility for personal action and emotional stability under the stressful conditions that may come from their professional education.

Individuals with questions or concerns about their ability to meet these standards are encouraged to contact their Associate Dean for Student Affairs.

Transfer between SCCP-MUSC and SCCP-USC Campuses
(Doctor of Pharmacy Program)

1. Students must submit, in writing, to the Assistant Dean for Student Affairs/Services, their specific reasons for requesting to change campuses.
2. Transfers will only be considered in the event of extenuating circumstances. The decision as to whether there is sufficient justification to warrant campus transfer rests solely with the college administration.
3. The Assistant Deans on each campus will facilitate communications and collection of information.
4. Transfers will not be allowed during an academic year. If approved, the transfer would be effective with the start of the next academic year. The student would then abide by all policies and procedures of the transfer university.
5. A position must be available on the campus of transfer for the application to be considered.

Transfer to Greenville (GHS) Campus

A satellite campus of the SCCP located in Greenville, South Carolina is available for students to voluntarily request to transfer for the third and fourth professional years. A transfer process specific to current circumstances for each academic year will be announced to the second professional year class annually during the Fall semester.

Temporary Student Attendance at Alternate Campuses

Students may request to temporarily transfer to an alternate campus for a limited time period (less than 1 semester). Reasons for the request may be self/family health issues or personal issues. The student must meet with the Associate Dean for Student Affairs on their campus to discuss the circumstances. If the Associate Dean deems the request valid, the alternate campus will be contacted to determine if any space issues prevent the student from completing this temporary transfer. Upon approval, the student must submit in writing a request for the transfer as well as the time period involved to the Associate Dean for Student Affairs on their campus.

Dual and Concurrent Degree Programs

The SCCP offers a variety of dual and concurrent degree programs with the Doctor of Pharmacy degree. Options include:

- PharmD/Masters in Business Administration (MBA)
- PharmD/Masters in Public Health (MPH)
- PharmD/Masters in Health Information Technology (MHT)
- PharmD/PhD

For more information on these programs, please visit the SCCP website at http://www.sccp.sc.edu

Academic Track Programs

The SCCP offers three optional academic track programs within the Doctor of Pharmacy curriculum. These programs include the Business and Entrepreneurship track, Pre-Residency track, and Walker Leadership Scholars Program. The tracks allow students to focus their studies within the elective courses of the PharmD curriculum towards particular career tracks. The tracks also provide a list of activities that students can participate in outside the classroom (student organization activities, seminar programs, research projects, etc.) that will further develop professional skills applicable in these practice settings. If a student begins the Business and Entrepreneurship or Pre-Residency track programs, they are not obligated to complete the track and may discontinue their participation at any time. The Walker Leadership Scholars Program requires students to continue in the track for their second – fourth professional years.

Interprofessional Education

The SCCP requires Doctor of Pharmacy students to participate in interprofessional education (IPE) and experiences with other healthcare students. This occurs through coursework, professional organizations, pharmacy practice experiences, and other activities.
SCCP Scholastic Standing Policies

- The letter grades of A, B+, B, C+, C, D+, and D represent passing grades in order from highest to lowest.
- Courses in which students earn grades of D, D+, F, or U must be repeated.
- Per USC policy, S and U indicate, respectively, satisfactory (passing) and unsatisfactory (failing) performance in courses carried under the Pass-Fail option. Per MUSC policy, P (Pass) and NP (no pass – fail) are used. The Pass-Fail option is only used for introductory practice experiences and elective courses which are specified as Pass-Fail.
- Per USC policy, W is assigned for student withdrawal from a course after the late registration period but before the drop date. A WF, which counts as an F in GPA calculation, is assigned for student withdrawal from a course after the drop date prescribed in the USC Academic Calendar. Students who must withdraw from all courses due to compelling circumstances may petition the Scholastic Standing and Petitions Committee to receive grades of W rather than WF. Please refer to the following link to review the policy for withdrawals on the MUSC campus: http://academicdepartments.musc.edu/est/bulletin/acad_policies/.
- I (USC Campus) or IN (MUSC Campus), an incomplete, is assigned at the discretion of the course coordinator when, in the course coordinator’s judgment, a student does not complete some portion of the assigned work in a course. Per USC policy, students must fulfill remaining course requirements within 12 months in order to replace the incomplete grade with a final grade. Per MUSC policy, students must fulfill the remaining course requirements before the end of the next formal grading period (i.e., fall, spring, summer) to replace the incomplete grade with a final grade. Failure to complete the remaining coursework within these time periods will result in a final grade of F for the course. A grade of incomplete cannot be carried into the fourth professional year; requirements to remove the Incomplete and receive a final course grade must be fulfilled prior to the start of the practice experiences in the fourth professional year.
- Some courses in the professional curriculum appear in a sequence (similar course names and sequential course numbers) when course material is similar, related and/or sequentially builds knowledge/skill in a given area. In some instances mastery of material in one or more courses in such sequences are considered prerequisite to further courses in that sequence. A student receiving a grade of F in a prerequisite course cannot take the other course in that sequence when the first course has been designated as a prerequisite to them. The student must retake the failed course and receive a grade of C or better before taking the other sequenced courses, which may delay a student’s progress.
- Students must have no course deficiencies and must meet all progression guidelines as defined under the SCCP Scholastic Standing Guidelines in order to begin their advanced practice experiences at the end of the third professional year.
- The following grading scale will be utilized:
  
<table>
<thead>
<tr>
<th>Grade</th>
<th>Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90–100.00</td>
</tr>
<tr>
<td>B+</td>
<td>85–89.99</td>
</tr>
<tr>
<td>B</td>
<td>80–84.99</td>
</tr>
<tr>
<td>C+</td>
<td>75–79.99</td>
</tr>
<tr>
<td>C</td>
<td>70–74.99</td>
</tr>
<tr>
<td>D+</td>
<td>65–69.99</td>
</tr>
<tr>
<td>D</td>
<td>60–64.99</td>
</tr>
<tr>
<td>F</td>
<td>&lt; 59.99</td>
</tr>
</tbody>
</table>

- Course coordinators and course faculty will identify the specific course requirements, which will be utilized to determine student performance (i.e. tests, reports, class participation, group projects), and this should be provided to students in the syllabus at the beginning of the course.
- In cases where a student must repeat a course, both grades will remain in the student academic record and will be factored into the overall GPA.

SCCP Academic Accommodations

- Students are granted an academic accommodation by the MUSC disabilities coordinator or the USC Office of Student Disability Services. MUSC’s ADA policies and procedures and accommodations forms can be accessed at the following link: http://academicdepartments.musc.edu/est/bulletin/acad_policies/.
- Students should contact the dean’s office at MUSC to be connected to the disabilities coordinator. Students at USC should contact the Office of Student Disability Services directly (803-777-6142). Students on the GHS campus will be granted an accommodation by their home campus as stated above.
- Faculty are required by the American Disabilities Act to make accommodations for students.
- After receiving the accommodation from the designated office the student is responsible for informing each course coordinator of the accommodation or verifying each course coordinator has received documentation prior to the first exam in which the student would like to utilize the approved accommodation.
- Students with accommodation will be handled by the individual campus course coordinator.
- Students must schedule exams requiring accommodation at least 7 business days in advance of the regularly scheduled exam with the campus course coordinator. Failure to do so will result in inability to utilize accommodation for that exam.
- Examinations will be taken during the regularly scheduled class time when possible. If a conflict exists, then:
  - The examination will begin the class period prior (if possible) to the regularly scheduled time, or the examination will be taken the same day, at the first available time slot of the course coordinator or alternate testing center.
  - Students may elect to miss classes to begin the exam early or finish the exam late. Students may not miss a class with required attendance.
  - If students opt to take the exam at another time due to class schedule conflict, they are required to be present in the classes that conflict. If the student is found to not attend the classes that conflict, they will be referred to the honor council (MUSC Campus) or Office of Student Conduct (USC Campus) and/or professionalism committee (SCCP) for sanctions.
  - The University Testing Center may be utilized on the USC Campus for students requiring accommodations. Due to capacity limits, the campus course coordinator may schedule separate times to test students with accommodation at the University Testing Center if necessary after discussing with the center.
  - Faculty are encouraged to have the student take the exam in the same format as the entire class (computer or paper). The only exception is if the accommodation relates to how the exam is administered (paper or computer).
  - Faculty should ensure that students who receive extra time on the exam are able to remain in one location for the entire time allotted per the accommodation if possible.

SCCP Scholastic Standing Policies

Progression:

- In order to be eligible for promotion and graduation, students must obtain at least a 2.0 (grade of C or better) in each professional course and maintain an overall GPA of at least 2.0 in all professional courses; Course grades of D, D+, I, F and U are considered deficiencies.
Students must remove any deficiencies by the beginning of fall semester in order to be promoted to the next year. This may be accomplished by taking summer classes, if available. Requests to take classes outside of the SCCP and to receive credit for these classes will require the approval of the course coordinator and the Assistant or Associate Dean for Curriculum.

Course withdrawals and leaves of absence require the approval of the Dean’s Office. “Compelling circumstances” must be evident. On the MUSC campus, students who withdraw from a course after the established drop date will receive a grade of WP or WF. Please refer to the following link to review the policy for withdrawals on the MUSC campus: http://academicdepartments.musc.edu/bsd/bulletin/policies/grading.html. On the USC campus, students who withdraw prior to the established USC drop date will receive a grade of W; students who withdraw from a course after the established USC drop date will receive a grade of WF, which calculates as a zero for purposes of computing a student’s GPA.

Students are required to register for and successfully complete all required and elective coursework in a specific professional year in order to register for courses and progress to the next professional year in the curriculum.

If a student fails to achieve a grade of C or better in an elective course, the student is encouraged, but not required, to re-take the elective course. However, the student must successfully complete a minimum of eight hours of electives by the end of the third professional year.

Students will not be allowed to complete a course in a sequenced group of courses if they receive a grade of F or U in the previous course that has been designated a prerequisite to the latter course(s); a grade of D+ or D in the previous course will allow a student to complete other courses in a sequenced group of courses, but the course deficiency must be removed prior to beginning the next professional year in the curriculum.

Sequenced courses in the SCCP curriculum in which one course in the sequence is considered a prerequisite for one or more of the other courses in the sequence are listed below; it should be noted that some sequenced courses are scheduled over multiple professional years:

- Foundations of Pathophysiology & Pharmacology I and II
- Foundations of Pharmaceutical Chemistry & Pharmacogenomics I and II
- Introduction to Drug Information and Advanced Drug Information
- Pathophysiology & Pharmacology I, II, III, and IV
- Intro Community Pharmacy Laboratory and Applied Community Pharmacy Laboratory
- Intro Health Systems Laboratory and Applied Health Systems Laboratory
- Clinical Applications II, III, IV, V, and VI
- Pharmacotherapy I, II, III and IV

For integrated/linked courses that are also delivered in sequence (such as Pharmacotherapy I-IV and Pathophysiology/Pharmacology I-IV), students will not be allowed to complete either of the two next courses in the sequence if they receive a grade of F in either of the two previous integrated courses. A grade of D+ or D in either course will allow a student to complete the next courses in the sequence but the course deficiency must be removed prior to beginning the next professional year in the curriculum.

Students will not be allowed to complete the IPPE Community Rotation (PHMY 699) if a student has a deficiency (obtains a D+, D, F, or U) in PHMY 670 and/or PHMY 671 (Pharmacy Skills Lab I – II). Students will not be allowed to complete the IPPE Hospital/Health System Rotation (PHMY 798) if a student has a deficiency (obtains a D+, D, F, or U) in PHMY 790 and PHMY 791 (Pharmacy Skills Lab III-IV).

If a student has deficiencies (obtains a D+, D, F, or U) in more than four courses during any given academic year, he/she will be dismissed from the pharmacy program.

If a student has deficiencies (obtains a D+, D, F, or U) in more than two courses in any given academic year, he/she will NOT be allowed to make any of those courses up during summer sessions and must repeat those courses during the next academic year. If the student is on probation, he/she will be dismissed. If the student is not on probation, he/she will be suspended for one calendar year at the beginning of the next fall semester.

No student will be allowed to take more than two courses during any summer session.

No student will be allowed to take a required course (except IPPE and APPE) for the first attempt in a summer session.

Any IPPE and/or APPE experiential course deficiencies must be remediated. Students with a deficiency in a required or elective introductory or advanced pharmacy practice experience must remediate the rotation at a site determined by their home campus Experiential office. Students who elected to complete ten APPEs must complete an eleventh rotation in the event of a rotation deficiency.

A failure or dismissal from an IPPE or APPE will result in an additional tuition charge to remediate a practice experience.

Students with a deficiency (obtaining a D+, D, D, F, or F) in more than one APPE rotation will be dismissed from the program.

Students who earn a course deficiency in a Fall semester course will not be allowed to hold office in any professional organization or class at the SCCP or university level for the following Spring semester. Students who earn a course deficiency in a Spring semester course will not be allowed to hold office in any professional organization or class at the SCCP or university level for the following Fall semester. If you are a current or incoming student leader who falls under one of the above situations, you will be required to resign from your leadership position(s).

Suspension:

- Suspension means that a student will be prohibited from advancing in the curriculum for one calendar year. Students will be suspended if they fail to remove any deficiencies by the beginning of the fall semester.
- A suspended student may repeat required course(s) once in order to remove deficiencies and strengthen areas of weakness. (Additionally, the student may elect to improve the overall GPA and strengthen areas of weakness during their academic matriculation.)
- A suspended student who meets the requirements for promotion will be removed from suspension, placed on probation for one year (see definition below) and allowed to progress in the curriculum.
- Suspended students will not be allowed to seek or hold office in any professional organization or class at the SCCP, or university level.
- Failure to remove all deficiencies and to attain a cumulative GPA of 2.0 or higher by the conclusion of a period of suspension will result in dismissal (see definition below) from the College of Pharmacy.

Academic Probation:

- Students on probation must demonstrate their ability to consistently and satisfactorily progress in the curriculum, by maintaining a minimum GPA of 2.0 and meeting promotion requirements, for one academic year.
- To enter the fourth professional year, all professional students must have successfully completed all professional course requirements, including elective courses, by the end of the spring semester of the third professional year.
- Probationary students will not be allowed to seek or hold office in any professional organization or class at the SCCP, or at the university level.
- Failure to satisfy the terms of probation will result in dismissal.

Dismissal:

- Dismissal is the mandatory withdrawal of a student.
- After dismissal, the college will not accept any course work from the student to complete the Doctor of Pharmacy program.
• Students will be dismissed if they fail to remove all deficiencies, fail to attain a cumulative GPA of 2.0 or higher by the conclusion of a period of suspension, or if they fail to satisfy the terms of probation.
• A student may repeat a course in the professional curriculum only once. Failure to remove the course deficiency after the second attempt will result in the student’s dismissal.
• If a student has deficiencies in more than four courses during any given academic year, he/she will automatically be dismissed from the program.
• Students with a deficiency in more than one APPE rotation will be dismissed from the program.
• Students may be dismissed for lack of professionalism and/or professional misconduct.
• Students may be dismissed by the SCCP and/or either the University of South Carolina or Medical University of South Carolina dependent upon individual student situation.

Petitions:
• Any student seeking an exception to the academic standards may petition the SCCP Scholastic Standing and Petitions Committee. Students have 10 calendar days from the date they receive written notification of their deficiency, suspension, or dismissal to submit a petition to the Dean of Student Affairs/Services who will serve as liaison and provide all documents to the Chair of the committee. A petition may be approved or denied based on the merits of the individual situation. The petition process will be handled through the Scholastic Standing and Petitions Committee.
• The Scholastic Standing and Petitions Committee does not have the authority to change grades assigned by faculty or preceptors.
• An application for readmission following withdrawal or dismissal from the program must be made through a special application process determined by the Admissions Committee.
• On the USC Campus, undergraduate pre-pharmacy students may petition the SCCP Scholastic Standing and Petitions Committee – USC Campus concerning suspension, dismissal, or readmission from/to the University of South Carolina. The maximum length of time that will be allowed to pass following suspension or dismissal before petitioning is ten years from the original suspension or dismissal notification.

SCCP Distance Education:

The South Carolina College of Pharmacy will use distance education technology in the teaching of didactic courses during the professional program.

SCCP Didactic Course Policies
• Students are obligated to complete all assigned work promptly, to attend class regularly, and to participate in class discussions/group exercises.
• Attendance is expected for all classes. The course coordinator may choose to establish a specific attendance policy in an individual course and this policy, along with consequences of violation of this attendance policy, should be presented to students enrolled in the class at the beginning of the semester, as part of the course syllabus. The course coordinator may choose to exact a grade penalty for excessive absences as defined in the specific attendance policy.
• Students are required to attend 100 percent of laboratory course meetings.
• If a scheduled test must be missed due to unforeseen circumstances, the student must notify the course coordinator by letter, phone, or e-mail, prior to the test, if possible, and the student must obtain an excuse from an Associate Dean for Student Affairs or Senior Associate Dean on the USC Campus.
• Associate Deans for Student Affairs or Senior Associate Dean on the USC Campus may excuse students for significant absences (usually related to health issues). A medical excuse or other appropriate documentation is required to be submitted if absence occurs on an exam day unless preapproved through the Dean’s Office. All other class absences must be approved by the course coordinator.
• If an absence is excused, the student will either be given a makeup exam or the other test grades will be increased proportionately to compensate for the missing grade. This decision will be at the discretion of the course coordinator.
• Each campus will assign a professor of record, who will enter grades into the campus records system for each specific course. After each major examination, this faculty member is expected to contact the individual students with grades of D+, D, or F on the exam and offer an opportunity to meet with them regarding their performance on the exam, as well as offer mechanisms for improvement. The professor of record is also expected to provide the campus dean’s office with a list of students receiving grades of D+, D, or F on the exam; this will allow the dean’s office to identify students with academic problems in multiple courses. The dean’s office will schedule academic progress conferences with students who have grade difficulties in multiple courses.

SCCP Test Scheduling Policies
• A test is defined as a major examination of material in a course (usually administered no more frequently than every two weeks, except in summer sessions). These policies do not apply to written report dates, scheduled oral presentations, or weekly quizzes. No more than two tests in core courses will be given on the same day to the same class (e.g. P1, P2, etc.) A day is defined as the day of the week, not a 24-hour period. Consequently, under this policy, two tests could be administered on Monday afternoon and two tests could be administered on Tuesday morning. No tests, except in lab courses, will be given during the week prior to final exams.
• A test schedule will be distributed to all students on the first day of class each semester. Students attending professional meetings may be excused from tests. In these cases, the course policy for excused test absences, as defined in the SCCP Course Policies, will be applied. Students who will miss class due to attendance at an event, which has been designated as an SCCP-sanctioned event, will be granted an excused absence. The coordinator MUST be notified in writing (e-mail is fine) of the scheduled absence at least four (4) weeks in advance or on day one of the semester.
• P1 students are required to attend an e-testing orientation and to confirm that the appropriate software is loaded onto their laptop. They are required to participate in an e-testing practice session prior to the first exam. Students are responsible for any lost time in completion of an exam due to inexperience with the process for running the security software and/or accessing the exam.
• Final examinations will be scheduled in accordance with the SCCP final exam schedule.
• This test policy may be suspended due to severe weather or natural disaster to facilitate rescheduling of missed classes and tests.
• For room scheduling purposes only, a 3-hour block of time will be allotted for final exams. Course coordinators will determine a reasonable length of time for completion of the final course exams. The course coordinators are not required to provide 3 hours for final exams if it is unreasonable given the exam structure.

Minimum Required Examination Procedures
• All examinations will be proctored by a faculty member(s). At least one proctor is required to be present in the exam room at all times.
• No examination materials (including scratch paper) are to leave the room under any circumstances during the actual examination period or during an examination review.
Standards of Conduct for Treatment of Trainees (MUSC Campus)

Pharmacy Intern Certificate

- Pharmacy students complete a minimum of 11 pharmacy practice experiences which represents approximately 1/3 of the total pharmacy curriculum. They are required to complete two Introductory Pharmacy Practice Experiences (IPPEs), one in Community Pharmacy and the other in a Hospital/Health System which take place following the P1 and P2 curriculum years, respectively. During the P4 year of the program, they complete 9 Advanced Pharmacy Practice Experiences (APPEs) with 5 rotations being in required experiential categories and 4 being electives in a variety of settings. Experiential rotations are assigned by a computerized schedule optimization process using a rotation management database, E*Value. Students may enter preferences for physical location, rotation sites, and preceptors, but preferences are not guaranteed. The Experiential Department will attempt to place students at a site that is within one hour driving distance each way from their permanent or temporary residence in South Carolina. All students should be prepared to arrange their own housing for IPPEs and/or APPEs if necessary due to limited rotation sites. Students are required to abide by all policies and procedures as established in respective Experiential Manuals.

Pharmacy Intern Certificate

- All students are required to have a Pharmacy Intern Certificate from the South Carolina Board of Pharmacy. Students are expected to carry their Pharmacy Intern Certificate pocket card with them at all times during pharmacy practice experiences. This certificate will need to be obtained, at minimum, no later than the last day of classes for the 1st Professional year Spring semester. If a student’s Pharmacy Intern Certificate is suspended, revoked, or voluntarily surrendered, the student may be suspended from the SCCP.

Standards of Conduct for Treatment of Trainees (MUSC Campus)

- MUSC strives to impart the values of professional and collegial attitudes and behaviors in interactions among members of the University community. MUSC prohibits attitudes and behaviors toward students, residents and fellows that are unfavorable to the development of mutual respect. The University has established Standards of Conduct for Treatment of Trainees which are published in the MUSC Academic Bulletin. The Standards of Conduct policy provides examples of misconduct and outlines procedures trainees can use to address mistreatment. The Standards of Conduct policy can be viewed at http://academicdepartments.musc.edu/esl/bulletin/bulletin_policies/standardsofconduct.html. Students may contact the Associate Dean for Student Affairs and Experiential Education for questions or concerns related to this policy.

SCCP Student Advisement/Mentorship System

- Each professional class on all campuses will be assigned a faculty class advisor. This class advisor will be actively involved in orientation and should actively promote professionalism within the class; the class advisor should also serve as a problem solver for the class. The advisor may meet with class officers to plan class events such as community outreach activities. The faculty advisor follows the class throughout their academic career in the SCCP. The class advisors are appointed by the Associate Dean for Student Affairs and approved by the Chair/Vice Chair of the department of the faculty member.

- SCCP faculty, preceptors and alumni will be encouraged to serve as career mentors. Career mentors serve as a contact person and career advisor to aid students in exploring the various career paths available upon graduation. The Associate Dean for Student Affairs will develop and maintain a current list of career mentors facilitated through the E*Value system.
SCCP Student Honor Code

- The SCCP student honor code is mandatory for all practice laboratories, all introductory and advanced pharmacy practice experiences, grand rounds/seminars, and professional events where students are representing the SCCP.
- MUSC campus students must wear their ID badges at all times while on campus. Students from both campuses must adhere to individual institution/pharmacy policies regarding site-specific ID badges.
- All students are expected to be clean, neatly groomed and dressed in a professional (conservative) manner for experiential rotations and laboratory experiences. Students not wearing clothing deemed appropriate by a laboratory instructor will be warned at the first offense. A second offense may result in a grade reduction (please see specific laboratory syllabi for penalties related to inappropriate dress). In the experiential setting, students may be dismissed immediately if dressed inappropriately and asked to return in appropriate dress. Students will be required to make up this time away from rotation (please refer to the attendance policies in the experiential manuals).
- The following guidelines are appropriate for dress during laboratory and experiential rotations:
  - Students are required to wear a white, long sleeved jacket-length lab coat and ID badge attached at the collar or chest pocket of the lab coat. Non-SCCP/commercial logos and badges are not permitted on lab coats. Men are required to wear a dress shirt with tie, dress slacks, dress socks, and close-toed dress shoes. Women are required to wear a dress blouse or sweater with a skirt or dress slacks, or a dress and close-toed dress shoes. No attire (e.g., short skirts or dresses, tight fitting clothing, low-cut blouses), accessories (e.g., large jewelry, sunglasses) or behaviors (e.g., chewing gum, wearing excessive cologne or perfume) that may be deemed unsafe or distracting to other students, instructors, preceptors, health care team members or patients will be permitted.
  - Please note that individual practice sites may have a more rigorous dress code requirement. Students must adhere to specific preceptor/site requirements.
  - Appropriate dress is also expected in the classroom. Attire that may be deemed distracting to students, faculty or others (e.g., short shorts, skirts or dresses, tight fitting clothing, low-cut blouses, halter tops, midriffs) should not be worn in the classroom.

SCCP Student Dress Code

- Policies regarding honor code and academic integrity for students enrolled in the South Carolina College of Pharmacy are defined in the individual academic bulletins for the students’ campus of enrollment, the University of South Carolina-Columbia or the Medical University of South Carolina-Charleston. For students at the USC campus, Carolina Community provides additional guidelines, including notification of student rights under FERPA and other mandated notifications.
- Any reports of potential Student Honor Code violations by faculty, staff, or students may be sent to the USC Office of Academic Integrity on the USC campus or the Honor Council President or Faculty Advisor on the MUSC campus. The academic bulletin for the campus involved will provide the guidelines for dealing with these situations.

SCCP Student Professionalism Policy

The faculty of our College has approved curricular outcome competencies that each student is expected to master. One of the most important is the demonstration of personal values and ethical principles in all professional and social contexts. Most students come into our program with a well-developed value system that is further refined as they grow through their college experience in general and their professional education. As a result, there is little emphasis on disciplinary procedures. However, to minimize ambiguity with regard to unprofessional and unacceptable behaviors, professionalism policies are presented here in some detail.

Professional Standards

The foremost privilege and responsibility of the profession of pharmacy is to selflessly serve humanity, follow state and federal rules and regulations with regards to the pharmacy profession, and to promote the public health and welfare. Given such important privilege and responsibility, pharmacy students are expected to present and conduct themselves in a manner commensurate with a health care professional.

Expected professional behavior includes but is not limited to the following:

1. Student attendance for rotations, lectures, laboratory sessions, and meetings is expected and students must adhere to attendance policies enacted by the course syllabus. Students are expected to be punctual and to remain present until the conclusion of the activity. For courses or meetings in which attendance is mandatory, no student may sign in for another student for class attendance purposes.
2. In all academic and professional settings, students are expected to be alert and prepared to handle all assigned tasks and duties. When students are assigned to work with others, it is expected that the student will participate and complete their responsibilities with regard to the project.
3. In all academic, professional, and social settings, it is expected that students will be courteous, respectful, non-disruptive, and display positive demeanor.
4. The expression of criticism or issues, either in person, in writing (letter or email), or telephone will be done in a non-threatening, non-abusive, and positive manner. Students should follow the SCCP Student Grievance Policies in regards to individual or class issues.
5. In professional settings, students will always dress in accordance with the SCCP Dress Code.
6. In all academic, professional, and public settings, it is expected that students will display the highest level of honesty and ethics. If a student suspects that another student has committed a form of academic dishonesty, there is an obligation on the student to report the violation in accordance with the campus Honor Code.
7. A pharmacy student is required to uphold the dignity and honor of the profession, and to accept its ethical principles. Students shall not engage in any activity that will discredit the profession. Students are expected to follow and uphold all local, state and federal laws at all times.
Social Media Policy

The SCCP recognizes that social networking websites are popular means of communication. Students who use these websites must be aware that posting certain information is illegal. Violations of existing statutes and administrative regulations may expose the offender to criminal and civil liability, and the punishment for violations may include fines and imprisonment. Offenders also may be subject to adverse academic actions up to and including dismissal. Please be advised that the following actions are forbidden (i.e., are considered violations of the SCCP Student Professionalism Policy):

- You may not discuss the personal health information of other individuals. Removal of an individual’s name does not alone constitute proper de-identification of protected health information. Inclusion of data such as age, gender, race, diagnosis, date of evaluation, or type of treatment or the use of a highly specific medical photograph (such as a before/after photograph of a patient having surgery or a photograph of a patient from a medical outreach trip) may still allow the reader to recognize the identity of a specific individual.
- You may not report private (protected) academic information of another student or trainee.
- You may not present yourself as an official representative or spokesperson for the institution.
- You may not access another person’s online accounts without his/her permission.
- You may not represent yourself as another person, real or fictitious, or otherwise attempt to obscure your identity as a means to circumvent any prohibitions listed in the Student Professionalism Policy.

In addition to these actions, the SCCP Student Professionalism Policy includes the following violations relevant to the use of social media:

- Knowingly distributing false information, statements, or accusations against another student, preceptor, or faculty/staff member.
- Using electronic channels of communication to disseminate inappropriate or unprofessional comments regarding peers, preceptors, faculty, staff, patients, or participants in SCCP projects.
- Verbal, written or electronic insults to the College of Pharmacy administration, faculty, preceptors, staff, students, patients, or participants in SCCP projects.
- Threats or acts of physical violence to SCCP administration, faculty, preceptors, staff, students, patients, or participants in SCCP projects.
- Harassment, in any form, of SCCP administration, faculty, staff, preceptors, students, patients, or participants in SCCP projects.
- Violating the confidentiality of a faculty committee by an appointed student representative serving on that committee.
- Sharing of passwords for protected sites.

Due to the prevalence of and types of information that can be displayed through social media (Facebook™, Twitter™, blogs, etc.) in today’s society, the College offers the following social media use guidelines for students. The SCCP also recommends that students review the MUSC Social Media Guidelines (available at http://academicdepartments.musc.edu/webcopyright/socialnetworking.html) for additional guidance on appropriate utilization of social media.

Avoid any activity on social media sites that could portray you, the College, the faculty and/or preceptors, the University or the pharmacy profession negatively. Some of the strongly discouraged actions include, but are not limited to:

- the unprofessional display of vulgarity through written comments, photos, and/or affiliations;
- the unprofessional display of language or photos that indicate discriminatory bias against any individual or group because of age, race, gender, ethnicity, national origin, or sexual orientation;
- the unprofessional display of photos or language that condone the irresponsible use of alcohol, substance abuse, or sexual promiscuity;
- posting of inflammatory or unprofessional material on another individual’s website; and
- display of any language that degrades or disrespects patients.

Those actions may be interpreted as violations of the SCCP Student Professionalism Policy. Furthermore, per HIPAA regulations, patient privacy must be maintained at all times regardless of the communication medium.

This policy should not be construed to impair any constitutionally protected activity, including speech, protest or assembly.

Copyright Policy

SCCP seeks to aid enrolled students by offering electronic presentations and recordings of lectures to improve student engagement and to better meet individual learning needs. With the growing use of technology, students and faculty have the responsibility to understand and observe copyright law including educational fair use guidelines, obtained written permission, and to follow the corresponding campus University policy.

As supplemental tools, all material found in lectures is owned by the South Carolina College of Pharmacy and is protected by United States Copyright laws. Lecture material is only available to students enrolled in the course where the content is available, and use is not permitted outside the scope of the course. Recorded lectures will only be posted to Blackboard.

Material found in the lectures may not be photocopied, screen-shot, duplicated or distributed by any student without the express, written permission from the faculty member who created the material. Video, audio, or photographic recordings of course material are strictly prohibited. Recordings, course material, and lecture notes may not be reproduced verbatim or uploaded to publicly accessible web environments. Recordings and course material may not be exchanged or distributed to a third party for compensation. Recordings and course material may not be used for any purpose other than personal study and may not violate any policies herein. An individual may individually print copies of lecture material solely for personal use under the scope of the course. Duplication or dissemination of lecture materials without authorized use may violate federal or state law and MUSC/USC University policies.

Failure to adhere to these policies is a violation of the SCCP Professionalism Policy and may result in disciplinary action under University guidelines. For any further assistance with copyright matters, faculty and students may seek guidance from their corresponding campus Library Staff or the Dean’s Office.

Procedures for Professionalism Policy Violations

Any student, faculty, staff member, or individual associated with the College’s academic programs may report a student for lack of professional behavior to the Associate Dean for Student Affairs. Under usual circumstances, the incident should have been brought to the student’s attention and resolution attempted before reporting the incident to the Associate Dean. Upon receiving a report regarding unprofessional behavior, the Associate Dean will determine the legitimacy of the report in accordance with his/her understanding of professional standards for behavior, the severity of the incident, and the urgency by which it needs to be addressed. Depending on the nature of the behavior, the Associate Dean may act on a single behavioral report or wait to act until he/she receives multiple reports of unprofessional behavior. In cases where the Associate Dean makes the decision to forgo disciplinary action(s),
he/she will inform the student of the complaint of unprofessional behavior and that future complaints may result in disciplinary action. He/she will document each complaint, such that the information remains confidential. If the Associate Dean determines that disciplinary action is warranted, each case will be addressed in the following manner:

The Associate Dean will meet with the student to counsel him/her on the importance of professionalism and strategies to correct the unprofessional behavior. These strategies may include referral to the university student counseling services and adherence to any treatment plan that is recommended. The Associate Dean will also discuss the potential consequences for unprofessional behavior with the student. If a written warning is indicated, the student and Associate Dean will sign and date a Notification of Professionalism Policy Violation acknowledging the student’s behavior and his/her awareness of the potential consequences for similar behavior in the future. This document will be placed in the student’s file.

If the Associate Dean determines that the behavior may warrant a more stringent penalty, he/she will refer the student to the SCCP Student Policy & Professionalism Committee, where the incident will be discussed further. The Committee will provide disciplinary recommendation(s) to the Associate Dean for Student Affairs of the students’ respective campus. These recommended penalties may include but are not limited to a written warning, placement on professional conduct probation, suspension from College of Pharmacy for up to one year, or dismissal from the College of Pharmacy. The final penalty will then be enforced by the USC or MUSC Associate Dean.

Professional conduct probation is defined as a designated time during which a student is under an official warning that subsequent violations of the professionalism policy or University rules, regulations, or policies are likely to result in a more severe sanction which may include suspension or dismissal from the program. While on professional conduct probation, a student may be considered to be “not in good standing” and may face specific limitations, which may include but are not limited to:

- Ineligibility for College of Pharmacy scholarships;
- Ineligibility to hold leadership positions in student organizations, class officer positions in the College of Pharmacy, or any university-wide leadership positions; or
- Ineligibility to receive financial support from the College of Pharmacy to attend professional organization meetings.
- Ineligibility for assignment to practice sites considered to be Specialty Rotations by the Experiential Education Office. Students who are put on professional conduct probation after receiving a specialty rotation assignment may be removed from the rotation.

If the committee recommends suspension, the student may be suspended from the College of Pharmacy for up to one year. The same penalties for professional conduct probation apply to a student who is suspended. In addition, further issues with unprofessional behavior may result in dismissal from the College of Pharmacy. If the committee recommends dismissal, the student may be dismissed immediately from the College of Pharmacy.

Students may appeal the decision of the Student Policy and Professionalism Committee to their Campus Dean. The Campus Dean’s decision is final. Appeals must be received in writing within 30 days of the notification of the sanction.

In some instances, policies of the individual universities may override or carry more stringent penalties based on the violation than the policies stated in this document. University policies will be enforced in these cases.

**SCCP Student Sexual Harassment & Discrimination Policy**

The specific policies regarding sexual harassment and discrimination for students enrolled in the South Carolina College of Pharmacy are defined in the individual academic bulletins for the students’ campus of enrollment, the University of South Carolina-Columbia or the Medical University of South Carolina-Charleston. For students at the USC campus, Carolina Community provides additional guidelines, including notification of student rights under FERPA and other mandated notifications. The USC Sexual Harassment/Discrimination Policy can be located at [http://www.sc.edu/policies/ppm/eop102.pdf](http://www.sc.edu/policies/ppm/eop102.pdf).

**Criminal Background Check & Student Arrest Policy**

The South Carolina College of Pharmacy (SCCP) will conduct Criminal Background Checks for all students accepted to the professional program. In addition, the SCCP may conduct Criminal Background Checks prior to pharmacy practice experiences. The SCCP may require the results of these Criminal Background Checks to the USC Campus Office of Student Judicial Programs, MUSC Campus Dean’s Office, the South Carolina Board of Pharmacy, and/or the pharmacy practice sites participating in experiential rotations. Students with any issues on their background check should work to have records expunged before beginning any experiential courses. Students are responsible for clearing any issues found in criminal background checks. The College will make a reasonable effort to place the student at a site. Many practice sites now require background checks and placement is not guaranteed.

Any student who is arrested or convicted for violation of federal, state, or local laws is subject to appropriate disciplinary action by the University of South Carolina, Medical University of South Carolina, and/or the South Carolina Board of Pharmacy. The appropriate SCCP Campus Dean’s office may immediately suspend a student from participating in experiential rotations until their case can be reviewed by USC Campus Office of Student Judicial Programs, the SCCP Student Policy and Professionalism Committee, and/or South Carolina Board of Pharmacy. Each of these entities may review the student’s case and may impose appropriate disciplinary action.

In addition, the appropriate SCCP Campus Dean’s office may immediately suspend a student from participating in experiential rotations if the Campus Dean’s office feels a student may pose a risk to public safety due to criminal background check results, arrests, or convictions. If the student believes that the background check results are in error and can provide proof, the student will be given the opportunity to produce this proof.

- **Procedures**
  1. All students will be required to sign a consent form which allows the SCCP to provide “problem” background check results to the South Carolina Board of Pharmacy and Experiential Rotation Preceptor(s)/site Human Resource Departments.
  2. All arrests or convictions must be reported to the Associate Dean for Student Affairs within 2 university business days of the event. The arrest or conviction may be reported to the South Carolina Board of Pharmacy by the SCCP. Additionally, USC campus students must notify the USC Office of Judicial Programs within 72 hours of the event. Any student with an arrest or conviction may be placed on professional conduct probation by the Dean’s office. Depending on the severity of the charges, the Campus Dean may suspend the arrested or convicted student immediately until the charges have been resolved. The student case will be reviewed by the SCCP Student Policy & Professionalism Committee and/or USC Office of Judicial Programs on the USC Campus and a recommendation for resolution will be provided to the Campus Dean.
  3. If an arrested student fails to report the arrest or conviction within 2 university business days, then he/she may be subject to immediate suspension or dismissal from the SCCP.
4. The Associate Dean for Student Affairs will maintain documentation of background checks and documentation provided by the student related to their arrest. This documentation will be maintained in a file separate from the student’s academic file.

5. Any student arrested or convicted for drug or alcohol related offenses may be referred to the Recovering Professionals Program (RPP), USC Counseling and Human Development Center (USC Campus) USC Office of Judicial Programs (USC Campus) and/or Counseling and Psychological Services (MUSC Campus). The student may be required to sign a release statement authorizing the Associate Dean for Student Affairs to speak with the referral agency regarding their evaluation of the student. The student may be required to sign a monitoring contract for random drug and alcohol screenings. The USC Office of Judicial Programs will provide the SCCP-USC Campus Administration with monitoring results; USC Campus students are expected to abide by all time limits set by this office. Any expense incurred for these screenings will be the responsibility of the student.

6. If a student’s pharmacy intern license is suspended, revoked, or voluntarily surrendered, the student may be suspended from the SCCP.

7. Further requirements that may be imposed upon the student can be found in the Chemical Impairment Policy.

Chemical Impairment Policy

The specific policies for alcohol and other drug abuse prevention and intervention for students enrolled in the South Carolina College of Pharmacy are defined in the individual academic bulletins for the students’ campus of enrollment, the University of South Carolina-Columbia or the Medical University of South Carolina-Charleston. For students at the USC campus, Carolina Community provides additional guidelines, including notification of student rights under FERPA and other mandated notifications.

Health care professionals have a responsibility to the public to practice their profession free from chemical impairment or dependency. Student pharmacists in the South Carolina College of Pharmacy (SCCP) begin providing care to patients from the time they enter the SCCP and, thus, are viewed as members of the pharmacy profession who are in training.

Chemical dependency is defined as psychological or physiological dependence on a psychoactive substance. Potential substances include alcohol, prescription and OTC drugs (obtained legally or illegally), and street drugs.

The purpose of this policy is to facilitate the identification of a student who may be chemically impaired, to promote appropriate treatment and recovery of these individuals, and to prevent patient harm from occurring.

- Procedures
  - SCCP students who suspect that they may be chemically impaired are encouraged to voluntarily report themselves to the Associate Dean for Student Affairs.
  - It is the professional responsibility of all SCCP faculty, staff, and students to report or intervene in cases when they suspect a student to be chemically impaired. The Associate Dean for Student Affairs should be notified in those cases where student impairment is suspected. Conduct that may suggest chemical impairment includes but is not limited to:
    - A decline in academic performance
    - Changes in behavior
    - Failure to carry out professional responsibilities
    - Repeated tardiness or absenteeism
    - Psychomotor deficiencies
    - Observed intoxication

  - The Dean’s Office will refer students suspected of chemical impairment for an immediate drug screen to occur within 24 hours of notification. Any expense incurred for the drug screen(s) will be the responsibility of the student. Students with positive drug screen results will be referred to the SCCP Student Policy and Professionalism Committee and the USC Office of Judicial Programs (USC Campus) to provide sanctions for violation of the SCCP Chemical Impairment Policy. Sanctions may include referral for evaluation and monitoring to one or more of the following as appropriate: the Recovering Professional Program (RPP), USC Counseling and Human Development Center (USC Campus), USC Office of Judicial Programs (USC Campus), and/or Counseling and Psychological Services (MUSC Campus) for evaluation and monitoring.
  - The appropriate SCCP Campus Dean’s office may immediately suspend a chemically-impaired student from participating in experiential rotations due to the risk posed to public safety.
  - Referred students will be required to sign a statement allowing the SCCP to contact the on- or off-campus recovery or counseling program in order to verify that the student has sought the service. In addition, the statement will allow the recovery or counseling program to discuss with the SCCP Campus Deans appropriate recommendations for potential re-entry into the SCCP program by the student (if student is suspended).
  - A file separate from the student file in the Dean’s Office will be kept on the chemically-impaired student. The Assistant Dean for Student Affairs/Services will maintain this separate file.
  - Students will assume all costs for monitoring and evaluation relating to any issued sanctions.
  - If a student placed on a monitoring contract does not comply with the monitoring requirements or test positive for the substance(s) for which he/she is being monitored (including alcohol, illegal drugs or prescription drug), the student will be immediately suspended and referred to the SCCP Student Policy and Professionalism Committee and the USC Office of Judicial Programs (USC Campus) for further action. This action may include suspension or dismissal from the SCCP.
  - Participation in a recovery program does not make the chemically-impaired pharmacy student immune to legal proceedings for criminal acts involving drug misuse, or illegal use.
  - The academic standing of a chemically-impaired pharmacy student will not change while the student is on a leave of absence for therapy. If the student is academically ineligible to continue in the pharmacy curriculum, participation in the rehabilitation program will not preclude administrative action for dismissal from the College of Pharmacy for academic reasons.
  - If a student’s pharmacy intern license is suspended, revoked, or voluntarily surrendered, the student may be suspended from the SCCP.

Eligibility for Federal Financial Aid and Scholarships

Students found in violation of the Arrest and/or Chemical Impairment policy may jeopardize their ability to receive federal financial aid for which they might otherwise be eligible. In addition, students found in violation of any SCCP policies may be prohibited from receiving a scholarship from the SCCP.

SCCP Student Grievance Policies

17
Individual Problems: When a student is experiencing a problem with any member of the college's faculty or administration, the following process should be carried out. Prior to each step in the process, the student should seek advice from his or her class faculty advisor.

1. Make an appointment with the individual with whom the problem exists, explain the problem, and try to resolve it.
2. If the problem cannot be resolved directly, the student should then contact the individual's supervisor.

If the problem is still unresolved, the student should make an appointment with the Senior Associate Dean on the USC Campus or Associate Dean for Student Affairs on the MUSC Campus to discuss and document the grievance. As directed by the Senior Associate Dean (USC Campus) or Associate Dean for Student Affairs (MUSC Campus), the student should be required to make an appointment to meet with the appropriate Dean regarding the grievance. The USC or MUSC Associate Dean will review the complaint and intervene if college or university policies have been violated. The Associate Deans will maintain a file of all such reported grievances and their outcomes. Situations that have not been resolved at this point will be referred to the SCPC Grievance Committee for final review and action. For students on the MUSC campus, please see the SCPC – MUSC Student Complaint Procedure at http://academicdepartments.musc.edu/esl/academics/complaint_resolution/complaint_form_fill.pdf. The MUSC Student Complaint Form is located at http://academicdepartments.musc.edu/esl/academics/complaint_resolution/complaint_form_fill.pdf.

Class Problems: When a class feels that there is a problem affecting the class as a whole, the following process should be carried out. Prior to each step in the process, the class president should seek advice from the class faculty advisor.

1. The president should announce and hold a class meeting. Identify the problem(s), clearly reduce them to writing, and ensure that the class is in agreement by simple majority vote. If so, the class president should forward this written statement to the individual(s) involved and request a meeting. If the class president is unsure of whom to contact, he/she should consult the Associate Dean for Student Affairs/Services.

2. If a satisfactory understanding or solution is not obtained at this level, the class president should then contact the individual’s supervisor. If the problem is still unresolved, the class president should make an appointment with the Senior Associate Dean (USC Campus) or Associate Dean for Student Affairs (MUSC Campus) to discuss and document the grievance. The class president may be required to make an appointment to meet with the appropriate Dean with which the report form was submitted. The Associate Deans will review the complaint and intervene if college or university policies have been violated. The Associate Deans will maintain a file of all such reported grievances and their outcomes. Situations that have not been resolved at this point will be referred to the SCPC Grievance Committee for final review and action. For students on the MUSC campus, please see the SCPC – MUSC Student Complaint Procedure at http://academicdepartments.musc.edu/esl/academics/complaint_resolution/complaint_form_fill.pdf. The MUSC Student Complaint Form is located at http://academicdepartments.musc.edu/esl/academics/complaint_resolution/complaint_form_fill.pdf.

SCCP Severe Weather Policies

- In the event of a weather emergency which might affect class schedules, each SCCP campus will follow the guidelines as provided by their individual institutions, the University of South Carolina or the Medical University of South Carolina.
- Students should access the USC website at www.sc.edu or the MUSC website at www.musc.edu to determine if there has been an official announcement that classes have been cancelled or delayed.
- SCCP students on both campuses may get severe weather alerts from either university; SCCP students should follow the guidelines of only their specific university campus regarding cancellation or delay of classes.
- The Campus Deans on each campus will determine the specifics of how that campus will follow university guidelines and will inform the Director of Communications. The Director of Communications will be responsible for getting a notice posted on the front page of the SCCP Web site and via other electronic avenues of communication such as Twitter. Students on both campuses will get an email notifying them of how their specific campus is affected.
- The Upstate Regional Director or designee will notify students on the Greenville campus about any changes in class schedules due to inclement weather. Students should check the SCCP website for additional information.
- In the event that the weather emergency affects only one campus, then classes/labs will occur at the unaffected campus, if lectures/labs were scheduled from the unaffected campus on that day. Lectures will be recorded and made available to all SCCP students. The affected campus coordinator will determine lab make-up date(s) and time(s). If an exam was scheduled for the day, then the exam will be delayed on both campuses until another regular class meeting time.
- USC and MUSC University procedures in the event of severe weather do not apply during IPPEs and APPEs. Students are required to contact their preceptor to determine whether travel to rotation is safe and/or the rotation site is open. If inclement weather is predicted, the student should develop a plan with their preceptor in advance. Under no circumstances should the student ASSUME that they are not to report to rotation.

Accreditation Disclosure Statement

South Carolina College of Pharmacy’s Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 20 North Clark Street, Suite 2500, Chicago, IL 60602-5109, 312/664-3575, FAX 312/664-4652, web site www.acpe-accredit.org.

Accreditation Issues

Issues, questions, comments or complaints pertaining to accreditation should be directed to the Associate Dean on the USC Campus and the Assistant Dean for Curriculum on the MUSC Campus. The College will keep a file of all communications related to accreditation. If issues or complaints have not been satisfactorily resolved at the College the Accreditation Council for Pharmacy Education’s (ACPE) may be contacted via email: csinfo@acpe-accredit.org. The Accreditation Council for Pharmacy Education has offices at 20 North Clark Street, Suite 2500, Chicago, Ill. 60602-5109. They may be contacted by phone at 312-664-3575, by fax at 312-664-4652, or via their Web site: www.acpe-accredit.org.

Educational Outcomes for the South Carolina College of Pharmacy – Doctor of Pharmacy Graduate

Domain 1 – Foundational Knowledge

1.1. Learner (Learner) - Develop, integrate, and apply knowledge from the foundational sciences (i.e., pharmaceutical, social/behavioral/administrative,* and clinical sciences) to evaluate the scientific literature, explain drug action, solve therapeutic problems, and advance population health and patient-centered care.

Domain 2 – Essentials for Practice and Care

2.1. Patient-centered care (Caregiver) - Provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities).
2.2. Medication use systems management (Manager) - Manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems.

2.3. Health and wellness (Promoter) - Design prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve health and wellness.

2.4. Population-based care (Provider) - Describe how population-based care influences patient-centered care and influences the development of practice guidelines and evidence-based best practices.

Domain 3 - Approach to Practice and Care

3.1. Problem Solving (Problem Solver) – Identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution.

3.2. Educator (Educator) – Educate all audiences by determining the most effective and enduring ways to impart information and assess understanding.

3.3. Patient Advocacy (Advocate) - Assure that patients’ best interests are represented.

3.4. Interprofessional collaboration (Collaborator) – Actively participate and engage as a healthcare team member by demonstrating mutual respect, understanding, and values to meet patient care needs.

3.5. Cultural sensitivity (Includer) - Recognize social determinants of health to diminish disparities and inequities in access to quality care.

3.6. Communication (Communicator) – Effectively communicate verbally and nonverbally when interacting with an individual, group, or organization.

Domain 4 – Personal and Professional Development

4.1. Self-awareness (Self-aware) – Examine and reflect on personal knowledge, skills, abilities, beliefs, biases, motivation, and emotions that could enhance or limit personal and professional growth.

4.2. Leadership (Leader) - Demonstrate responsibility for creating and achieving shared goals, regardless of position.

4.3. Innovation and Entrepreneurship (Innovator) - Engage in innovative activities by using creative thinking to envision better ways of accomplishing professional goals.

4.4. Professionalism (Professional) - Exhibit behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society.

*Terms that are bolded and italicized are defined in the glossary of the Center for the Advancement of Pharmacy Education (CAPE) Educational Outcomes 2013 at http://www.aacp.org/resources/education/cape/Open%20Access%20Documents/CAPEoutcomes2013.pdf
### South Carolina College of Pharmacy Curriculum - Revised

| Summer P4 (semester 7) | | | | |
| APPE x 1 - 4 | SCCP XXX | 4 – 12 |

| Fall P4 (semester 8) | | | | |
| APPE x 3 - 4 | SCCP XXX | 12 - 16 | Spring P4 (semester 9) | APPE x 3 - 4 | SCCP XXX | 12 - 16 |

| P4 (semester 7, 8 or 9) | | | | |
| Clinical Seminar/Grand Rounds | SCCP 999 | 1 |

| Total Hours (P4 year) | 37 |
| Minimum Total Hours for the Professional Program | 149 | (Minimum Total Hours including PrePharmacy) | 215 |

*Typically, electives range from 1 to 3 credit hours. Students must complete 8 hours of electives by the end of the third year.

For students enrolled prior to the Fall 2013 semester; for students enrolled for Fall 2013 and beyond SCCP 655 has been separated into SCCP 656 and SCCP 657.

- Minimum 300 hours of Introductory Practice Experiential Experience (IPPE) (as required by ACPE) will be satisfied by two 4-credit (four week) rotations in the summers of the P1 and P2 years.
- Minimum 1440 hours of Advanced Practice Experiential Experience (APE) (as required by ACPE) will be satisfied by nine 4-credit (calendar month) rotations in the P4 year. Rotations include: 2 acute/general medicine rotations, 1 ambulatory care rotation, 1 community rotation, 1 hospital/health system rotation, and 4 elective rotations.
- One 1-credit Clinical Seminar/Grand Rounds (SCCP 999) will be required during the P4 year.
- Clinical Applications I-V are rotations designed to bring clinical relevance to basic and applied pharmaceutical science principles in a case-based format.
- Clinical Applications VI is a recitation designed as a “capstone” course, where case studies of complex patients will bring together concepts learned throughout the previous professional years.

<tr>
<td>SCCP 605</td>
<td>Pharmacetics I</td>
<td>A study of the physiochemical principles of the formulation, preparation, properties, and performance of pharmaceutical dosage forms with an emphasis on aqueous and nonaqueous liquids, suspensions, emulsions, and compounding principles. Course Format: 3 credit hours. Lecture format in 75-min sessions. Prerequisite: first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 75-min sessions.</td>
</tr>
<tr>
<td>SCCP 606</td>
<td>Pharmacetics II</td>
<td>A continuation of the study of physiochemical principles in the formulation, preparation, properties, and performance of pharmaceutical dosage forms, with an emphasis on solid, unit oral dosage forms; sustained and controlled delivery; and rectal, parenteral, and biological delivery systems. Course Format: 3 credit hours. Lecture format in 75-min sessions. Prerequisites: SCCP 605; first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 75-min sessions.</td>
</tr>
<tr>
<td>SCCP 607</td>
<td>Dosage Forms and Drug Delivery Systems</td>
<td>A study of the physiochemical principles of the formulation, preparation, properties, and performance of the pharmaceutical dosage forms including: aqueous and nonaqueous liquids, suspensions, emulsions, solid unit oral dosage forms, sustained and controlled delivery preparations as well as rectal, parenteral, and biological delivery systems. Clinical application of the various dosage forms in patient care will be discussed. Course Format: 4 credit hours. Lecture format in 50-minute sessions. Prerequisite: first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 50-minute sessions.</td>
</tr>
<tr>
<td>SCCP 610</td>
<td>Microbiology/Immunology</td>
<td>Introduction to pathogenic organisms and the role of immunology in human disease. Course Format: 4 credit hours. Lecture format in 50-minute sessions. Prerequisite: first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 50-minute sessions.</td>
</tr>
<tr>
<td>SCCP 615</td>
<td>Pharmaceutical Biochemistry</td>
<td>The course covers the molecular and biochemical basis of human biology and physiology. The properties and functions of biological molecules and biochemical pathways are covered. Emphasis is placed on the molecular basis of human physiology, causes of human diseases, and how drugs produce biological effects. The course objectives directly relate to guidelines from the South Carolina College of Pharmacy and the American Council on Pharmaceutical Education covering the topics of biochemistry, molecular biology, biotechnology and genetics. Course Format: 3 credit hours. Lecture format in 50-minute sessions. Prerequisite: first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 50-minute sessions.</td>
</tr>
<tr>
<td>SCCP 616</td>
<td>Pharmaceutical Biotechnology</td>
<td>The course focuses on nucleic acids (DNA/RNA) as the core theme. This includes the eukaryotic cell cycle, meiosis, replication, transcription, translation, and repair. Recombinant DNA technology is covered as applied to the study of human health and production of biopharmaceuticals. Antibodies are covered from the perspective of their use in diagnostic tests, as well as the utilization of antibodies as therapeutics. The concepts and applications of gene therapy and RNA silencing are also taught. The course objectives directly relate to guidelines from the South Carolina College of Pharmacy and the American Council on Pharmaceutical Education covering the topics of biochemistry, molecular biology, biotechnology and genetics. Course Format: 2 credit hours. Lecture format in 50-minute sessions. Prerequisites: first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 50-minute sessions.</td>
</tr>
<tr>
<td>SCCP 620</td>
<td>Introduction to Pharmacology and Medicinal Chemistry</td>
<td>An introduction to the basic principles and concepts of medicinal chemistry and pharmacology including the relationship of molecular structure to drug absorption, distribution, metabolism, excretion, and receptor interactions; receptor organization and function, signal transduction, drug response variables, drug evaluation, and drug discovery. Course Format: 3 credit hours. Lecture format in 50-minute sessions. Prerequisite: first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 50-minute sessions.</td>
</tr>
<tr>
<td>SCCP 621</td>
<td>Pharmaceutical Chemistry and Pharmacogenomics I</td>
<td>The first section of this course includes an introduction to the basic principles and concepts of pharmaceutical chemistry and pharmacogenomics including the relationships of molecular structure to drug absorption, distribution, metabolism and excretion. The second section of this course discusses the molecular basis for pharmacotherapeutics with emphasis on drugs acting on the autonomic nervous system. The chemical rationale for drug therapeutic actions and side effects as well as the pharmacogenomics basis for individualized drug therapy is discussed. Course Format: 3 credit hours. Lecture format in 50-minute sessions. Prerequisite: first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 50-minute sessions.</td>
</tr>
<tr>
<td>SCCP 622</td>
<td>Pharmaceutical Chemistry and Pharmacogenomics II</td>
<td>This is the second of the two course series addressing the pharmaceutical chemistry and pharmacogenomics of drugs. Emphasis is placed on the molecular basis of pharmacotherapeutic actions. The following classes of agents will be covered: CNS drugs; opioid and other analgesics; gastrointestinal agents; drugs used in the treatment of cardiovascular and endocrine disorders; dermatologic products; anti-cancer and anti-microbial agents. The chemical mechanisms of drug therapeutic actions and side effects as well as the pharmacogenomic basis of individualized drug therapy are discussed. Course Format: 4 credit hours. Lecture format in 50-minute sessions. Prerequisites: SCCP 621; first professional year standing.</td>
<td>First professional year standing.</td>
<td>Lecture format in 50-minute sessions.</td>
</tr>
<tr>

</thead>
<tbody>
<tr>
<td>SCCP 656:</td>
<td>Pharmacy Calculations</td>
<td>This course develops the mathematic skills and knowledge required in various pharmacy practice settings. Students will be introduced to the Apothecary and Avoirdupois systems of measurement and will perform interconversions between these measurement systems and the metric system. Problem solving skills will be developed as students become proficient in basic math skills used to solve pharmacy calculations based word problems which are commonly seen in a variety of practice settings, including community, compounding, hospital, and nuclear pharmacy. Course Format: 1 credit hour. Lecture and recitation format in a two-hour session. Prerequisite: first professional year standing.</td>
</tr>
<tr>
<td>SCCP 657:</td>
<td>Medical Terminology</td>
<td>A thorough knowledge of medical terminology is an essential building block in pharmacy education. This web-based course will aid the student in learning the language and terminology used in other pharmacy courses and all areas of pharmacy practice. Course Format: 1 credit hour. Self-study requirement. Prerequisite: first professional year standing.</td>
</tr>
<tr>
<td>SCCP 660:</td>
<td>Clinical Applications I</td>
<td>Case-based discussions that integrate and demonstrate applicability of other course material. Course Format: 1 credit hour. Recitation format in two-hour session. Prerequisite: first professional year standing.</td>
</tr>
<tr>
<td>SCCP 661:</td>
<td>Clinical Applications II</td>
<td>Case-based discussions that integrate and demonstrate applicability of other course material. Course Format: 1 credit hour. Recitation format in two-hour session. Prerequisite: first professional year standing.</td>
</tr>
<tr>
<td>SCCP 670:</td>
<td>Pharmacy Skill Lab II: Introduction to Community Pharmacy</td>
<td>Interactive laboratory session designed to provide students with a thorough understanding of community pharmacy practice skills, to include the knowledge of prescription and drug order processing necessary to function in community pharmacy practice at a basic level. Course Format: 1 credit hour. Laboratory format in three-hour session. Prerequisite: first professional year standing.</td>
</tr>
<tr>
<td>SCCP 671:</td>
<td>Pharmacy Skills Lab I: Compounding and Applied Pharmaceutics</td>
<td>The art, science, and technology of pharmacy compounding. Course Format: 1 credit hour. Laboratory format in three-hour session. Prerequisite: first professional year standing.</td>
</tr>
<tr>
<td>SCCP 680:</td>
<td>Introduction to Drug Information</td>
<td>Basic principles of access and utilization of drug information resources. Course Format: 1 credit hour. Lecture format in 50-minute session. Prerequisite: first professional year standing.</td>
</tr>
<tr>
<td>SCCP 690 (IP 710): Transforming Healthcare</td>
<td>The course goal is to lay the foundations for beginning (first year) professions students to understand the complexities of the health care system and the role of interprofessional collaboration to improve the system. Through an interprofessional context, students will explore the art and science of teamwork and communication skills, cultural competency, ethical issues, healthcare disparities and social determinants of health. This course addresses the university's Quality Enhancement Plan (QEP) goals #2 (e.g., students learn more about the other professions) and #3 (e.g., students apply interprofessional teamwork competencies in a learning setting) and will provide a mechanism to evaluate student learning outcomes associated with each goal. Course Format: 2 credit hours. Taught separately at each campus using a variety of teaching mechanisms. Pass/Fail. Prerequisite: first professional year standing.</td>
<td></td>
</tr>
<tr>
<td>SCCP 699:</td>
<td>Introductory Pharmacy Practice Experience - Community</td>
<td>Practice experience of 4 weeks, 40 hours per week. Course Format: 1 credit hour. Lecture format in 50-minute session. Prerequisite: first professional year standing.</td>
</tr>
<tr>
<td>SCCP 700:</td>
<td>Biopharmaceutics and Pharmacokinetics</td>
<td>Study of the pharmacokinetics of drug absorption, distribution, and elimination (metabolism and excretion). Introductory application of pharmacokinetics to drug interactions and dosage regimen design and adjustment, selected disease states, and special populations. Course Format: 3 credit hours. Lecture format in three 50-minute sessions. Prerequisites: SCCP 606; second professional year standing.</td>
</tr>
<tr>
<td>SCCP 710:</td>
<td>Pharmacology III</td>
<td>The first course in a series that applies pathophysiology and pharmacology principles introduced in the foundations courses in the first year in an organ-based approach. The focus of the course is the autonomic nervous system, fluids and electrolytes, the renal system/analyses, infectious disease, and non-infectious respiratory disease. The course is designed to integrate organ system pathophysiology and pharmacology with pharmacotherapy. Course Format: 3 credit hours. Lecture format in 45-minute sessions. Prerequisite: SCCP 720; second professional year standing.</td>
</tr>
<tr>
<td>SCCP 720:</td>
<td>Pharmacology II</td>
<td>The second course in a series that applies pathophysiology and pharmacology concepts introduced in the foundations courses in the first year in an organ-based approach. The focus of the course is the cardiovascular and the endocrine systems. The course is designed to integrate organ system pathophysiology and pharmacology with pharmacotherapy. Course Format: 3 credit hours. Lecture format in 45-minute sessions. Prerequisites: SCCP 722; second professional year standing.</td>
</tr>
<tr>
<td>SCCP 725:</td>
<td>Medicinal Chemistry II</td>
<td>The first course in a two-semester sequence describing the molecular basis for pharmacotherapy; a complementary course to Pharmacology II, including autonomic nervous system, cardiovascular and CNS agents with emphasis on the chemical rationale for drug therapeutic actions and side effects with the pharmacogenomic basis for individualized drug therapy. Course Format: 3 credit hours. Lecture format in 50-minute sessions. Prerequisites: SCCP 620; second professional year standing.</td>
</tr>
<tr>
<td>SCCP 760:</td>

<tr>
<td>SCCP 770</td>
<td>Pharmacotherapy I (no longer available after 2011-2012)</td>
<td>Builds upon the prerequisites of the basic sciences, particularly anatomy, physiology, pathophysiology, pharmacology, microbiology, medical terminology, and pharmacokinetics. Provides an organ-based approach to pharmaceutical care and disease management. Second professional year students will learn about disease prevention and health promotion, as well as the drug and non-drug therapy of acute and chronic diseases seen in both hospitalized and ambulatory patients. Emphasis is placed on solving patient problems. Pharmacotherapy I covers the following areas: fluid and electrolyte management, nutrition and cardiology. Course Format: 4 credit hours. Lecture format in 50-minute sessions. Prerequisite: second professional year standing.</td>
</tr>
<tr>
<td>SCCP 771</td>
<td>Pharmacy Skills Lab V: Applied Community Pharmacy</td>
<td>Provide students with an advanced knowledge of prescription and drug order processing, and assist them in the development of appropriate skills necessary for provision of pharmaceutical care to patients in the community setting, through the use of medication profiles, patient counseling, personal interviews, and appropriate prescription and non-prescription drug information. Course Format: 1 credit hour. Laboratory format in 3-hour session. Prerequisites: SCCP 670; third professional year standing.</td>
</tr>
<tr>
<td>SCCP 772</td>
<td>Pharmacotherapy I</td>
<td>This course is the first in a 4-semester sequence of courses providing an organ-based approach to pharmaceutical care and disease management. Students will learn about disease prevention and health promotion, as well as the drug and non-drug therapy of acute and chronic diseases seen in both hospitalized and ambulatory patients. Emphasis is placed on solving patient problems. Pharmacotherapy I covers the following areas: fluid and electrolyte management, nutrition and cardiology. This course is coordinated with Pathophysiology and Pharmacology I. Course Format: 4 credit hours. Lecture format in 45-minute sessions. Prerequisite: second professional year standing.</td>
</tr>
<tr>
<td>SCCP 773</td>
<td>Pharmacotherapy II</td>
<td>This course builds upon coursework in the basic sciences; particularly anatomy, physiology, pathophysiology, pharmacology, microbiology, medical terminology, and pharmacokinetics as well as Pharmacotherapy I. Knowledge will be integrated, utilized and applied in a parallel sequence of courses in Pharmacotherapy using an organ-system based approach emphasizing pharmaceutical care and disease management. Students will learn about disease prevention and health promotion, as well as the drug and non-drug therapy of acute and chronic diseases seen in both hospitalized and ambulatory patients. Emphasis is placed on solving patient problems. Pharmacotherapy II covers the following areas: cardiovascular, and the endocrine systems. This course is coordinated with Pathophysiology and Pharmacology II. Course Format: 4 credit hours. Lecture format in 45-minute sessions. Prerequisites: SCCP 772; second professional year standing.</td>
</tr>
<tr>
<td>SCCP 774</td>
<td>Outcomes Design and Assessment</td>
<td>Common statistical methods and study designs used in pharmacoepidemiology and outcomes research, as well as to issues related to the measurement, analysis, and interpretation of results of clinical trials and outcomes studies. Course Format: 3 credit hours. Lecture format in 50-minute session. Prerequisite: second professional year standing.</td>
</tr>
<tr>
<td>SCCP 790</td>
<td>Pharmacy Skills Lab III: Introduction to Health-Systems Pharmacy</td>
<td>Exposes students to the practice of pharmacy while also illustrating how theoretical concepts from the basic pharmaceutical sciences relate to daily pharmacy practice, especially in institutional settings. This lab focuses on understanding of medical chart evaluation with emphasis on drug therapy monitoring and developing skills in different aspects of hospital pharmacy (sterile product preparation, unit dose, prepackaging and compounding, order entry, and cart-fill). Course Format: 1 credit hour. Laboratory format in 3-hour session. Prerequisite: second professional year standing.</td>
</tr>
<tr>
<td>SCCP 791</td>
<td>Pharmacy Skills Lab IV: Applied Health-Systems Pharmacy</td>
<td>Exposes students to the practice of pharmacy while also illustrating how theoretical concepts from the basic pharmaceutical sciences relate to daily pharmacy practice, especially in the institutional setting. This lab focuses on the understanding of clinical nutrition support, chemotherapy, anesthesia, pain management, controlled substances, and crash carts, as well as interpretation and preparation of such medical orders. Students must successfully complete media fill IV preparation. Course Format: 1 credit hour. Laboratory format in 3-hour session. Prerequisites: SCCP 790; second professional year standing.</td>
</tr>
<tr>
<td>SCCP 798</td>
<td>Introductory Pharmacy Practice Experience - Hospital</td>
<td>Forty hours of directed experience per week for four weeks. Course Format: 4 credit hours. Practice experience of 4 weeks. 40 hours per week. Pass/Fail. Prerequisite: second professional year standing.</td>
</tr>
<tr>
<td>SCCP 822</td>
<td>Pathophysiology &amp; Pharmacology III</td>
<td>This is the third in a 4-semester sequence of courses aimed at integrating the discussion of specific disease states and the mechanism of action of the pharmacologic agents used to treat those disease states. This knowledge will be integrated, utilized and applied in a parallel sequence of courses in Pharmacotherapy using an organ-system based approach emphasizing pharmaceutical care and disease management. Course Format: 3 credit hours. Lecture format in 45-minute sessions. Prerequisites: SCCP 722/723; third year professional standing.</td>
</tr>
<tr>
<td>SCCP 823</td>
<td>Pathophysiology &amp; Pharmacology IV</td>
<td>This is the fourth in a 4-semester sequence of courses aimed at integrating the discussion of specific disease states and the mechanism of action of the pharmacologic agents used to treat those disease states. This knowledge will be integrated, utilized and applied in a parallel sequence of courses in Pharmacotherapy using an organ-system based approach emphasizing pharmaceutical care and disease management. Course Format: 2 credit hours. Lecture format in 45-minute sessions. Prerequisites: SCCP 822; third year professional standing.</td>
</tr>
<tr>
<td>SCCP 850</td>
<td>Health Care Systems and Management</td>
<td>This course provides insight and understanding of the U.S. health care system and pharmacy’s role within that system. Managerial skills and concepts are taught to allow pharmacists to maximize their contribution to this health care system and to the patients it serves. Course Format: 4 credit hours. Lecture format in 50-minute sessions. Prerequisite: third professional year standing.</td>
</tr>
<tr>
<td>SCCP 860</td>
<td>Clinical Applications V</td>
<td>Case-based discussions that integrate and demonstrate applicability of other course material in patient care. Course Format: 1 credit hour. Recitation format in 2-hour session. Prerequisite: third professional year standing.</td>
</tr>
<tr>
<td>SCCP 861</td>
<td>Clinical Applications VI</td>
<td>A capstone course, where case studies of complex patients will bring together concepts learned throughout the previous semesters in the professional program. Course Format: 1 credit hour. Recitation format in 2-hour session. Prerequisite: third professional year standing.</td>
</tr>
<tr>
<td>SCCP 870</td>
<td>Pharmacotherapy II (no longer available after 2012-2013)</td>
<td>Builds upon the prerequisites of the basic sciences, particularly anatomy, physiology, pathophysiology, pharmacology, microbiology, medical terminology, and pharmacokinetics, as well as Pharmacotherapy I. Provides an organ-based approach to pharmaceutical care and disease management. Third professional year students will learn about disease prevention and health promotion, as well as the drug and non-drug therapy of acute and chronic diseases seen in both hospitalized and ambulatory patients. Emphasis is placed on solving patient problems. Pharmacotherapy II covers the following areas: infectious disease, women’s health, pulmonary diseases, endocrinology, and rheumatic disorders. Course Format: 5 credit hours. Lecture format in 50-minute sessions. Prerequisite: third professional year standing. Distance Education. Spring semester.</td>

### SCCP 967 Acute/General Medicine Pharmacy Practice Experience V
This advanced pharmacy practice experience (APPE) provides additional clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop and implement a monitoring plan, (2) how to take a medication history, (3) how to respond to a drug information request, and (6) review the policies and procedures at the institution. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 968 Acute/General Medicine Pharmacy Practice Experience IV
This advanced pharmacy practice experience (APPE) provides additional clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop and implement a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 969 Acute/General Medicine Pharmacy Practice Experience VII
This advanced pharmacy practice experience (APPE) provides additional clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 970: Ambulatory Care Pharmacy Practice Experience I
This required advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 971: Ambulatory Care Pharmacy Practice Experience II
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 972: Ambulatory Care Pharmacy Practice Experience III
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 973: Ambulatory Care Pharmacy Practice Experience IV
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 974: Ambulatory Care Pharmacy Practice Experience V
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 975: Ambulatory Care Pharmacy Practice Experience VI
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 976 Community Pharmacy Practice I
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in community pharmacy. This APPE provides pharmacy experience in a variety of community settings including chains, clinic, compounding and independent. The emphasis is placed on patient counseling, immunizations, medication therapy management, and/or compounding. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 977 Community Pharmacy Practice II
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in community pharmacy. This APPE provides additional pharmacy experience in a variety of community settings including chains, clinic, compounding and independent. The emphasis is placed on patient counseling, immunizations, medication therapy management, and/or compounding. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

### SCCP 978 Community Pharmacy Practice III
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in community pharmacy. This APPE provides additional pharmacy experience in a variety of community settings including chains, clinic, compounding and independent. The emphasis is placed on patient counseling, immunizations, medication therapy management, and/or compounding. Course Format: 4 credit hours; one month of supervised advanced pharmacy practice for at least 40 hours per week. Prerequisite: fourth professional year standing.

<td>SCCP 766</td>
<td>Alternative Medicine</td>
<td>This course is designed to expose the student to a wide variety of herbal medicines and dietary supplements. Discussions will also include regulation of herbal supplements, evaluation of the alternative medicine literature, and disease-directed discussions with case studies. Course Format: 2 credit hours. Online format. Prerequisite: second or third professional year standing. Offered only on USC Campus. Fall semester.</td>
</tr>
<tr>
<td>SCCP 768</td>
<td>Geriatric and Long Term Care Pharmacy Practice</td>
<td>The course will introduce students to various topics related to the care of older patients in the community, hospital, and/or long term care settings. Course content will complement the curriculum with regard to geriatric pathophysiology, pharmacology, and pharmacotherapeutics. It will expand upon the practice of long-term care consulting. In addition to class discussions and lectures, students will participate in a consultant pharmacist shadowing experience, develop a presentation related to medication safety in older patients, and complete a project related to healthy aging. Course Format: 2 credit hours. Lecture format. Prerequisite: second or third professional year standing. Spring semester. Offered only on MUSC Campus.</td>
</tr>
<tr>
<td>SCCP 774</td>
<td>Pharmacy Political Advocacy</td>
<td>This course is focused on enabling students to become advocates for the pharmacy profession through review of current legislation that affects pharmacists and healthcare, as well as determining the impact of legislation on the profession. Students will learn how to affect legislation through contact with their representatives and through collaboration with pharmacy organizations. Concepts for providing to their representatives a concise review of the effect of legislation will also be reviewed. Course Format: 2 credit hours. Lecture format. Prerequisite: second or third professional year standing. Offered only on USC campus. Spring semester.</td>
</tr>
<tr>
<td>SCCP 776</td>
<td>Developing a Medication Therapy Management Service</td>
<td>This course will prepare students to develop and implement a pharmaceutical care service into a community pharmacy setting. The focus will be on designing a Medication Therapy Management service; however other clinical pharmacy services will be discussed. Students will apply basic principles of small business administration and development to the creation of a pharmacy service. Students will participate in interactive lectures, written assignments, and format presentations. Course Format: 2 credit hours. Lecture format. Prerequisite: second or third professional year standing. Distance Education. Fall semester.</td>
</tr>
<tr>
<td>SCCP 777</td>
<td>Nuclear Pharmacy I (not currently available)</td>
<td>This course introduces students to the basic operation of a nuclear pharmacy. Instruction begins with a broad overview of nuclear pharmacy with emphasis on challenges and opportunities currently available in the industry. The student will be given a tour of a licensed nuclear pharmacy to assist in establishing a visual relationship to many of the topics that will be discussed this course as well as subsequent courses. Upon establishment of this skeleton framework, the course then shifts to introduce the student to basic radiation physics, decay calculations used in nuclear medicine, the chemistry of various radionuclides and radioisotopes, and basic radiation biology. Limited half-life and pertinent information that relates to key isotopes commonly used in nuclear pharmacy will be given to the student in chart format to be committed to memory. Radiation safety techniques are also heavily emphasized during this course. Course Format: 3 credit hours. Lecture format and nuclear pharmacy visitation. Prerequisite: second or third professional year standing. Distance Education. Fall semester.</td>
</tr>
<tr>
<td>SCCP 778</td>
<td>Nuclear Pharmacy II (not currently available)</td>
<td>This course builds on the framework that was introduced in SCCP 777. The course begins with a brief review of the key elements from prior coursework with immediate emphasis on material that should be committed to memory. The course introduces the student to the procedures necessary to produce and dispense quality radiopharmaceuticals. The course then shifts to the specific use of various radiopharmaceuticals in the nuclear pharmacy. Imaging modalities being discussed during this course includes: brain, thyroid, lung, liver, spleen, gastrointestinal, kidney, and bone. Other procedures are also discussed in this course. When possible, experts in the various fields will be used to provide in depth instruction for each topic. Course Format: 3 credit hours. Lecture format and nuclear pharmacy visitation. Prerequisite: SCCP 777; second or third professional year standing. Distance Education. Spring semester.</td>
</tr>
<tr>
<td>SCCP 779</td>
<td>Advanced Self-Care</td>
<td>This elective focuses on developing critical thinking, problem solving, and communication skills by incorporating principles of self-management covered in Self-care and Complementary Medicines (SCCP 750) into evidence-based case discussions and presentations. Course Format: 2 credit hours. Lecture format: one two hour period. Prerequisite: second or third professional standing. Distance Education. Spring semester.</td>
</tr>
<tr>
<td>SCCP 781</td>
<td>Diabetes in the Community</td>
<td>This course provides students with an opportunity to learn more about diabetes mellitus in the community through a hands-on experience. Students will engage in interactive lecture and activity learning exercises. The course will utilize experts in the field of diabetes to discuss topics set forth by the course coordinator. Students will give reflective presentations and complete a final examination at the conclusion of the semester. Course Format: 2 credit hours. Lecture format: one two hour period. Prerequisite: second or third professional year standing. Distance Education. Fall semester.</td>
</tr>
<tr>
<td>SCCP 782</td>
<td>Health Care System Improvement</td>
<td>This course provides the foundation for beginning health care professionals to understand the complexities of the health care system and the role of interprofessional collaboration to improve the system. Through an interprofessional context, students will explore the art and science of teamwork and communication skills, cultural competency, ethical issues, healthcare disparities, social determinants of health, and evidence-based medicine. Course Format: 2 credit hours. Lecture format: On-line modules, small group discussion. Prerequisite: second or third professional year standing. On-line. Spring semester.</td>
</tr>
<tr>
<td>SCCP 783</td>
<td>Essentials Of Cultural Competence In Pharmacy Practice</td>
<td>This course will introduce students to the ethical and professional ideas behind the incorporation of cultural competence in the practice of pharmacy. It will also...</td>
</tr>

<tr>
<td>SCCP 784</td>
<td>Post-graduate and Research Training</td>
<td>This course is designed to prepare students for and promote post-graduate training, with an emphasis on residency training, but also including PhD and fellowship training. All elements of preparation for post-graduate training will be covered; the class will provide information related to various types of research, discuss the ethical considerations related to research and provide the opportunity to develop and present a research protocol. Course Format: 2 credit hours. Lecture format, discussion. Prerequisite: second or third professional year standing. Distance Education. Spring semester.</td>
</tr>
<tr>
<td>SCCP 786</td>
<td>Pediatric Pharmacotherapy</td>
<td>This challenging course is designed to provide the student with increased exposure to disease states, medication issues, and clinical decision-making skills specific to the pediatric population. Pediatrics is an integral component to most pharmacy careers, and gaining a greater understanding of the patient population’s challenges and nuances is necessary to become a confident and well-rounded practitioner. This elective also seeks to provide exposure to the pediatric pharmacy community, including experts in the subspecialty areas and organizations. Course Format: 2 credit hours. Lecture format in 50-minute sessions. Prerequisite: second professional year standing. Distance Education. Fall semester.</td>
</tr>
<tr>
<td>SCCP 787</td>
<td>Clinical Veterinary Pharmacy</td>
<td>This elective is a unique class that will cover anatomy, physiology, and pharmacotherapy in approximately eight animal species. There will be an emphasis on various areas of veterinary pharmacy including drug information, laws and ethics of veterinary pharmacy, various disease states and proper treatment, toxicology and parasitology, and case-based medication dosing regimens. There will also be a lab component to allow students to have hands on prescription reviews and dispensing patient-appropriate therapies, creating patient specific dosage forms, and counseling on proper medication administration. Course Format: 2 credit hours. Lecture and lab. Prerequisite: second professional year standing. MUSC campus. Fall and Spring semester.</td>
</tr>
<tr>
<td>SCCP 788</td>
<td>Interscholastic Prevention of Childhood Obesity</td>
<td>This course introduces health professions students to concepts in community and public health focusing on childhood obesity. The course is in collaboration with the Junior Doctors of Health (JDOH) program. JDOH is an interprofessional service-learning program that works with children in low-income schools with the aim of long term prevention of childhood obesity. During the course, students will lead education and interactive sessions that are part of the JDOH curriculum to promote healthy diet and physical activity behaviors. Students from public health, social work, and pharmacy will participate in didactic class sessions together then will provide education regarding the prevention of childhood obesity as interprofessional teams to elementary students in local schools. Teams will then develop presentations regarding their experiences to present during the final class session. Course Format: 2 credit hours. Lecture format. Prerequisite: second or third professional year standing. Passing/Fail. USC campus. Fall semester.</td>
</tr>
<tr>
<td>SCCP 792</td>
<td>Advanced Topics in Pharmacy Compounding I</td>
<td>This course will build upon the knowledge acquired in the first professional year courses Dosage Forms/Drug Delivery Systems and Compounding/Applied Pharmacuetics lab. The course will provide emphasis on practical application in the evaluation of unique dosage forms, pharmacotherapy, and special pharmaceutical needs of various patient populations. This course is self-paced and delivered in an online format utilizing prerecorded lectures. Course Format: 1 credit hour. Pass/Fail. Prerequisite: second professional year standing. Available at all campuses. Fall semester.</td>
</tr>
<tr>
<td>SCCP 793</td>
<td>Advanced Topics in Pharmacy Compounding II</td>
<td>This course is an elective course that provides additional insight and understanding into a variety of pharmacy compounding topics, which include nutrient depletion, drug-induced nutrient depletion, metabolic demands of athletes, men’s health, and family medicine. This course is self-paced and delivered in an online format utilizing prerecorded lectures. Course Format: 1 credit hour. Self-paced, online format. Pass/Fail. Prerequisite: second professional year standing. Available at all campuses. Spring Semester.</td>
</tr>
<tr>
<td>SCCP 794</td>
<td>Pharmacist Entrepreneurship</td>
<td>This course provides an entrepreneurship overview, including, but not limited to 1) the characteristics, behaviors, and attitudes of successful entrepreneurs, 2) current topics in entrepreneurship, e.g., the lean startup methodology, 3) examination of how to create an entrepreneurial mindset, 4) entrepreneurship as it applies to pharmacy practice, 5) examination of patient care initiatives, 4) development of a business plan, and creation of a business proposition. Course Format: 3 credit hours. Prerequisites: second professional year standing; recommended that student has completed an accounting course. USC Campus. Fall semester.</td>
</tr>
<tr>
<td>SCCP 801</td>
<td>Clinical Toxicology</td>
<td>This clinical toxicology course will discuss target organ toxicity, focusing on each major organ system, key compounds which affect these systems, the mechanisms by which these compounds act, and treatments. Urban legends and common misconceptions about toxins and toxicants are discussed. Course Format: 2 credit hours. Lecture format: one two hour period. Prerequisite: second or third professional year standing. MUSC campus. Spring semester.</td>
</tr>
<tr>
<td>SCCP 851</td>
<td>Acute Care Therapeutics</td>
<td>A disease-oriented and organ-integrated approach to the care of patients with acute illnesses managed in the in-patient hospital setting. Students will learn common disease processes that affect the acutely ill hospitalized patient and the appropriate pharmacotherapy to treat these patients. This course focuses on developing critical thinking and problem solving skills, and integrating material from this course and previous courses in a case-based format. Course Format: 2 credit hours (USC &amp; GHS Campuses); 3 credit hours (MUSC Campus). Lecture format. Prerequisite: third professional year standing. Offered live on USC, MUSC, and GHS Campus. Spring semester.</td>
</tr>
<tr>
<td>SCCP 856</td>
<td>Evidence Based Medicine</td>
<td>This course is designed to instruct students on the proper approach to critical evaluation of the medical literature. An evidence based approach to patient care hinges on the medical team’s ability to utilize the most current literature available. Students will learn the keys to critiquing the medical literature, including basic statistical and analytical concepts, in an open forum style, with application of literature information to clinical scenarios. Course Format: 2 credit hours. Lecture format. Prerequisite: second or third professional year standing. USC campus. Spring semester.</td>
</tr>
<tr>
<td>SCCP 857</td>
<td>Community Pharmacy Practice and Operations</td>
<td>This course is intended to provide a practical look at independent community pharmacy. The goal of the course is to expose students to the many aspects involved in starting, owning and running a business. Each session will focus on a unique aspect of independent pharmacy ownership or pharmacist driven business, along with management skills required to effectively operate the business. Students will learn to critically appraise and discuss independent store ownership/management or pharmacy related business through lectures, readings, discussions and projects. Course Format: 2 credit hours. Lecture format. Prerequisite: third professional year standing. Partial Distance Education. Spring semester.</td>
</tr>
<tr>
<td>SCCP 858</td>
<td>Drug Interactions</td>
<td>This course is designed to prepare students to appropriately recognize, predict, assess, and manage drug interactions that are encountered in pharmacy practice. Course Format: 2 credit hours. Lecture format. Prerequisite: third professional year standing. Distance Education. Spring semester.</td>
</tr>
</tbody>
</table>
SCCP 859: Design and Conduct of Clinical Research Studies
This course is designed to provide students with exposure to clinical research. The demand for pharmacist researchers in a variety of settings continues to increase, and clinical pharmacists are often called upon to engage in some research activities. Residency training provides practical application of research; however, most residents lack an in-depth exposure to the varied aspects of research prior to graduation. This class will provide students with information related to various types of research, discuss the ethical considerations related to clinical research, and provide students with the opportunity to develop and present a clinical research protocol. This course will help prepare students for post-graduate (residency, fellowship, or PhD) research endeavors. Course Format: 2 credit hours. Lecture format. Prerequisite: third professional year standing. USC campus. Fall semester.

SCCP 862: CARES Service Learning
Interprofessional service learning elective involving medical, pharmacy, and other health care professional students. Students will volunteer at the free CARES medical clinic and participate in an elective lecture on Wednesday evenings from 6-7pm. Course Format: 1 credit hour. Combination of lecture format and clinic activity. Prerequisite: third professional year standing. MUSC campus. Fall and Spring semester.

SCCP 863: Medication Safety Management
This course is designed to teach students proper medication safety practices. As medications are prescribed, prepared, dispensed, and administered safely and appropriately, patients’ lives are ultimately improved. However, health care providers are human and thereby fallible by nature. Knowledge of ways in which medication errors commonly occur and the common mistakes in place to prevent such errors is important to the practice of pharmacy. This course will allow students to learn the history of medication safety, institutional policies, and technological advances in medication safety. Course Format: 2 credit hours. Lecture format. Prerequisite: third professional year standing. USC campus. Fall semester.

SCCP 877: Nuclear Pharmacy III (not currently available)
This course continues to build on the framework that has been established in SCCP 777 and SCCP 778. The course begins with an overview of cardiology and continues into a detailed review of nuclear cardiac imaging. Currently available therapeutic agents will then be examined for their current role in nuclear pharmacy. The course then shifts to examine the regulatory aspects that govern the profession. The student will become extensively familiar with the various regulations and regulatory actors of nuclear pharmacy. Course Format: 3 credit hours. Lecture format and nuclear pharmacy visitation. Prerequisites: SCCP 777 and SCCP 778; third professional year standing. Distance Education. Fall semester.

SCCP 878: Nuclear Pharmacy IV (not currently available)
This course continues to build on the framework that has been established in SCCP 777, SCCP 778, and SCCP 877. The course begins with instruction on P.E.T. procedures (Positron Emission Tomography). F-18 FDG is studied in detail for its role in nuclear medicine. Quality Control procedures and standards for P.E.T. are addressed. Pipeline and research drugs are also discussed with a special highlight on the future of nuclear pharmacy. This course is concluded with a broad review of nuclear pharmacy. Nuclear pharmacy career opportunities are discussed in this course. Course Format: 4 credit hours. Lecture format and nuclear pharmacy visitation. Prerequisites: SCCP 777, 778, and 877; third professional year standing. Distance Education. Spring semester.

SCCP 879: Patient-Centered Approach to Medication Therapy Management
This elective prepares students to care for patients participating in medication therapy management. The focus will be on communicating with a patient during a MTM session to identify the patient’s current medication therapy problems and prevent future medication therapy problems. Students will apply therapeutic principles learned in the curriculum to improve the patient’s overall care, as related to the patient’s medication therapies. Course Format: 2 credit hours. Lecture format: one two-hour period. Prerequisite: third professional year standing. Distance education. Spring semester.

SCCP 881: Senior Care Pharmacy Practice
This course will introduce students to various topics related to the care of older patients in any setting. Course content will complement the SCCP curriculum in regards to geriatric pharmacotherapy, geriatric pathophysiology, pharmacology, socioeconomics, regulations, and pharmacotherapeutics. In addition, it will expand upon the various practices of senior care pharmacy. Practicing consultants and other topic experts will serve as lecturers. In addition to class discussions and lectures, students will participate in a consultant pharmacist shadowing experience and will conduct an interview with a senior patient. Course Format: 2 credit hours. Lecture format, discussion. Prerequisite: third professional year standing. Distance education. Spring semester.

SCCP 882: Infectious Diseases Pharmacotherapy
This course is an integrated approach to infectious diseases pharmacotherapy that builds upon required SCCP courses. At the conclusion of the course, the student will have a working knowledge of infectious diseases pharmacotherapy and be able to develop a complete patient care plan given an infectious diagnosis. Additionally, the course will stress important drug interactions with antimicrobials, adverse events associated with antimicrobials, and the prominent role of pharmacists in a HIV clinic, antimicrobial stewardship program, and/or medical crisis. Course Format: 2 credit hours. Lecture format, discussion. Prerequisite: second or third professional year standing. USC Campus. Spring semester.

SCCP 883: Practical Applications in Patient Counseling
This course will build upon the principles of pathophysiology, medication administration, and patient counseling (SCCP 600, SCCP 605, SCCP 650, SCCP 660) to include developing advanced skills in patient assessment (SOAP notes), counseling and medication reconciliation, including the role of the pharmacist in discussing patient issues including access to medications, adherence, assessing understanding to improve compliance, and sensitive patient issues (i.e. sexual side effects). Course Format: 3 credit hours. Lecture format in 50-minute sessions. Prerequisite: third professional year standing. MUSC campus. Fall semester.

SCCP 884: Delivering Medication Therapy Management Services
This course will utilize the “Delivering MTM Services in the Community” certificate training program developed by APhA and ASCP to provide students the essential skills necessary to become a successful MTM practitioner. Students will learn how to evaluate complicated medication regimens, identify medication-related problems, and make recommendations. Aspects of business development and management will also be discussed. Students will participate in interactive lectures, reading and writing assignments, critical thinking exercises, and patient counseling sessions. Course Format: 2 credit hours. Lecture format. Prerequisite: third professional year standing. Distance Education. Fall semester.

SCCP 886: Pharmacotherapy Cases
This course is designed to provide the student with the opportunity to gather, analyze, and synthesize medical information from complex patient cases into complete pharmacotherapeutic treatment plans designed to improve patient outcomes. This process will enhance the student’s ability to be an independent and active learner, foster the student’s individual and group problem solving abilities, promote the critical examination of medical problems, and develop student’s clinical skills and decision-making abilities. Course Format: 2 credit hours. Small group discussion. Prerequisite: third professional year standing. Offered live on USC, MUSC, and GHS campus. Fall semester.

SCCP 887: Infectious Diseases on the Adult Ward
This course will focus on developing a working knowledge of infectious diseases and principles of pharmacotherapy for diseases that are commonly encountered in hospitalized adult patients. In addition, students will explore and critically evaluate relevant literature to answer topical questions regarding patient cases. These cases will be presented to peers in groups of 2 to 4 students. Each group will present approximately 3 cases and participate in a pro/con debate. Additional readings and exercises will be assigned to enhance preparation for class. Course Format: 2 credit hours. Prerequisites: third professional year standing; and a passing grade in Pharmacotherapy I. MUSC campus. Fall semester.

SCCP 888: Medical Writing
This course will teach students the basic skills necessary to write in the medical field and provide them with the tools necessary to apply these teachings throughout their career. Additionally, students will complete writing assignments throughout the course, giving them first-hand experience with styles geared toward both health care professionals and patients. These active learning experiences will be designed to complement various lectures throughout the semester. Course Format: 2 credit hours. Small group; writing assignments. Prerequisite: third professional year standing. MUSC campus. Spring semester.
SCCP 891: Introduction to Pharmacogenomics and Personalized Medicine
This course will incorporate didactic teaching from both the basic sciences and pharmacotherapy realms to prepare students to effectively engage with commonly encountered questions and pharmacy practice dilemmas related to pharmacogenomics. The course will also provide active learning through longitudinal projects involving pharmacogenomic literature analysis, and solving pharmacogenetics-related pharmacotherapy selection problems. Course Format: 3 credit hours. Prerequisite: third professional year standing. USC campus. (Cross listed as pharmacy graduate course: PHAR 715).

SCCP 892: Introduction to Clinical Pharmacy Practice
This course will build upon the principles of pathophysiology, medication administration, and patient interaction to include: developing advanced skills in patient assessment (SOAP notes), taking accurate medication histories, and providing effective patient counseling. Students will understand the role of the pharmacist in discussing patient issues such as, access to medications, adherence, assessing understanding to improve compliance, and sensitive patient issues. Course Format: 2 credit hours. Prerequisite: second professional year standing. MUSC campus.

SCCP 893: Clinical Infectious Diseases
This course is designed to build on prior knowledge and principles relevant to infectious diseases management learned in clinical microbiology, pharmacology, and pharmacotherapy to enable to the students to integrate this knowledge in the care of patients. Advanced topics will add to the learner’s foundational knowledge to provide further insight into contemporary management of patients with infectious diseases. Students will gain practical experience in planning and suggesting pharmacotherapeutic plans in team based exercises in which contemporary literature and national guidelines form the basis for contemporary therapy via case presentations. Course Format: 2 credit hours. Prerequisite: third professional year standing. MUSC campus.

SCCP 898: Telemental Health.
The objective of this course is to introduce nursing, pharmacy and social work students to direct telemental health practice in health settings - the use of telecommunications technology to provide behavioral health services. This course provides health professions students with a detailed examination of the use of telehealth processes to transform the provision of healthcare. Through an interprofessional context, students will learn the history and status of telemental health activities; engage with simulated and live telemental health learning experiences; understand the use of telemental health to improve healthcare access and population health; and embrace the changing models of care resulting from advancing telemental health technologies. Course Format: 3 credit hours. Prerequisite: third professional year standing. MUSC campus. Spring semester.

Notice and Disclaimers

The online academic bulletin is the official document of record concerning the doctor of pharmacy academic program and regulations. The bulletin is for information purposes only and does not constitute any contractual agreement between a student and the University of South Carolina or the Medical University of South Carolina. The South Carolina College of Pharmacy reserves the right to make changes in curricula, degree requirements, course offerings, or academic regulations at any time when, in the judgment of the faculty, the deans, presidents, or the boards of trustees, such changes are in the best interest of the students and the universities.

Doctor of Pharmacy students of the South Carolina College of Pharmacy are bound by the policies and procedures of this bulletin. For policies and procedures not addressed in this bulletin, students are bound by the policies of their assigned university campus (University of South Carolina or Medical University of South Carolina) and are hereby made part of this document by reference.

Effective Date August 1, 2018
