An end-product is the tangible project identified for acquisition in this solicitation, including all component parts in final form and ready for the use intended. The terms "made," "manufactured," and "grown" are defined by Section 11-35-1524(A). By signing your offer and checking the appropriate space(s) provided and identified on the bid schedule, you certify that the end-product(s) is either made, manufactured or grown in South Carolina, or other states of the United States, as applicable. If you violate this provision, the State may terminate your contract for cause and you may be debarred. In addition, you shall pay to the State an amount equal to twice the difference between the price paid by the State and your evaluated price for the item for which you delivered a substitute. Maple hoops are strong and allow for reliable tuning at all tension levels and can live up to the constant demands of a college marching band. The oversized claws are triple-reinforced and are capable of withstanding high tensions demanded by modern marching percussion ensembles. The front leg is adjustable to create a level and stable playing surface on bleachers or other uneven terrain. The back legs have a wide stance to create room for players to stand on the same row as the drum. The tenor stand has a front support arm that provides reinforcement in 2 places on the drum mounting hardware. The bass drum stand folds down to create a basket with one adjustment. All adjustments on these stands may be made with hands and a standard drum key.

2 sets of hardware allow for use of one set in rehearsal at the Copenhaver Band Hall while the other will reside at Williams-Brice Stadium. This will considerably help reduce wear and tear by eliminating 14 bus trips for hardware every season. In addition, the Pearl Marching Drum Stands come complete with memory locks, making set-up at a familiar stadium simple and quick.
