ADDENDUM #3

DATE:	June 6, 2019
PROJECT:	USC-AIKEN MAIN ENTRY University of South Carolina at Aiken Aiken, South Carolina
PROJECT NUMBER:	PROJECT FP0000210; 2KM #2018-16.06

Part 1 – Questions:

- 3.101 Question 1: The new USC Aiken logo. Would it be possible to get the spec sheets on the logo. Both my precast vendor and sign vendors have asked for this.
- RESPONSE:** See attached files (.eps files) for logo information. The sign company should be able to open them and get needed information from them.
- 3.102 Question 2: Second, can we get a confirmation (or a contact name) for the sizing for the logo/letters. The Rockwell font stipulated is not a “standard” font in cast letters and will be considered custom. Unfortunately, without sizes the manufacturer will not give them the cost.
- RESPONSE:** Sizing of letters can be scaled off the drawing. Letter size/font dimension shall be coordinated with architect after bid during submittal process.
- 3.103 Question 3: Last, the precast vendor has raised the question of the bull nose and cove headers shown at the base of each column and tower. We are assuming these are also to be precast (all other pieces state “precast” an/or have hatchfill where these don’t have either). Is this correct?
- RESPONSE:** The shapes noted as bullnose and coved on base of masonry sections are brick and shapes of brick required. The precast components are noted. If it had been intended for precast the two shapes would have been made as one combined piece vs. two as required for brick.

END OF ADDENDUM #3
