- Game Day Ejection Surveys created

Jarod:

- Mitigating risk in tailgate lots
- Challenges: no control over lots, privately owned; lots change based on availability and cost
- This year: two meetings with 20 groups that host; invited LE within jurisdiction to talk about high risk behaviors—USC PD, CPD, Richland County; also including lot owners for this year; introduce expectations, areas of concern, followed by 2<sup>nd</sup> meeting two weeks later (two home games) to figure out what's worked, what hasn't, what needs to be addressed.
- Require FSL to register events—harm reduction (best practices, risk management, etc)
- This year, 16 groups in one lot, 4 in memorial lot mixed within student body—created some suggestions; required to provide food and water, which didn't happen in past—built into lot contract;
- New problems? Still fear about calling for medical transport; volume in the 16 party lot is a concern (event management); Off campus students displaying upsetting banners/signs causing some neighbor concerns & offending residents/passersby; seeing more inappropriate videos
