

INTERESTED IN HELPING US FIND OUT HOW THE BRAIN WORKS?

We are currently recruiting
children aged 10-14 years for
a research study!

We are recruiting children
aged 10-14 years of age
without a known
neurodevelopmental or
psychiatric disorder!
The study will take about 2
to 3 hours and will be
completed in a 1-person visit

The Social Attention Study
involves:

Parents/caregivers

- Surveys and questionnaires

Child

- Surveys and questionnaires
- Experimental session using
electroencephalography (EEG)
and eye tracking while watching
videos and playing games

Earn \$50 and/or
a toy from our
prize bin!
