## Question # 1

Lot #1

For LED light (sign type 8), has size been determined? Should retainers be included on sides?

For Sign Type "6": Dimensional "Block C" lighting and size inquiry: Overall size of the dimensional logo to be 42" wide x 46.5" tall. Lighting retainers should be included on sides at a minimum depth of 4"

Please note that the question listed this as sign type 8, but we do not have a sign type 8.

Lot 1 Question 2

For two-story wall graphics (sign type 3), can a scissor lift be brought into the building or is scaffolding needed?

Lot 1, question 2: A small manlift can be used but bidder is responsible for protecting the flooring which lift is in use

## Question #2

Lot #2

ADA signage is not compliant. Do you want that type of sign or should it be modified?

The door name lettering is 3/4" high and the letter "O" has a width of 7/16". The guideline requires that the width be 55% of the height. For a 3/4" letter height, the width of the "O" must be at least .4125" and our letter is .4375" or 58% of the height.

The ANSI guideline states that the characters should have a "nonglare" finish and shall have a contrasting finish with their background. The aluminum background has a brushed finish and the letters are specified with a gloss, black finish.

## Question #3

For Lot #2, is there a signage list for the first and second floor?

List is included on Lot 2 specifications.

## Question #4

Do we supply the wood panels for sign types 15, 17, and 20?

YES

## **Question #5**

The graphics and installation scope of work states sign type 13 is included, but yet there was no sign type 13 illustration. Can you clarify?

On page 25 of the solicitation document on the website, it states that Sign Type 13 was removed from the package. Do not include anything for Sign Type 13.

## **Question #6**

I was hoping to submit a bid for the lot 1 signage for the University. However, your bid package states that the bidder must submit (4) 3" x 3" samples of each color and substrate. This is a very detailed list so I want to make sure I completely understand your requirements.

"Bid Samples" and the "Submittal Samples". We only intend for the successful contractor to submit multiple pieces of each of material listed in the specifications for review and approval as part of the shop drawings review phase of project and not during bidding. We are looking for is a sample of a small section of a vinyl wall graphic and sample of one the smaller dimensional graphic pieces on aluminum.
