# **The Power of Peers:** Exploring the Impact of Peer Leadership Experiences

Jennifer R. Keup, Director, National Resource Center for  
The First-Year Experience & Students in Transition

Jodi Koslow Martin, Vice President for Student  
Engagement, North Park University

March 15, 2016

[www.sc.edu/fye](http://www.sc.edu/fye)

# Session Learning Objectives

**As a result of attending this session, participants will:**

- ...gain a greater understanding of the characteristics and outcomes of peer leadership experiences.
- ...have the opportunity to compare features of their peer leadership programs to a national profile and other institutional examples.
- ...be able to use empirical evidence to consider innovations or refinements to their programs.
- ...advance their understanding of peer leadership as an emerging and innovative high-impact practice.

# Jodi Koslow Martin: My Story

## EDUCATION

- **Ph.D.** Loyola University Chicago, Higher Education, 2010 Dissertation: First-Year College Students and Faculty: A Comparison of Expectations for Success
- **M.Ed.** Ohio University, College Student Personnel, 1999
- **B.A.** St. Norbert College, Double Major in English and Communication, 1997

## PROFESSIONAL HIGHLIGHTS

- Vice President for Student Engagement, North Park University: 2013 – present
- Interim Dean, College of Professional Studies; Assistant Provost; Dean of First-Year Students; Assistant Dean of Students; Director of Student Activities; Aurora University: 1999-2012
- NODA Summer Intern

## Introduction

# BACKGROUND AND REVIEW OF LITERATURE

# Support Networks in the First Year

\*2009 YFYC Survey

# Peer Pressure

“The student’s peer group is the **single most potent source of influence** on growth and development during the undergraduate years”  
(Astin, 1993, p. 398)

**NATIONAL RESOURCE CENTER**  
FIRST-YEAR EXPERIENCE® AND STUDENTS IN TRANSITION  
UNIVERSITY OF SOUTH CAROLINA

[www.sc.edu/fye](http://www.sc.edu/fye)

# Peer Pressure

- Peers have a significant and profound impact on the undergraduate experience:
  - Intellectual development
  - Academic Engagement
  - Moral Development
  - Clarification of Political and Social Values
  - Determination of Academic and Social Self-Concept
  - Interpersonal Skills
  - Critical Thinking Skills
  - Positive Gains in Writing and Reading Comprehension

*(Greenfield, Keup, & Gardner, 2013; Pascarella & Terenzini, 2005; Skipper, 2005)*

# Defining Peer Educators

“Students who have been **selected and trained** to offer educational services to their peers. These services are **intentionally designed** to assist in the adjustment, satisfaction, and persistence of students toward attainment of their educational goals. Students performing in [*these*] paraprofessional roles **are usually compensated** in some manner for their services and are **supervised by qualified professionals.**”

*(Newton & Ender, 2010, p. 6)*

# Background on Peer Leaders

- Historically, Peer Leaders were situated in co-curricular roles in orientation or residence life (*Ender & Kay, 2001*)
- Recently, the use of Peer Leaders in the classroom and academic realm has become more widespread (*Greenfield, et al., 2013; Shook & Keup, 2012*)
  - Roles: tutors, Supplemental Instruction leaders, and peer advisors
  - Courses: English composition, introductory mathematics, gateway courses, and first-year seminars

# Background on Peer Leaders

- Peer leaders are empowered to exert influence in a less intimidating way than staff or faculty (*Cuseo, 1991; Hart, 1995*)
- Student paraprofessionals are an effective and efficient resource
- The use of peer leaders provides benefit to:
  - Programs: improved student outcomes, stronger bridge between faculty/staff and students
  - Students: more opportunities for student interventions
  - Peer leaders: engagement with faculty & staff, leadership training

Project - Baseline - Campus Labs 2013 National Survey of Peer Leaders

Dear Student,

The National Resource Center for The First-Year Experience and Students in Transition at the University of South Carolina is conducting a research study on the peer leader experience and would like to invite you to participate. You are being asked to participate in this study because you have been identified as a student who has been involved in one or more peer leader experiences on your campus.

The purpose of this research is to gather information students' involvement and experiences as peer leaders. If you decide to participate, you will be asked to complete a 10 - 15 minute survey about your involvement in peer leadership roles and the impact this involvement has had on your educational experience.

By participating in this research, you are providing information that will contribute to the knowledge of peer leadership in Higher Education. This information can be used to better and expand peer leadership experiences for others in both student and professional form.

Your participation is confidential. The information from this study will be kept in a secure location at the University of South Carolina. The results from this study will be reported in the aggregate and participants will not receive any further contact after completing the survey. This survey will take place at approximately 60 campuses across the United States and will be administered to an estimated average of approximately 1,000 students at each campus.

Participation in this survey research allows you to enter a drawing for one of four \$500 airline flight vouchers or one of 10 \$100 American Express gift cards. At the conclusion of the survey, the website will ask for your information to be entered into the drawing. This information will be kept confidential and will be destroyed upon the conclusion of the distribution of the prizes. You are eligible for the prizes whether or not you complete the survey.

Your participation in this study is your decision and you may choose to withdraw from this study at any time. Participation, non-participation, or withdrawal from this study will not have an impact on your grades, credit, or any other benefit to which you might otherwise be entitled.

We would be happy to answer any questions you have about the study. If you have study related questions or problems, you may contact us by phone at 803-777-2134 or by e-mail at [NRCcrsch@mailbox.sc.edu](mailto:NRCcrsch@mailbox.sc.edu). If you have any questions about your rights as a research participant, you may contact the Office of Research Compliance at the University of South Carolina at 803-777-7095.

Project - Baseline - Campus Labs 2013 National Survey of Peer Leaders

University of South Carolina

8% Complete

The purpose of this survey is to gather information about your experience as a peer leader. We define a peer leader as an **undergraduate student** who has been selected to serve as a mentor, educator, or advisor to other students through a position with a campus-run organization.

As you answer each question, please reflect on your experience(s) as a peer leader. Your responses will be used to help researchers study and better understand the peer leadership experience. All individual responses will be kept confidential. Responding to this survey will take approximately 10 - 15 minutes.

QUESTION 2

What college or university do you attend?

\_\_\_\_\_

Status as a Peer Leader

We define a peer leader as an undergraduate student who has been selected to serve as a mentor, educator, or advisor to other students through a position with a campus-run organization.

QUESTION 3

Are you currently serving as a peer leader?

☐ Yes

☐ No

☐ I don't know

# Outcomes of Peer Leader Experiences

- Student peer leaders were asked to report their growth in four outcome areas:
  - “To what degree has the following (outcome) changed as a direct result of your peer leadership experiences?”
- Outcome areas
  - Skills
  - Undergraduate Experiences
  - Employability Outcomes
  - Academic Performance

# Outcomes of PLEs

Skill Development	% Increased
Leadership	87.3
Interpersonal communication	82.5
Teamwork	77.5
Time management	73.6
Project management	72.9
Organization	71.5
Presentation	67.5
Critical thinking	65.8
Written communication	53.4

# Outcomes of PLEs

Undergraduate Experience	% Increased
Knowledge of campus resources	83.6
Meaningful interaction with peers	81.2
Feeling of belonging at institution	76.6
Meaningful interaction with staff members	75.9
Interaction with people from different backgrounds	75.6
Meaningful interaction with faculty	73.3
Understanding people from different backgrounds	72.9
Desire to engage in continuous learning	71.8
Desire to persist at institution	68.9

# Outcomes of PLEs

Employability Outcomes	% Increased
Building professional interpersonal relationships	77.9
Applying knowledge to a real-world setting	72.7
Bringing together info from different places	71.2
Providing direction through persuasion	67.8
Analyzing a problem from new perspectives	65.8
Expectations for success in a FT job after grad	65.5
Creating innovative approaches to a task	65.4
Engaging in ethical decision-making	64.5
Sharing ideas with others in writing	46.2

# Outcomes of PLEs

Academic Performance	% Increased
Academic skill development	39.9
Overall academic performance	23.8
Grade point average	19.0
# of credit hours completed each term	15.1
Facilitate timely graduation	1.8

# Self-Rated Impact on Undergraduate Experience

**“When I first got the job I was shy and unsure of myself a lot of the times but over the past almost two years I have grown and become more confident. I have learned to communicate effectively with people from different backgrounds. I have also had the opportunity to become close to faculty and staff that I work with. I feel more connected to campus and have enjoyed being there for freshmen students that are struggling with the college transition.”**

# Satisfaction with PLEs

How would you rate your overall satisfaction with your peer leadership experiences?

Would you recommend being a peer leader to other students?

Institutional Practice

  - Music and Worship Leaders

# University of South Carolina

**University101**  
UNIVERSITY OF SOUTH CAROLINA **Programs**

- Three-credit, extended orientation course
- 80% of first-year class enrolls annually
- 220 sections offered during fall 2015
  - 204 faculty and staff instructors
  - 214 peer and graduate leaders
  - 4 senior peer leaders

# University 101

## Peer Leaders

UNIVERSITY OF SOUTH CAROLINA

**Peer Leaders:** The University 101 Peer Leader Program at the University of South Carolina has been an important component of the University 101 course since 1993. Outstanding rising junior and senior students are recruited to serve as role models and mentors for incoming first-year students. Peer leaders must have a minimum grade point average of 3.0 and also must demonstrate leadership/ involvement in other substantive areas of university life. It is the goal of the University 101 staff to recruit a quality cohort of peer leaders that will allow for each section of the course to be co-taught by an instructor and undergraduate or graduate student.

## Conclusions

# PEER LEADERSHIP AS A HIGH-IMPACT PRACTICE

## High-Impact Educational Practices

### First-Year Seminars and Experiences

Many schools now build into the curriculum first-year seminars or other programs that bring small groups of students together with faculty or staff on a regular basis. The highest-quality first-year experiences place a strong emphasis on critical inquiry, frequent writing, information literacy, collaborative learning, and other skills that develop students' intellectual and practical competencies. First-year seminars can also involve students with cutting-edge questions in scholarship and with faculty members' own research.

### Common Intellectual Experiences

The older idea of a "core" curriculum has evolved into a variety of modern forms, such as a set of required common courses or a vertically organized general education program that includes advanced integrative studies and/or required participation in a learning community (see below). These programs often combine broad themes—e.g., technology and society, global interdependence—with a variety of curricular and cocurricular options for students.

### Learning Communities

The key goals for learning communities are to encourage integration of learning across courses and to involve students with "big questions" that matter beyond the classroom. Students take two or more linked courses as a group and work closely with one another and with their professor. Many learning communities explore a common topic and/or common readings through the lenses of different disciplines. Some deliberately link "liberal arts" and "professional courses"; others feature service learning.

### Writing-Intensive Courses

These courses emphasize writing at all levels of instruction and across the curriculum, including final-year projects. Students are encouraged to produce and revise various forms of writing for different audiences in different disciplines. The effectiveness of this repeated practice "across the curriculum" has led to parallel efforts in such areas as quantitative reasoning, oral communication, information literacy, and, on some campuses, ethical inquiry.

### Collaborative Assignments and Projects

Collaborative learning combines two key goals: learning to work and solve problems in the company of others, and sharpening one's own understanding by listening seriously to the insights of others, especially those with different backgrounds and life experiences. Approaches range from study groups within a course, to team-based assignments and writing, to cooperative projects and research.

### Undergraduate Research

Many colleges and universities are now providing research experiences for students in all disciplines. Undergraduate research, however, has been most prominently used in science disciplines. With strong support from the National Science Foundation and the research community, scientists are reshaping their courses to connect key concepts and questions with students' early and active involvement in systematic investigation and research. The goal is to involve students with actively contested questions, empirical observation, cutting-edge technologies, and the sense of excitement that comes from working to answer important questions.

### Diversity/Global Learning

Many colleges and universities now emphasize courses and programs that help students explore cultures, life experiences, and worldviews different from their own. These studies—which may address U.S. diversity, world cultures, or both—often explore "difficult differences" such as racial, ethnic, and gender inequality, or continuing struggles around the globe for human rights, freedom, and power. Frequently, intercultural studies are augmented by experiential learning in the community and/or by study abroad.

### Service Learning, Community-Based Learning

In these programs, field-based "experiential learning" with community partners is an instructional strategy—and often a required part of the course. The idea is to give students direct experience with issues they are studying in the curriculum and with ongoing efforts to analyze and solve problems in the community. A key element in these programs is the opportunity students have to both *apply* what they are learning in real-world settings and *reflect* in a classroom setting on their service experiences. These programs model the idea that giving something back to the community is an important college outcome, and that working with community partners is good preparation for citizenship, work, and life.

### Internships

Internships are another increasingly common form of experiential learning. The idea is to provide students with direct experience in a work setting—usually related to their career interests—and to give them the benefit of supervision and coaching from professionals in the field. If the internship is taken for course credit, students complete a project or paper that is approved by a faculty member.

### Capstone Courses and Projects

Whether they're called "senior capstones" or some other name, these culminating experiences require students nearing the end of their college years to create a project of some sort that integrates and applies what they've learned. The project might be a research paper, a performance, a portfolio of "best work," or an exhibit of artwork. Capstones are offered both in departmental programs and, increasingly, in general education as well.

# Definition of High-Impact Practices

“Teaching and learning practices that have been widely tested and have been shown to be beneficial for college students from many backgrounds. These practices take many different forms, depending upon learner characteristics and on institutional priorities and contexts. [*HIPs are*] practices that educational research suggest increase rates of retention and student engagement.”

(Kuh, 2010)

# What does it mean to be HIP?

*Be on the lookout for Hipsters like these...*

# Characteristics of HIPs

- Creates an investment of time and energy
- Includes interaction with faculty and peers about substantive matters
- Real-world applications
- High expectations
- Includes frequent feedback
- Exposure to diverse perspectives
- Demands reflection and integrated learning
- Accountability

# Consider Adaptability of HIPs

**“[HIP] key conditions can be adapted and incorporated into any teaching and learning situation inside or outside the classroom to promote higher levels of student performance. There are doubtless other high-impact activities...in which large number of students participate.”**

*Kuh in Brownell & Swaner, 2010*

# Applications and Implications

- Talk about Peer Leadership as a High Impact Practice with Senior Student Affairs Leaders
- Specifically for retention – Link Peer Leadership to Early Warning System
- Financial Literacy Education Peer Leadership Potential

# Takeaways - Overall

- Peer leaders report engagement in experiences
  - Largest concentration of respondents reported spending between 6 and 15 hours per week on PL responsibilities
  - Most report active involvement in selection process
  - Many have training experiences of a week or longer
  - Majority report ongoing training
  - Many do not receive compensation (i.e., volunteer)
- Peer leaders report satisfaction with the experience
  - Nearly all respondents (96%) would recommend at least some peer leadership positions to other students

# Takeaways - Overall

- Insight into common and potential selection, training, and compensation models
- Peer leaders report growth due to experiences
  - Overall majority report gains on nearly all outcomes in skills, undergraduate experiences, and employability outcomes
  - Academic outcomes not as strongly affected by PLEs
  - Method of advancing intercultural competency
  - Highly transferable to career
- Peer leadership as an emergent HIP
