Department of Mathematics & Statistics

Motivation and Objective

Motivation:

- ❑ Historically, only about 40% of students who wish to pursue an engineering or computer science degree at WSU ever advance past the traditional freshman calculus sequence
- ❑ The remaining 60% either switch majors or leave the University
- ❑ This problem is not unique to WSU; indeed, math-related attrition plagues engineering programs across the country
- ❑ We submit that even at universities with open admissions, the retention rate could (and should) be much higher

Objective:

To increase student retention, motivation and success through *application-driven, just-in-time, engineering* math instruction

The WSU Model

1. Develop a freshman-level engineering mathematics course (EGR 101) addressing only the salient math topics *actually used* in core engineering courses (physics, engineering mechanics, electric circuits, computer programming, etc.)
2. Restructure the early engineering curriculum, with EGR 101 as the *only* math prerequisite for the above core courses
3. Develop a revised engineering mathematics sequence, to be taught by the math department later in the curriculum, in concert with College and ABET accreditation requirements

EGR 101: Introductory Mathematics for Engineering Applications

- Taught by *engineering* faculty
- Course Structure: 5 credit hours (quarter system)
 - 4 hours lecture
 - 1 hour lab (real time = 2 hrs/wk)
 - Recitation (1 hr/wk)
- Prerequisite: Math placement in Trigonometry (MPL 5)

EGR 101: Introductory Mathematics for Engineering Applications

- Course Topics
 - Linear & Quadratic Equations
 - Trigonometry
 - Vectors and Complex Numbers
 - Sinusoids and Harmonic Signals
 - Systems of Equations and Matrices
 - Basics of Differentiation
 - Basics of Integration
 - Differential Eqns. W/Const. Coeffs.
- All topics driven by *engineering applications* taken directly from core engineering courses
- Lectures motivated by hands-on laboratory exercises, including a thorough integration with MATLAB

Restructured Curriculum
 (Effective Fall, 2004)
 

- Traditional Freshman Year (Mechanical Engineering):

Fall Quarter		Winter Quarter		Spring Quarter	
ENG 101	4	ENG 102	4	ME 199	3
EGR 190	4	EGR 153/CEG 220	4	PHY 240	5
CHM 121	5	GE	4	GE	4
MTH 229 Calc I*	5	MTH 230 Calc II*	5	MTH 231 Calc III*	5
	18		17		17

* Traditional freshman calculus sequence

- Restructured Freshman Year (Mechanical Engineering):

Fall Quarter		Winter Quarter		Spring Quarter	
ENG 101	4	ENG 102	4	ME 199	3
EGR 190	4	EGR 153/CEG 220	4	PHY 240	5
CHM 121	5	MTH 229 Calc I**	5	GE	4
EGR 101†	5	ME 220	3	ME 202	4
	18		16		16

* New freshman engineering mathematics course
 ** First course in the revised engineering calculus sequence, with separate sections for engineers.

Revised Math Sequence

- EGR 101 (5 hours, freshman year)
- Engineering Calculus Sequence (5 hours each)
 - Engineering Calc I (freshman year)
 - Engineering Calc II (sophomore year)
 - Engineering Calc III (sophomore year)
 - Engineering Calc IV (junior year)
- Differential Equations with Matrix Algebra (5 hours, sophomore year)

WRIGHT STATE UNIVERSITY **Assessment** NSF

- WSU has obtained multi-year NSF support to provide a rigorous evaluation of the program, and to enable a widespread dissemination of results
- Quantitative data readily available on student
 - Retention in engineering
 - Success in future math and engineering courses
 - Ultimate graduation rates
- Qualitative data from faculty and student surveys at each level of the program

WRIGHT STATE UNIVERSITY **Student Performance** First Year of EGR 101 NSF

- Grade distributions, Fall and Cumulative (Fall 04-Spring 05)

Fall: 76 Students

Grade	Percentage
A	29%
B	35%
C	18%
D	4%
F	3%
X	3%
Drops	8%

Cumulative: 158 Students

Grade	Percentage
A	25%
B	30%
C	19%
D	5%
F	3%
X	4%
Drops	14%

- Cumulative performance surpassed expectations, with 74% of students completing EGR 101 with a “C” or better
- Suggests the potential for a dramatic improvement in student retention and success in engineering

WRIGHT STATE UNIVERSITY **Student Perception** EGR 101 First-Run, Fall 2004 NSF

- Student perception of EGR 101 sorted by high school math background:

Category	Calc in HS	No Calc in HS
Motivation to Study Math	~3.5	~3.5
Motivation to Study Engineering	~3.5	~3.2
Chance of Success in Math	~4.2	~4.3
Chance of Success in Engineering	~3.8	~3.8

- EGR 101 increased student motivation and perceived chance of success in future math and engineering courses

WRIGHT STATE UNIVERSITY **Student Perception** First Year of EGR 101 NSF

- Student surveys, Fall and Cumulative (Fall 04-Spring 05)

Category	Fall	Cumulative
Motivation to Study Math	~3.5	~3.5
Motivation to Study Engineering	~3.5	~3.5
Chance of Success in Math	~4.1	~4.1
Chance of Success in Engineering	~3.8	~3.9

- Student perception of EGR 101 remained strong in subsequent quarters, even though the students were generally *less* prepared to be there!

WRIGHT STATE UNIVERSITY **Student Comments on EGR 101** NSF

- “This course has really helped me. I was thinking of dropping engineering, but because of this course I am sticking with it...”
- “Being able to put calculus to actual engineering problems helps a lot for me. I didn’t understand it in high school, but being able to imagine or see it in an actual problem helped greatly.”
- “I enjoyed the class because it focused more on application to real world problems rather than just numbers. The lectures based on example problems followed up by recitation created a very good learning environment for me.”

WRIGHT STATE UNIVERSITY **First-Year Retention** NSF

Every department requiring EGR 101 saw an increase in first-year (Fall-to-Fall) retention in 2004-2005:

First Year Retention: Majors Requiring EGR 101

Category	Prior 4 Years	2004-2005
EGR Undeclared	20.2%	27.3%
ME/MSE	74.1%	79.0%
EE/EP	84.1%	85.7%
BIE/ISE	73.2%	91.3%
Overall	68.0%	78.3%

Overall, first-year retention for majors requiring EGR 101 increased from 68.0% to 78.3%

WRIGHT STATE UNIVERSITY **Student Performance in Calculus** NSF
(Fall 2004 Cohort)

MTH 229 Calc I Grade Distribution Took EGR 101

MTH 229 Calc I Grade Distribution Did Not Take EGR 101

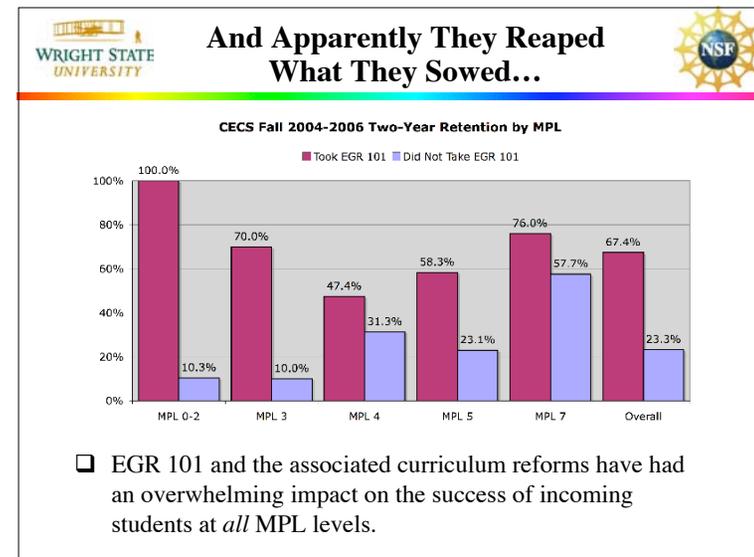

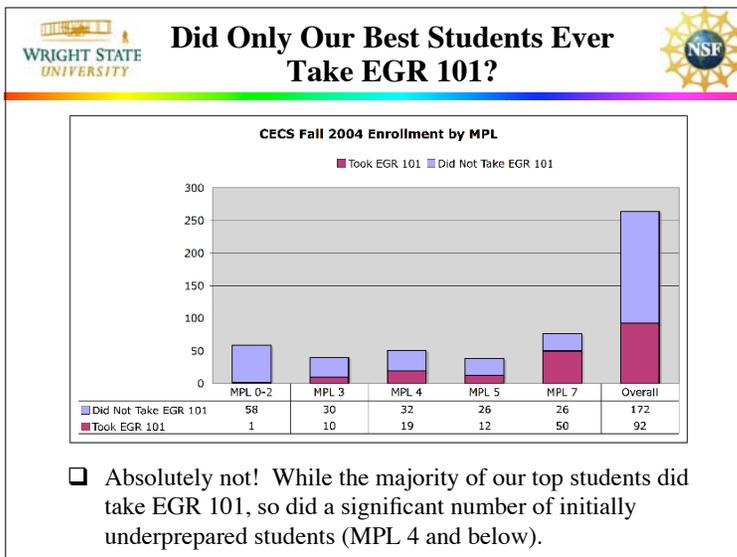

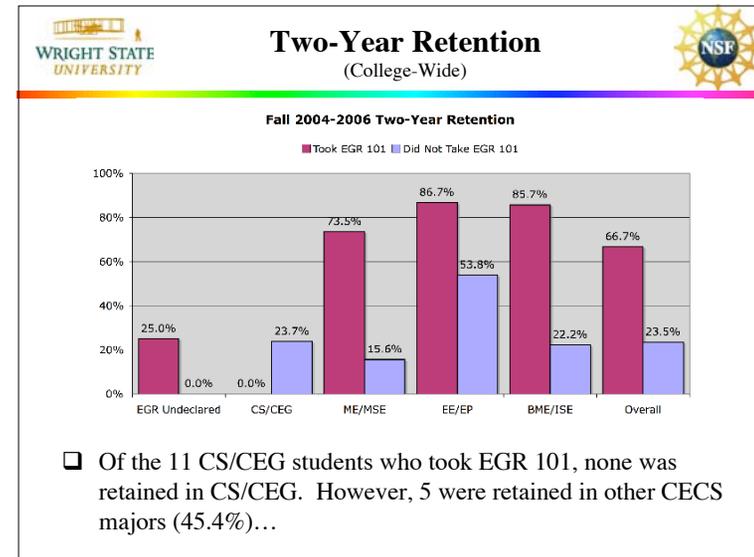

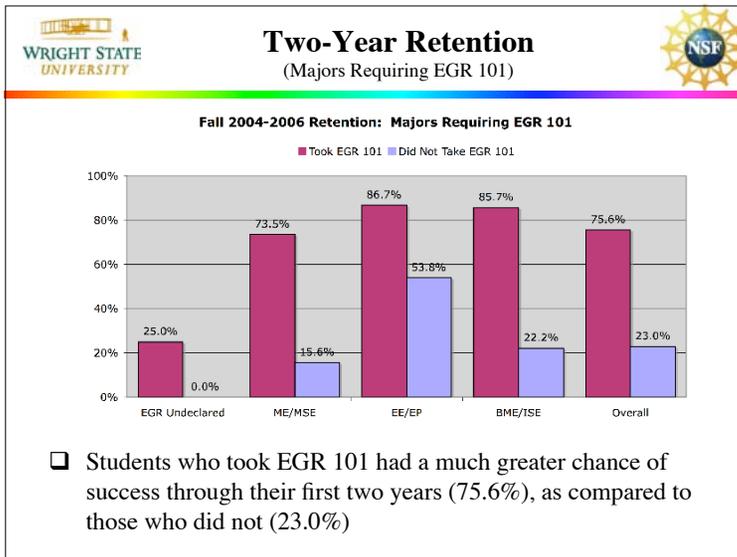

Of the students ultimately enrolled in Calc I, 89% of those who previously took EGR 101 earned a “C” or better, compared to only 60% of those who did not

WRIGHT STATE UNIVERSITY **So Who Actually Took EGR 101?** NSF

CECS Fall 2004 Enrollment

Department	Did Not Take EGR 101	Took EGR 101
EGR Undeclared	7	4
CS/CEG	118	11
ME/MSE	32	49
EE/EP	13	15
BME/ISE	9	14
Overall	179	93

Only about 1/3 of our total enrollment. The remaining 2/3 were either CS/CEG majors (do not require EGR 101), did not follow advising guidelines, or were just too far behind.

WRIGHT STATE UNIVERSITY **So What's Next?** NSF

- ❑ Despite the success of EGR 101, our curriculum was still not immediately accessible to our *average* incoming student, who has an MPL of around 4.3
- ❑ As a result, EGR 100 “Preparatory Mathematics for Engineering and Computer Science” has been introduced as a precursor to EGR 101, with an initial enrollment of 111 MPL 3 and 4 students in Fall, 2007 (under temporary course number EGR 199)
 - EGR 100 covers only pre-calculus topics, from algebra through trigonometry, with all topics motivated by their actual application in core engineering and computer science courses
 - EGR 100 serves as an alternative prerequisite to EGR 101, and provides an opportunity for incoming students (including CS/CEG majors) to raise their MPL scores and avoid as many as three remedial math courses before advancing in their chosen degree programs
- ❑ We anticipate an even larger impact on student retention and success than already realized through EGR 101

WRIGHT STATE UNIVERSITY **Results of EGR 100/199**
(Initial Offering, Fall 2007) NSF

EGR 100/199 Fall 07 MPL Retest Summary

Category	Percentage
Stayed Same	30%
Up 1 Level	24%
Up 1/2 Level	2%
Up 2 Levels	20%
Up 3 Levels	7%
Down 1 Level	7%
Down 2 Levels	1%
No Retest	9%

- ❑ The majority of EGR 100 students increased their MPL score by at least one level, and some by as many as three (avoiding an entire year of remedial math)
- ❑ Enrollment in EGR 101 for Winter 2008 is up by more than 50 students than in previous years. We expect a dramatic effect on student retention and success.

WRIGHT STATE UNIVERSITY **NSF CCLI Phase 2 Program** NSF

“A National Model for Engineering Mathematics Education”
Grant Number DUE-0618571, 08/15/06-07/31/09.
Total Funding: \$500,000

PI: N. Klingbeil
Co-PI's: K. Rattan, D. Reynolds, M. Raymer, R. Mercer

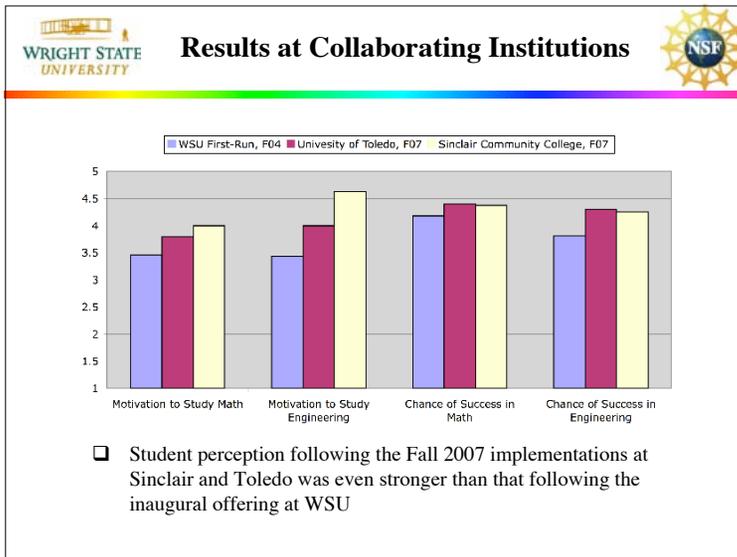

1. Multiyear assessment at WSU (student retention, motivation and success, including effect on *student learning* in subsequent math and engineering courses)
2. Pilot adoption and assessment at collaborating institutions (University of Cincinnati, University of Toledo)
3. Widespread dissemination of results: Development of an EGR 101 textbook; publication and presentation in STEM venues; workshops for faculty from across the country (build team for Phase 3 in 2009)

WRIGHT STATE UNIVERSITY **NSF STEP Program** NSF

“Gateway into First-Year STEM Curricula: A Community College/University Collaboration Promoting Retention and Articulation”
Grant Number DUE-0622466, 10/01/06-09/30/10.
Total Funding: \$1,786,559 (additional \$211,061 expected in FY 2010)

PI: M. Wheatly
Co-PI's: N. Klingbeil, B. Jang, G. Sehi, R. Jones

1. Adoption of EGR 101 and associated engineering math reforms at Sinclair Community College (SCC)
2. Development of companion SM 101/ASE 101 “Scientific Thought and Method,” offered to all first-year science majors at WSU and SCC
3. Training of faculty, graduate students and senior undergraduates, who will participate in the development and implementation of the unified first-year STEM experience at WSU and SCC
4. Expected Outcomes: 10% increase in first-year STEM retention at WSU; 10% increase in articulation of STEM majors from SCC to WSU; 50 additional WSU STEM graduates per year by close of project

WRIGHT STATE UNIVERSITY **NSF CCLI Phase 3 Program (Proposal Pending)** NSF

“A National Model for Engineering Mathematics Education”
 Proposal Number DUE-0817332, 08/01/08-07/31/12.
Total Requested Funding: \$2,000,000

Collaborating Institutions:

California Baptist University, California State University-Long Beach, Chantilly Academy (Fairfax County Public Schools, VA), Oklahoma Christian University, Oklahoma State University, San Antonio College, Texas A&M University - Kingsville, University of Cincinnati, University of San Diego, University of Texas at El Paso, University of Texas at San Antonio, University of Toledo, University of Tulsa, Washington State University, Western Michigan University

External Evaluator:

University of Maryland - College Park

- WRIGHT STATE UNIVERSITY **Summary** NSF
- We propose an application-driven, just-in-time approach to engineering mathematics, with the goal of increasing student retention, motivation and success in engineering
 - The approach is designed to be readily adopted by any institution employing a traditional engineering curriculum
 - Student performance, perception and retention in the initial implementation the program has surpassed our expectations, and verified the feasibility of the approach
 - We believe the WSU model has the potential for an extremely broad impact, including significant increases in retention and graduation rates at universities across the country

WRIGHT STATE UNIVERSITY **Questions** NSF
