The Trusted Expert and Internationally Recognized Leader for all Postsecondary Student Transitions

An Evidence-Based Discussion of Integrating First- and Second-Year Transition Programs

Dallin George Young (@DallinYoung)

Jennifer Keup (@JRKeup)

National Resource Center for

The First-Year Experience and Students in Transition

ACPA Annual Convention Tampa, FL | March 7, 2015

Session Goals

- As the result of this session, participants will:
 - Gain a greater understanding of the purpose, organization, and outcomes associated with first-year seminars and sophomore-year initiatives
 - Have the opportunity to contextualize their institutional approaches to a national empirical profile
 - Increase their awareness of how integrated approaches may be constructed to assist students in their success and development during the first two years of college.

Jennifer R. Keup

INTRODUCTION

Definition of Transition

- A transition is "a point or period in which a student encounters an event or non-event that may impact his or her progression toward educational and personal goals." (Goodman, Schlossberg, & Anderson, 2006)
- A student in transition (or students in transition) refers to any student involved in a transition that impacts his or her progression toward educational or personal goals.

Challenge in Perception of SIT Support: "Moving the cliff!"

Challenge in Execution of SIT Support: "The relay"

Criteria for "Excellence"

- "Evidence of an intentional, comprehensive approach to improving ... that is appropriate to an institution's type and mission."
- "Evidence of assessment of the various initiatives that constitute this approach."
- "Broad impact on significant numbers of ... students, including, but not limited to special student subpopulations."
- "Strong administrative support for ... initiatives, evidence of institutionalization, and durability over time."
- "Involvement of a wide range of faculty, student affairs professionals, academic administrators, and other constituent groups."

Year Four (Spring): National Survey of Senior Capstone Experiences

Year One (Fall): National Survey of First-Year Seminars

Year Three: Occasional Survey

Year Two (Spring): National Survey of Sophomore-Year Initiatives

Jennifer R. Keup

NATIONAL SURVEYS

First-Year Transition

<u>Issues</u>

- Sense of belonging
- Academic preparation
- Time management
- Finding campus resources
- Financial issues
- Physical/emotional well being
- Understanding culture of higher education

Students

- Racially/ethnically diverse
- Multicultural
- "New-traditional" (firstgen, int'l, veterans)
- Concerned about \$
- Service oriented
- Connected
- Academically "trained" under NCLB culture

(Collier, forthcoming)

High-Impact Educational Practices

Pirst-Year Seminars and Experiences

Many schools now build into the curriculum first-year seminars or other programs that bring small groups of students together with faculty or staff on a regular basis. The highest-quality first-year experiences place a strong emphasis on critical inquiry, frequent writing, information literacy, collaborative learning, and other skills that develop students' intellectual and practical competencies. First-year seminars can also involve students with cutting-edge questions in scholarship and with faculty members' own research

Commo: Intellectual Experiences

The older idea of a "core curriculum has evolved into a variety of modern forms, such as a set of required common courses or a vertically organized general education program that includes advanced integrative studies and/or required participation in a learning community (see below). These programs often combine broad themes—e.g., technology and society, global interdependence—with a variety of curricular and cocurricular options for students.

Learning Communities

The key goals for learning communities are to encourage integration of learning across courses and to involve students with "big questions" that matter beyond the classroom. Students take two or more linked courses as a group and work closely with one another and with their professors. Many learning communities explore a common topic and/or common readings through the lenses of different disciplines. Some deliberately link "liberal arts" and "professional courses"; others feature service learning.

Writing-Intensive Courses

These courses emphasize writing at all levels of instruction and across the curriculum, including final-year projects. Students are encouraged to produce and revise various forms of writing for different audiences in different disciplines. The effectiveness of this repeated practice "across the curriculum" has led to parallel efforts in such areas as quantitative reasoning, oral communication, information literacy, and, on some campuses, ethical inquiry.

Collaborative Assignments and Projects

Collaborative learning combines two key goals: learning to work and solve problems in the company of others, and sharpening one's own understanding by listening seriously to the insights of others, especially those with different backgrounds and life experiences. Approaches range from study groups within a course, to team-based assignments and writing, to cooperative projects and research.

Undergraduate Research

Many colleges and universities are now providing research experiences for students in all disciplines. Undergraduate research, however, has been most prominently used in science disciplines. With strong support from the National Science Foundation and the research community, scientists are reshaping their courses to connect key concepts and questions with students' early and active involvement in systematic investigation and research. The goal is to involve students with actively contested questions, empirical observation, cutting-edge technologies, and the sense of excitement that comes from working to answer important questions.

Diversity/Global Learning

Many colleges and universities now emphasize courses and programs that help students explore cultures, life experiences, and worldviews different from their own. These studies—which may address U.S. diversity, world cultures, or both—often explore "difficult differences" such as racial, ethnic, and gender inequality, or continuing struggles around the globe for human rights, freedom, and power. Frequently, intercultural studies are augmented by experiential learning in the community and/or by study abroad.

Service Learning, Community-Based Learning

In these programs, field-based "experiential learning" with community partners is an instructional strategy—and often a required part of the course. The idea is to give students direct experience with issues they are studying in the curriculum and with ongoing efforts to analyze and solve problems in the community. A key element in these programs is the opportunity students have to both apply what they are learning in real-world settings and reflect in a classroom setting on their service experiences. These programs model the idea that giving something back to the community is an important college outcome, and that working with community partners is good preparation for citizenship, work, and life.

Internships

Internships are another increasingly common form of experiential learning. The idea is to provide students with direct experience in a work setting—usually related to their career interests—and to give them the benefit of supervision and coaching from professionals in the field. If the internship is taken for course credit, students complete a project or paper that is approved by a faculty member.

Capstone Courses and Projects

Whether they're called "senior capstones" or some other name, these culminating experiences require students nearing the end of their college years to create a project of some sort that integrates and applies what they've learned. The project might be a research paper, a performance, a portfolio of "best work," or an exhibit of artwork. Capstones are offered both in departmental programs and, increasingly, in general education as well.

Association of American Colleges and Universities

National Survey of First-Year Seminars

- 2012-2013 Administration
 - 3,753 institutions were invited to participate
 - 896 campuses responded (23.9% response rate)
 - 804 (89.7% of sample) indicated that they had one or more FYS
- Online instrument collected data on:
 - Seminar features (structural and instructional)
 - Characteristics of students in FYS
 - Administration
 - Assessment
 - Module on HIPs

2012-2013 NSFYS: Participants

Institution type	AII (<i>N</i> = 896)	With seminar (<i>N</i> = 804)
Two-year	26.7%	25.6%
Four-year	73.3%	74.4%
Public	54.1%	54.4%
Private, not-for-profit	42.9%	42.8%
Private, for-profit	3.0%	2.7%

2012-2013 NSFYS: Participants

Size of First- Year Class	AII (<i>N</i> = 896)	With seminar (N = 804)
< 500	29.8%	29.5%
501 – 1,000	22.8%	22.6%
1,001 – 1500	11.8%	11.9%
1,501 – 2,000	7.6%	7.5%
2,001 – 2,500	6.6%	6.8%
2,501 – 3,000	2.9%	2.9%
3,001 – 3,500	4.1%	4.5%
3,500 - 4,000	2.5%	2.2%
4,001 - 5,000	3.6%	3.7%
> 5,000	8.4%	8.3%

FYS: Most Important Objectives

Objective	Percent
Develop a connection with the institution	44.9
Provide orientation to campus resources & services	37.8
Develop academic skills	36.3
Develop critical thinking skills	23.3
Create common first-year experience	21.6
Develop study skills	20.0
Self-exploration or personal development	17.0
Develop support network or friendships	14.5
Improve second-year return rates	14.5
Increase student-faculty interaction	12.4
Develop writing skills	11.6

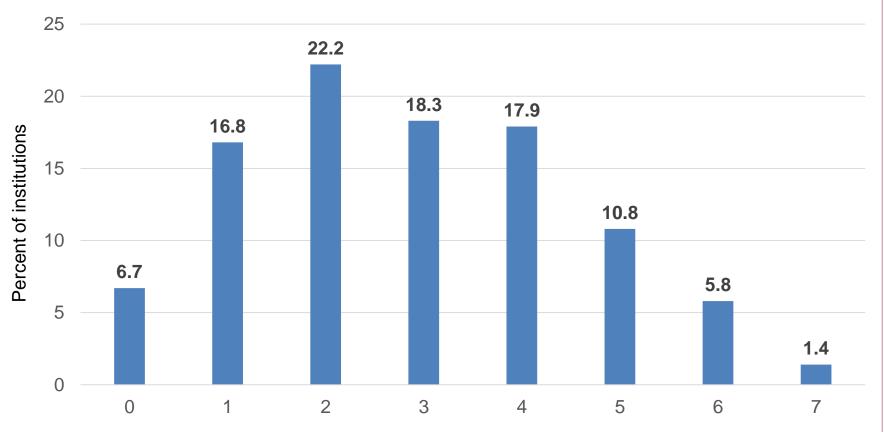

Types of Seminars

	All Seminars	Primary Type
	(N=788)	(N=786)
Extended Orientation < Two-Year < Public	60.4%	39.1%
Academic Uniform Content	29.4%	19.0%
Academic Variable Content < Four-Year < Private	28.7%	19.2%
Basic Study Skills < Two-Year	22.6%	3.9%
Pre-professional/Discipline-linked	16.4%	3.8%
Hybrid < Four-Year < Private	23.4%	14.1%
Other	1.5%	0.9%

HIPs and First-Year Seminars

Number of HIPs Offered in the FYS

HIPs and First-Year Seminars

High-Impact Practice	%
Produce and revise various forms of writing < Four-Year < Private	42.5
Collaboration and teamwork < Public	67.2
Diversity or global learning < Four-Year	58.5
Service-learning < Four-Year < Private	31.8
Learning community < Public	36.8
Common reading experience < Four-Year < Private	38.1
Undergraduate research < Four-Year	12.8

Second Year: Developmental Milestone

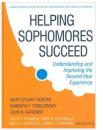

- Critical juncture for students developmentally
 - Academic development
 - Connection to institution and place in the community
 - Career development
 - Personal identity issues
 - Examination of life purpose
- Increased capacity to make progress on important college outcomes

National Survey of Sophomore-Year Initiatives

- Designed to identify sophomore-specific practices and programs and characteristics of those initiatives
- 2013-2014 Administration
 - Online survey
 - 3,722 <u>institutions</u> were invited to participate
 - 778 responded (20.9% response rate)
 - 349 (46% of sample) currently offered at least one sophomore-specific initiative

2013-2014 NSSYI: Participants

Institution type	AII (<i>N</i> = 778)	With initiative (<i>N</i> = 349)
Two-year	22.9%	35.1%
Four-year	77.1%	49.4%
Public	54.1%	42.5%
Private, not-for-profit	42.9%	50.3%

2013-2014 NSSYI: Participants

Number of Undergraduates	AII (<i>N</i> = 778)	With initiative (N = 349)
< 500	6.2%	38.3%
501 – 1,000	7.4%	46.3%
1,001 – 1500	8.6%	45.3%
1,501 – 3,000	25.0%	45.0%
3,001 - 5,000	12.6%	48.9%
5,001 – 10,000	17.3%	53.4%
10,001 – 15,000	8.9%	37.9%
15,001 – 20,000	6.1%	47.8%
> 20,000	7.9%	47.4%

NSSYI: Most Important Objectives

Opportunities for Vertical Alignment?

- What initiatives do you have in first year that focus on these outcomes?
 - Academic self-efficacy
 - Major/career exploration
 - Interpersonal relationships
- How are they (or how might they) lay the groundwork for initiatives in the sophomore year?
- In what ways are your sophomore initiatives intentionally building on the work of the first year?
- How can you build in assessment of outcomes from the first year to support second-year success?
 - Likewise from second year on?
