## Highlights

The South Carolina Law Enforcement Census, conducted since the early 1980s, solicits information from agencies regarding their personnel, budgets, salaries, equipment, and a variety of other key issues, from community policing to terrorism. This document presents highlights from the full report, which is available at http://www.sccja.org or http://www.cas.sc.edu/crju/ censusreport.html

## Personnel

In 2003, 171 of the approximately 290 (59\%) law enforcement agencies contacted in South Carolina returned a completed survey. Most were municipal police departments ( $65 \%$ ), followed by sheriffs' agencies ( $19 \%$ ), special jurisdiction police (11\%), and State law enforcement agencies (5\%). Of the responding agencies only one was a county police department. ${ }^{1}$

As of October 15, 2003, 169 agencies reported they employed 8,422 sworn

[^0]| Number and Percent of Responding Agencies, 2003 |  |  |  |  |  |
| :--- | :--- | ---: | ---: | ---: | ---: |
|  |  |  |  | Cumulative |  |
|  |  | Frequency | Percent | Valid Percent | Percent |
| Valid | 1 Sheriff | 1 | 18.7 | 18.7 | 18.7 |
|  | 2 County Police | .6 | .6 | 19.3 |  |
|  | 3 Municipal Police | 111 | 64.9 | 64.9 | 84.2 |
|  | 4 State Agency | 9 | 5.3 | 5.3 | 89.5 |
|  | 5 Special Police | 18 | 10.5 | 10.5 | 100.0 |
|  | Total | 171 | 100.0 | 100.0 |  |

officers. The largest employers were municipal agencies, with 3,523 or $42 \%$ of the total, followed by sheriffs' ( 3,$038 ; 36 \%$ ), and state agencies ( 1,331 ; $16 \%)$.

These agencies reported hiring 1,042 new officers in 2002. Municipal agencies accounted for nearly half of the new hires (48\%), sheriffs' offices accounted for $38 \%$, special jurisdiction police accounted for 7\%, and state agencies accounted
for $5 \%$. The lone county police department hired 19 new officers in 2002 (2\%).

Overall, $80 \%$ (135) of the agencies reported having a written policy for drug testing its employees, and 66\% indicated they randomly drug tested employees. Most sheriffs' agencies reported that they conducted random drug tests (91\%), whereas about two-thirds (67\%) of municipal agencies reported doing so. Thirtyseven percent ( $37 \%$ ) of

state agencies and $28 \%$ of special jurisdiction agencies indicated that they conducted random drug testing of employees. Nearly three-fourths (73\%) of all agencies indicated that they drug tested applicants. Municipal police departments were most likely to do so (81\%), followed by sheriffs' agencies ( $69 \%$ ), special jurisdiction police ( $50 \%$ ), and state agencies ( $38 \%$ ). The one responding county police department reported that it did not conduct random drug tests of employees, but that new applicants were drug tested.

Approximately 90\% of sheriffs' and municipal and special jurisdiction police agencies required new recruits to have a high school diploma or GED in 2003, whereas five or $63 \%$ of the state agencies required a two- or fouryear college degree.

Sixty-nine percent (69\%) of all agencies required new recruits to complete an average of 279 hours of field and classroom training beyond that provided by the state training academy. State and sheriffs' agencies were most likely to require additional training (78 and $73 \%$ respectively), followed by municipal

Minimum, Maximum, and Mean Entry-level Base Salary by Agency Type

| Agency Type |  | Minimum | Maximum |
| :--- | :--- | :--- | ---: |
| Sheriff | Average | $\$ 24,333$ | $\$ 32,842$ |
|  | Low | $\$ 20,000$ | $\$ 22,000$ |
|  | High | $\$ 29,843$ | $\$ 47,368$ |
| County Police | Average | $\$ 26,413$ | $\$ 39,620$ |
|  | Low | $\$ 26,413$ | $\$ 39,620$ |
|  | High | $\$ 26,413$ | $\$ 39,620$ |
| Municipal Police | Average | $\$ 22,946$ | $\$ 29,697$ |
|  | Low | $\$ 17,000$ | $\$ 17,000$ |
|  | High | $\$ 32,098$ | $\$ 49,065$ |
| State Agency | Average | $\$ 23,126$ | $\$ 34,137$ |
|  | Low | $\$ 19,272$ | $\$ 21,969$ |
|  | High | $\$ 25,608$ | $\$ 40,108$ |
| Special Police | Average | $\$ 23,632$ | $\$ 36,731$ |
|  | Low | $\$ 21,359$ | $\$ 21,679$ |
|  | High | $\$ 29,024$ | $\$ 41,338$ |

Minimum, Maximum, and Mean Agency Head Base Salary by Agency Type

| Agency Type |  | Minimum | Maximum |
| :--- | :--- | ---: | ---: |
| Sheriff | Average | $\$ 52,118$ | $\$ 67,251$ |
|  | Low | $\$ 34,743$ | $\$ 40,000$ |
|  | High | $\$ 72,678$ | $\$ 104,000$ |
| County Police | Average | $\$ 57,669$ | $\$ 86,504$ |
|  | Low | $\$ 57,669$ | $\$ 86,504$ |
|  | High | $\$ 57,669$ | $\$ 86,504$ |
| Municipal Police | Average | $\$ 40,210$ | $\$ 54,864$ |
|  | Low | $\$ 21,000$ | $\$ 20,800$ |
|  | High | $\$ 69,032$ | $\$ 123,200$ |
| State Agency | Average | $\$ 54,708$ | $\$ 88,122$ |
|  | Low | $\$ 28,534$ | $\$ 48,804$ |
|  | High | $\$ 78,587$ | $\$ 116,617$ |
| Special Police | Average | $\$ 38,832$ | $\$ 61,427$ |
|  | Low | $\$ 25,000$ | $\$ 32,000$ |
|  | High | $\$ 70,993$ | $\$ 106,490$ |

police departments (69\%) and special jurisdiction police (61\%).

In 2003, $20 \%$ of agencies required annual or semiannual fitness testing of officers. Thirty-four percent (34\%) and $18 \%$ of sheriffs' and municipal departments, respectively, required testing, compared to only one state agency and two special jurisdiction departments.

## Budget and Pay

In the fiscal year 2003, 141 responding agencies reported total operating budgets of \$503.1 million, ranging from a low of $\$ 7,680$ to a high of $\$ 42.4$ million. The average operating budgets for agencies of different sizes was as follows: small agencies (1-6 sworn personnel), \$195,523; moderately small agencies (7-18 sworn personnel),
\$624,796; medium-sized agencies (19-47 sworn personnel), \$1,975,603 and large agencies (48-878 sworn), \$10,311,854. Average budgets by agency type were: sheriffs' agencies, $\$ 160.9$ million; municipal departments, $\$ 225.3$ million; special jurisdiction police, $\$ 15.5$ million; and state agencies, $\$ 89.3$ million.

In 2003, minimum base annual salaries for entrylevel law enforcement officers ranged from a low of $\$ 17,000$ to a high of about $\$ 32,000$, with an average of about $\$ 23,290$. County police reported the highest average minimum salary $(\$ 26,413)$, followed by sheriffs' agencies ( $\$ 24,333$ ), special jurisdiction police (\$23,632), state agencies $(\$ 23,126)$, and municipal police $(\$ 22,946)$.

Maximum base annual salaries ranged from a low of $\$ 17,000$ to just over $\$ 49,000$, with an average of $\$ 31,250$. The highest average maximum annual salary for entry-level officers was reported by county police ( $\$ 39,620$ ), followed by special police ( $\$ 36,731$ ), state agencies (\$34,137), sheriffs' agencies ( $\$ 32,842$ ), and municipal police $(\$ 29,697)$.

The average minimum base annual salaries increased with agency size. The average salary for the smallest agencies (1-6 sworn) was $\$ 21,016$. For agencies with 7-18 sworn the average was $\$ 21,695$; for those with 19-47 sworn it was $\$ 23,716$. The average minimum base annual salary for the largest agencies (48-878 sworn) was $\$ 25,989$.

For all agencies, the minimum base annual salaries for police chiefs, sheriffs, and directors ranged from a low of $\$ 21,000$ to a high of $\$ 78,587$, with an average minimum salary of $\$ 42,281$. Maximum base annual salaries ranged from $\$ 20,800$ to $\$ 123,200$, with an average of $\$ 59,328$. County police had the highest average minimum base salary $(\$ 57,669)$, followed by state agencies ( $\$ 54,708$ ), sheriffs' agencies ( $\$ 52,118$ ), municipal police ( $\$ 40,210$ ), and special police $(\$ 38,832)$.

State agencies had the highest average maximum base salary $(\$ 88,122)$ followed by county police $(\$ 86,504)$, sheriffs' agencies $(\$ 67,251)$, special police $(\$ 61,427)$, and municipal police $(\$ 54,864)$.

The average minimum base annual salaries for chiefs, sheriffs, and directors, increased with agency size. The average base annual salary for the smallest agencies (1-6 sworn) was $\$ 31,484$. For agencies with 7-18 sworn personnel the average was $\$ 35,092$; for those with 19 47 sworn personnel it was $\$ 46,865$, and for the largest agencies, with 48-878 sworn personnel, the average was $\$ 58,436$.

## Mentally III Suspects

Just over half (56\%) of all agencies had a policy regarding the handling of mentally ill suspects, and just under half (48\%) provided training for their officers on handling mentally ill suspects.

Special police departments were most likely to provide such training (67\%), followed by Sheriffs' agencies ( $63 \%$ ), and municipal departments (46\%). Only one of the responding eight state agencies provided training on the handling of mentally ill suspects, and the lone county police department reported that it does not provide training in this area.

## Operations

Virtually all (97\%) law enforcement agencies engaged in patrol activities. Eighty five percent (85\%) listed traffic enforcement as a primary function. Nearly half (49\%) were responsible for court security, $28 \%$ for serving civil process, and $23 \%$ for jail operations. Twenty-six percent engaged in tactical or SWAT operations.

In 2003, $87 \%$ of the agencies participated in a 9-1-1 emergency system. This was highest for municipal agencies (95\%), followed by sheriffs' departments ( $90 \%$ ), and special jurisdiction police (72\%). Only one state agency participated in a 9 -1-1 system.

Statewide, nearly half (48\%) of the agencies operated a specialized drug-enforcement unit. Sheriffs' departments were most likely to do so (97\%), followed by municipal police departments (43\%).
Two state agencies operated such units. Although special jurisdiction police indicated that they did not operate specialized drugenforcement units, $17 \%$ reported that they were part of a multi-agency drug-enforcement taskforce.

Agencies that Conducted Training on the Handling of Mentally III Suspects

## Community Policing

In 2003, $69 \%$ (117) of the law enforcement agencies in South Carolina reported having a community policing plan. In $35 \%$ of these agencies the plan was formal and written. For the remaining agencies with a community policing plan (65\%), that plan was informal. However, among all agencies, $75 \%$ reported they actively encouraged officers to engage in problem-solving projects.

Twenty-seven percent (27\%) of the departments reported they trained citizens in some form of
community policing activity, while $48 \%$ formed some type of problemsolving partnership with a community group or other agency.

Eighty-four percent (84\%) and $51 \%$ of sheriffs' and municipal agencies, respectively, used one or more school resource officers, as did the single responding county police department.

In 2003, both sheriffs' agencies and municipal departments were more likely to have informal community policing plans than formal, written plans.

A slightly greater proportion of sheriffs' agencies than municipal police departments reported having a formal, written plan ( $32 \%$ and $26 \%$, respectively). Special police forces were the least likely to have formal, written community policing plans ( $6 \%$ ). Eight of the nine responding state agencies did not have a community policing plan, while the one with a plan indicated it was formal and written. The lone county police department reported that it did not have a plan in 2003.

## Equipment

In 2003, $97 \%$ of all responding agencies reported they supplied their officers with semiautomatic sidearms. Regarding less-lethal weapons, $89 \%$ reported issuing a chemical agent, and $12 \%$ issued an electrical stun device.

Agencies reported operating 7,228 cars in 2003. Sixty-nine percent $(5,018)$ were marked and $31 \%(2,262)$ were unmarked. Fourteen percent reported having car-mounted digital
terminals, while $80 \%$ reported having in-car video cameras. Seventyone percent of agencies allowed officers to take vehicles home.

Statewide, 11.3 \% (19) of the agencies operated 89 motorcycles, and 65 agencies (38\%) used bicycles.

Six agencies (4\%) operated at least one plane, while 10 agencies ( $6 \%$ ) operated one or more helicopters. Thirty two (19\%) operated one or more boats.

Regarding animals, 8 agencies (5\%) reported using one or more horses and 83 (49\%) employed dogs for law enforcement purposes.

## Computers and Information Technologies

Sixty-nine percent (118) of all agencies had a mainframe computer, $85 \%$ (145) used personal computers, and 46\% (78) used laptops. Another 14\% (24) reported using computers in cars, while $7 \%$ (12) used handheld computers. All but 2\% of agencies (3) had internet access.

Forty-seven percent (80) of the responding agencies indicated they had crime mapping capabilities. Twenty-seven percent (45) reported they mapped calls for service to street address locations, 19\% (32) mapped arrests to street
address locations, and 10\% (17) mapped crime to beats or census tracts. Forty-nine percent (80) of the agencies made crime statistics or crime maps available to their officers, and $80 \%$ (133) indicated interest in geographic information systems training.

## Terrorism

In 2003, $31 \%$ (52) of responding agencies had a written policy on terrorism response or prevention. State agencies were most likely to have a written policy ( $67 \%$ ) followed by special police ( $56 \%$ ), sheriffs' agencies ( $47 \%$ ), and municipal departments (20\%). The single county police department reported that it did not have a written policy.

Thirty-nine percent (64) indicated they requested funding for terrorism from federal sources, $28 \%$ (43) requested funding from state sources, and $14 \%$ (21) requested funding from city or county sources. Twenty-five agencies reported they received approximately $\$ 2.8$ million in funding for terrorism response equipment, while 92 agencies indicated they did not receive such funding (56 agencies did not report whether they did or did not receive funding).

Agencies with a Written Policy on Terrorism Response or Prevention

| Agency Type |  | Frequency | Percent |
| :--- | :--- | ---: | ---: |
| 1 Sheriff | 0 No | 16 | 53.3 |
|  | 1 Yes | 14 | 46.7 |
|  | Total | 30 | 100.0 |
| 3 Municipal Police | 0 No | 87 | 79.8 |
|  | 1 Yes | 22 | 20.2 |
|  | Total | 109 | 100.0 |
| 4 State Agency | 0 No | 3 | 33.3 |
|  | 1 Yes | 6 | 66.7 |
|  | Total | 9 | 100.0 |
| 5 Special Police | 0 No | 8 | 44.4 |
|  | 1 Yes | 10 | 55.6 |
|  | Total | 18 | 100.0 |

Sixteen agencies indicated that they received about $\$ 273,500$ in funding for terrorism response training, and 88 reported that they received no funding for training (67 agencies did not indicate whether or not they received funding). Thirty-seven percent of agencies indicated that they conducted scenariobased training where officers actually responded to hypothetical terrorist threats, including the use of weapons of mass destruction.

## Introduction

The South Carolina Law Enforcement Census (hereafter, Census) is a unique and important research and information tool. Although the Census traditionally has been published every year, it has not been conducted over the past few years due to budget constraints. In 2003, funding became available to resume this research project. Since the early 1980s, the Department of Criminal Justice at the University of South Carolina has conducted the Census. By conducting mail and phone surveys with law enforcement agencies in South Carolina, the Census produced a comprehensive portrayal of many key issues for law enforcement. As the needs and issues facing law enforcement agencies have changed, the Census has similarly evolved. Rather than conducting exhaustive phone interviews, research staff conducting the present Census instead mailed a survey to all law enforcement agencies and requested their participation. Of the approximately 290 law enforcement agencies in the state that employ sworn law enforcement officers, 171 returned usable, completed surveys (about $60 \%$ of the sample). The agencies that took the time to participate should be commended for their willingness to extend the knowledge base in the State.

While previous versions of the Census concentrated on the minutiae of law enforcement, this iteration of the Census takes a different approach. Although we still report important figures such as the number of officers hired, numbers and types of vehicles employed, etc., we also inquired about terrorism prevention, homeland security funding, policies regarding the mentally ill, and community policing implementation. Questions regarding these issues will evolve with each iteration of the Census, which we anticipate conducting every two years, depending on funding.

The Census was developed to serve several purposes. Its primary mission is to inform the law enforcement community in South Carolina. Administrators can use the information to determine how their agency compares to other agencies in terms of manpower, salary, budget, equipment, and so forth. Informed requests can then be posed to city, county, or state administrators for funding increases or reallocation. The sections on important current issues, such as homeland security and policies regarding the mentally ill, can assist administrators in determining the position of their agency relevant to other agencies in the state. Further, information in the Census (such as found in the community policing and accreditation sections) can guide administrators in determining policy directions for the future. The Census also serves as a research vehicle for the faculty in the Department of Criminology and Criminal Justice at the University of South Carolina (USC). Finally, the Census is intended to assist staff at the South Carolina Criminal Justice Academy in determining current and future training needs for law enforcement agencies in the state.

## Methodology

The questions included in the Census were developed by faculty in the Department of Criminology and Criminal Justice at USC, in conjunction with staff at the South Carolina Criminal Justice Academy. Some questions were drawn from national surveys conducted by the Bureau of Justice Statistics, some from previous iterations of the Census, and others are original questions developed to address current concerns. A complete list of all law enforcement agencies in South Carolina was acquired from the Academy. Prior to mailing the survey, a presensitization letter was distributed by the Academy to all law enforcement agencies in the State. The Census was then mailed, with a postage-paid return envelope and an explanatory cover letter
from the Academy. Agencies that did not respond were sent multiple requests soliciting their participation. Agencies that contacted research staff and indicated they did not receive (or had lost) the surveys were sent a second copy. After repeated requests for participation, approximately $60 \%$ of all agencies that currently employ sworn law enforcement personnel returned completed, usable surveys. A complete list of participating agencies is included in Appendix A of this report.

Since all agencies were included as participants, even though not all agencies completed surveys, the research methodology is considered a census, rather than a sample (which would begin with a process to choose a representative proportion of all existing agencies). Returned surveys were entered into a database and analyzed by research staff. Since not all agencies responded, it is important to point out that responses obtained from participating agencies may not necessarily be representative all law enforcement agencies in South Carolina. A review of the participating agencies indicates that they range widely from very small agencies (with just a few officers) to the largest agencies in the state. The largest agencies all participated, providing a comprehensive view of these units. The majority of the sheriffs' departments participated, encompassing the spectrum from the largest sheriffs' offices in the state to some of the smallest. The same is true for police departments-of the approximately 100 police departments that returned usable surveys, both the largest in the state through some of the smallest are included. Participating agencies cover a wide geographic and population range. A variety of other units including state agencies, departments of public safety, and university police departments also participated. ${ }^{1}$ Although generalizing the findings of this Census to specific non-participating agencies should be done with caution, the findings may reasonably be considered representative of the law

[^1]enforcement agencies in South Carolina. Note, also, that some agencies did not provide responses to specific questions in the Census. We highlight this fact in the text or in the tables when the proportion of agencies failing to answer a question is large, as the figures provided are unlikely to accurately reflect the population of law enforcement agencies in the State.

## Findings

## Personnel

Any law enforcement agency is defined by its personnel. This section of the report includes information on numbers of officers or deputies in an agency, hiring, number of administrators, and number of personnel in some specialized units. Some specialized units (i.e. community policing, SWAT, drug investigations) are discussed elsewhere in this report and are excluded from this section. In addition to simply stating numbers of officers, agency size is included as a descriptor for some variables.

In 2003, the number of certified or sworn personnel per agency varied widely, ranging from 1 to 878. Twenty-two agencies (12\%) employed more than 100 officers. The agency with the largest number of sworn is the State Highway Patrol $(\mathrm{n}=878)$, which is nearly twice the size of the next largest agency-the Richland County Sheriff's Office with 450 sworn deputies. (Because including the Highway Patrol when calculating statistics substantially skews obtained values, it is excluded from the following personnel figures.) The average number of sworn or certified law enforcement officers for all agencies statewide was 45 and the median was 19 (representing the $50^{\text {th }}$ percentile; half of the cases are above the median and half are below). Figure 1 displays graphically the distribution of law enforcement agencies in South Carolina by the number of
sworn officers and deputies (including the Highway Patrol). Clearly, smaller-sized agencies dominate.

Figure 1. Distribution of Law Enforcement Agencies in South Carolina by

## Number of Sworn Personnel

Figure 2 depicts the average number of sworn or certified personnel by agency size, with each size category representing approximately $25 \%$ of the reporting agencies. Small agencies $(\mathrm{n}=40)$ are those that employed 6 or fewer sworn officers (category 1 ). Moderately small agencies ( $\mathrm{n}=$ 44) employed 7-18 sworn (category 2), medium-sized agencies $(\mathrm{n}=43$ ) employed 19-47 (category 3), and large agencies $(\mathrm{n}=41)$ employed 48-450 sworn (category 4). The graph
shows that small agencies employed an average of four sworn officers, moderately small agencies an average of 12 officers, medium-sized agencies 31, and large agencies an average of 135 sworn.

Figure 2. Average Number of Sworn Personnel by Agency Size: All Agencies

Notes: $1=1-6,2=7-18,3=19-47,4=48-450$ sworn; SC Highway Patrol excluded.

Figure 3 displays the average number of sworn or certified personnel by agency size for municipal police departments. Small police departments $(\mathrm{n}=32)$ had, on average, only a few officers. Moderately small police departments $(\mathrm{n}=34)$ averaged 12 officers, medium-sized agencies $(\mathrm{n}=25)$ averaged 31 officers, while large police departments $(\mathrm{n}=18)$ averaged 125 officers.

Figure 3. Average Number of Sworn Personnel by Agency Size: Municipal Agencies

Notes: 1 = small, 2 = moderately small, 3 = medium, 4 = large agency.

Figure 4 presents the same information for sheriffs' agencies. There were no reporting sheriffs' agencies with fewer than 6 sworn personnel in 2003. The two moderately small sheriffs' departments averaged 15 sworn, medium-sized agencies $(\mathrm{n}=12)$ averaged 32, while large sheriffs' departments $(\mathrm{n}=18)$ averaged 146 sworn personnel.

Excluding non-jail personnel presents a substantially different distribution of personnel for sheriffs' agencies. As shown in Figure 5, moderately small agencies had an average of 13 sworn or certified non-jail personnel, medium-sized agencies had an average of 6 , while large sheriffs' agencies had an average of 44 .

## Figure 4. Average Number of Sworn Personnel: Sheriffs' Agencies

Notes: 1 = small, 2 = moderately small, 3 = medium, 4 = large agency.

Figure 5. Average Number of Sworn Non-Jail Personnel: Sheriffs'
Agencies

Notes: 1 = small, 2 = moderately small, 3 = medium, 4 = large agency.

The following table displays the number of reported certified and sworn personnel for all agencies in South Carolina.

Table 1. Number of Certified or Sworn Personnel

| \# Sworn | \# Agencies | Percent | Cumulative \% |
| :---: | :---: | :---: | :---: |
| 1 | 2 | 1.2 | 1.2 |

Agencies also were asked how many new officers were hired in the past year. Approximately $15 \%$ of reporting agencies (a total of 25) reported zero new hires. Although the range of new hires was 1 to 62 , the average was 6 and the median was 3 . Thus, approximately half of reporting agencies indicated they hired fewer than 3 officers. Sheriffs' agencies hired an average of 12 officers, state agencies hired an average of 6 , municipal departments an average of 5 , special police an average of 4 , and the single responding county police department reported hiring 19 officers. Small agencies hired an average of 1 officer, moderately small agencies hired an average of 2 officers, medium-sized agencies hired 5, and large agencies hired an average of 17 officers.

Figure 6 displays the average number of new hires by agency size for municipal police. Small departments hired an average of 1 new officer, moderately small departments hired an average of 3, medium-sized departments hired an average of 5, and large municipal departments hired an average of 15 .

Figure 6. Number of New Hires for Municipal Police Departments, FY ‘03

Notes: $1=$ small, $2=$ moderately small, $3=$ medium, $4=$ large agency .

Figure 7 shows the average number of new hires by agency size for sheriffs' agencies. Small agencies responding to the survey apparently did not hire any sworn personnel in the prior year, moderately small agencies hired an average of 1 , medium-sized agencies hired an average of 3, and large sheriffs' offices hired an average of 20.

Figure 7. Number of New Hires for Sheriffs' Agencies in Prior Year

Notes: 1 = small, 2 = moderately small, 3 = medium, 4 = large agency.

Table 2 on the next page displays the number of new hires for all agencies.

| Total | 171 | 100.0 |  |

In addition to being asked about new hires, agencies were asked whether experience and education affected starting salary. The majority of agencies indicated prior law enforcement experience affected starting salaries ( $80 \%$, or 131 agencies), whereas a little over half ( $57 \%$, or 87 agencies) indicated education level did affect starting salary.

An important component to any personnel discussion is a consideration of administrative staff. Participants were asked to provide the number of full-time administrators in their agency. It is important to note that agencies were allowed to define what "administrator" meant. This could lead to differing definitions. For example, some agencies may describe the most senior patrol officer on a shift as an administrator while other agencies may restrict the title administrator to a specific rank.

The number of administrators ranged from 0 to 52. Five agencies reported having no full-time administrator. The average was 5 and the median was 2 . Thus, about half the agencies in South Carolina reported 2 or fewer full-time administrators. Small agencies reported an average of 1 full-time administrator; moderately small agencies reported 2, medium-sized agencies reported 4, and large agencies reported 13. Municipal and special police departments both indicated an average of 3 full-time administrators, sheriffs' agencies had an average of 9, state agencies an average of 13 , and the county police department reported having 7 full-time administrators.

The following two figures present the average number of full-time administrative personnel for municipal police departments and sheriffs' agencies by agency size.

Figure 8. Full-time Administrative Personnel for Municipal Departments

Notes: 1 = small, 2 = moderately small, 3 = medium, 4 = large agency.

Figure 9. Full-time Administrative Personnel for Sheriffs' Agencies

Notes: 1 = small, 2 = moderately small, 3 = medium, 4 = large agency.

Table 3 presents the distribution of full-time administrators for all law enforcement agencies.

|  |  |  |  |

When asked to indicate the number of technical support personnel, responses ranged from zero to 182 . The average was 11 , and the median indicates just over half of all agencies had 4 or fewer. One-fifth of participating agencies (30) indicated they had zero full-time technical support personnel. Twenty-five percent of agencies indicated they have more than 10 full-time technical support personnel.

Since a significant responsibility of many agencies, particularly sheriffs' offices, is the management of jails and the provision of court services, agencies were asked to report the number of full-time jail and court personnel. The majority of law enforcement agencies in South Carolina did not employ full-time jail personnel ( $76 \%$, or 90 ). (Fifty-three agencies or $31 \%$ did not answer this question.) Of the 23 sheriffs' agencies answering the question, only 7 indicated they did not employ jail personnel ( 9 sheriffs' agencies did not answer). The number of full-time jail personnel in sheriffs' departments ranged from 0 to 306, with an average of 39. Eighty-four percent (63) of municipal police departments did not employ full-time jail personnel and 12 did. The number employed ranged from 1 to 33 with an average of 1.4. (Thirty-five municipal departments or $32 \%$ did not answer this question.)

Sixty-nine percent (86) of law enforcement agencies indicated they do not employ any full-time court operations personnel. The number employed ranged from 0 to 76 with a mean of 3. (Fortyseven agencies or $28 \%$ did not answer this question.) Of the 28 sheriffs' agencies answering the question (4 did not), only five indicated they did not employ any full-time court operations personnel. The number employed ranged from 0 to 76 with an average of 13 . Only 13 municipal police departments reported employing full-time court operations personnel, while $83 \%$ (63) did
not. (Thirty-five or $32 \%$ did not answer the question.) The number employed ranged from 0 to 10 with an average of .5 .

## Weapons

A series of questions were asked concerning the weapons issued to law enforcement officers by their agencies. These questions were included to allow agencies to compare policies. An overwhelming number of agencies ( $97 \%$ ) issue semi-automatic handguns to some or all of their officers. Very few agencies (4\%) still issue revolvers. A majority of agencies issue chemical agents (e.g., pepper spray) and impact devices, such as batons and rubber bullets ( $89 \%$ and $62 \%$, respectively). Relatively few agencies issue conducted energy devices (e.g., Taser) or rifles ( $12 \%$ and $14 \%$, respectively). Failure by an agency to issue a weapon does not preclude its usage by its officers-officers may purchase and carry weapons, if allowed by their agency's policy.

Table 4. Weapons Issued to Officers by Agency

| Weapons Issued | Yes | No |
| :--- | ---: | ---: |
| Revolvers | 7 | 163 |
| Semi-Automatic Handguns | 164 | 6 |
| Shotguns | 125 | 65 |
| Rifles | 24 | 146 |
| Conducted Energy Devices | 21 | 149 |
| Chemical Agents | 151 | 151 |
| Impact Devices | 106 | 64 |
| Other Weapons | 7 | 162 |

## Services Provided

The types of services provided by agencies varies significantly as a function of their jurisdiction, mission statements, and staffing. To determine the kinds of services provided by law enforcement agencies in South Carolina, a series of questions were developed. The vast majority
of agencies conduct patrol (two sheriffs' and three state agencies did not conduct routine patrol), and most agencies participate in traffic enforcement ( $97 \%$ and $85 \%$, respectively). Sixty-eight ( $40 \%$ ) of responding agencies dispatch calls for service; exactly half (16) of the sheriffs' agencies do so, and 36 (32\%) of the municipal police departments dispatch calls. A significant minority of agencies: maintain search and rescue teams (33\%), maintain SWAT or tactical teams ( $26 \%$ ), serve civil warrants ( $28 \%$ ), and run jails ( $23 \%$ ). Seventeen of the 32 responding sheriffs' agencies (53\%) and 23 of the 111 responding municipal police departments ( $21 \%$ ) indicated they have primary responsibility for jail operations. A very small minority of agencies provide emergency medical services (6\%). These are generally multi-purpose departments of safety which provide police, EMS, and fire services.

Table 5. Services Provided by Agency

| Service | Provided | Not Provided |
| :--- | :---: | :---: |
| Patrol | 166 | 5 |
| Dispatching Calls for Service | 68 | 103 |
| Jail Operations | 40 | 131 |
| Search and Rescue | 56 | 115 |
| Traffic Enforcement | 145 | 26 |
| Emergency Medical Services | 11 | 160 |
| Tactical Operations/SWAT | 45 | 126 |
| Court Security | 84 | 87 |
| Serving Civil Warrants | 48 | 123 |

## Investigative Services

Table 6. Investigative Services Provided

| Investigative Service | Provided | Not Provided |
| :--- | :---: | :---: |
| Investigations of Traffic Accidents | 135 | 36 |
| Investigations of Homicide or Suicide | 142 | 29 |
| Investigations of Other Violent Crime | 149 | 22 |
| Investigations of Property Crimes | 154 | 17 |
| Investigations of Arson | 117 | 54 |

A primary role of most law enforcement agencies is the investigation of crime. This is true of agencies in South Carolina as well-approximately $20 \%$ (or fewer) of the law enforcement units in South Carolina do not conduct the investigations described above. Although there are a few large and medium sized agencies which do not participate in the types of investigations presented in Table 6, these agencies are generally state agencies with a narrowly defined mission. As shown in Table 7, those law enforcement agencies with a traditional policing mission which do not conduct the investigations described above are generally small police agencies.

## Table 7. Relationship between Agency Size and Investigation of Homicides

| Agency Size |  | \# Agencies | Percent |
| :--- | :--- | ---: | ---: |
| 1 1-6 | 0 no | 13 | 32.5 |
|  | 1 yes | 27 | 67.5 |

|  | 1 yes | 36 | 81.8 |
|  | Total | 44 | 100.0 |
| $319-47$ | 0 no | 5 | 11.6 |
|  | 1 yes | 38 | 88.4 |
|  | Total | 43 | 100.0 |
| $448-878$ | 0 no | 3 | 7.1 |
|  | 1 yes | 39 | 92.9 |
|  | Total | 42 | 100.0 |

Forensic Services

Table 8. Forensic Services Available

| Forensic Service | Available | Not Available |
| :--- | :---: | :---: |
| Fingerprint Processing | 82 | 89 |
| Ballistics Testing | 2 | 169 |
| Crime Lab Services | 21 | 150 |
| Drug Analysis Lab | 50 | 121 |

Generally, forensic services are infrequently available throughout the state (Table 8). Although many agencies have the capacity to process fingerprints (48\%), most agencies have no further forensic capabilities. The following two tables are representative of the forensic services provided by agencies relative to agency size. While the majority of large and medium sized agencies provide some forensic services, the majority of small agencies do not. Only two county sheriffs' departments provide ballistics testing (in two of the most populous counties in the state).

Table 9. Drug Analysis Services by Agency Size

|  | Total | 42 | 100.0 |

## 911 System

Of the 171 agencies responding, $87 \%$ ( 144 agencies) indicated they use a 911 system. The following table describes who runs those 911 systems. While the city or county represents a slim majority, it is common for the agency to run the 911 system.

# Table 11. Who Manages Agency's 911 System? 

|  | Frequency | Percent |
| :--- | ---: | ---: |
| Your Agency | 30 | 17.5 |
| City or County | 86 | 50.3 |
| County | 28 | 16.4 |
| Sheriff's Dept. | 5 | 2.9 |
| Other | 149 | 87.1 |
| Total |  |  |

## Calls for Service

Agencies were asked to provide the total number of calls for service for the fiscal year of 2003 (19 agencies or $11 \%$ did not answer this question). They also were asked to indicate how many of those calls for service received an officer ( 29 or $17 \%$ did not answer this question). Variation in total calls for service was substantial, ranging from a low of 9 to a high of 500,000. The average for all agencies was 28,802. Municipal police departments reported an average of 18,276 calls for service with a range of 9 to 182,016 calls. Sheriffs' agencies reported an average of 61,152 calls for service with a range of 100 to 410,537 . The following four figures present calls for service and calls receiving an officer for police and sheriffs' departments, by agency size.

Figure 10. Average Number of Calls for Service by Agency Size

Notes: $1=1-6,2=7-18,3=19-47,4=48-878$ sworn.

Figure 11. Average Number of Calls for Service Receiving an Officer

Notes: $1=1-6,2=7-18,3=19-47,4=48-878$ sworn; $17 \%$ (29) of the agencies did not answer this question.

Figure 12: Average \# of Calls for Service by Agency Size: Municipal PDs

Figure 14. Average Number of Calls for Service by Agency Size: Sheriffs’ Agencies

Notes: 1 = small, 2 = moderately small, 3 = medium, 4 = large agency.

Figure 15. Average Number of Calls for Service Receiving a Sheriffs' Deputy by Agency Size: Sheriffs' Agencies

Notes: 1 = small, 2 = moderately small, 3 = medium, 4 = large agency.

## Community Policing

Community policing (CP) became popular in the 1980's and common-place in the 1990's. Recently, the popularity of community policing, or community oriented policing, has declined while the status of problem oriented policing has risen. Despite this shift in popularity, community policing is still a common, and often effective, set of ideas for law enforcement agencies. To determine the prevalence and popularity of community policing in South Carolina, a series of questions were included in the Census. The responses to these questions are presented in the following table.

## Table 12. Community Policing Implementation

|  | Agencies <br> Responding | Agencies <br> Responding |
| :--- | ---: | ---: |
| Question | 112 | No |
| Does agency participate in community policing? | 117 | 56 |
| Does agency have a COP plan? | 38 | 49 |
| Does agency have a specific COP unit? | 126 | 133 |
| Does agency have a Victim Assistance person? | 59 | 33 |
| Is Victim Assistance person an officer? | 83 | 77 |
| Does agency have a School Resource Officer? | 45 | 86 |
| Did agency conduct COP-citizen training last year? | 127 | 125 |
| Do officers conduct Problem Oriented Policing? |  | 43 |
| Did agency form formal Problem Oriented | 81 | 89 |
| $\quad$ partnerships last year? |  |  |

As indicated in the previous table, agencies were asked if they had a community policing plan. Of the 117 agencies which indicated they have a community policing plan, $41(35 \%)$ indicated the plan was a written, formal policy. The remaining 76 agencies (65\%) reported that the community policing plan was informal and not written. Of the 38 agencies that stated they had a specific community policing unit, each indicated how many officers were assigned to that unit. Just over half of the agencies (52\%) had 3 or fewer officers assigned to a CP unit. Approximately
another third (32\%) had 4 to 9 officers in a CP unit, while the remaining 4 agencies assigned 12 to 27 officers to a CP unit.

Respondents also were asked if their agency supplied one or more School Resource Officers (SROs), and if so, how many. (Note that 76 or nearly half (44\%) of the reporting agencies did not indicate how many SROs they had. Thus the following figures must be viewed with caution as they are unlikely to reflect the true distribution of SROs across law enforcement agencies in South Carolina.) Eighty-three or just under half (49\%) of the 169 agencies that answered this question indicated they assign one or more SRO officers. Of these agencies, about half (51\%) had 1 or 2 SROs and about another third (31\%) had 3 to 5 . Of the remaining 15 agencies, 10 had 6 to 10 SRO officers, 4 had 12 to 19, and one agency reported having 55 SROs.

## Mentally III Suspect Policies

As police agencies have become targets of litigation regarding their handling of mentally ill suspects, agencies have resorted to policies to inform officers concerning proper treatment of the mentally ill.

Table 13. Issues Regarding Mentally III Suspects

|  | Agencies <br> Responding <br> Yes | Agencies <br> Responding <br> No |
| :--- | :---: | :---: |
| Doestion agency have a policy regarding mentally ill <br> suspects? | 93 | 73 |
| Does agency train officers in handling mentally ill <br> suspects? | 81 | 88 |
| Was an officer assaulted by a mentally ill suspect <br> last year? | 43 | 105 |

Although over half of the agencies (56\%) have a policy regarding the handling of mentally ill suspects, fewer than half of the responding agencies conduct training specific to this area (48\%). This is particularly noteworthy as nearly a third of agencies (29\%) reported that an officer was assaulted by a mentally ill suspect in the past year (note that $23 \%$ of the agencies did not respond to this question). That officers were assaulted by mentally ill suspects in almost a third of responding agencies suggests that more agencies should considering developing policies and training to address the handling of these suspects.

## Computers and Technology

A series of questions were posed to agencies to ascertain the prevalence and usage of various technologies. Table 13 indicates whether the specific technology is in use, or available to officers.

| Table 14. Usage and Availability of Computers and Technology |  |  |
| :--- | :---: | ---: |
| Is this technology employed | Yes | No |
| by agency? |  |  |
| Desktop Computers | 145 | 26 |
| Mainframe Computer | 118 | 53 |
| Internet Access | 168 | 3 |
| Laptops in Field | 78 | 93 |
| Car-Mounted Digital Terminal | 24 | 147 |
| Hand-Held Digital Terminal | 12 | 159 |
| Radar Traffic Device | 141 | 30 |
| Laser Traffic Device | 36 | 133 |
| Smart Traffic Trailers | 45 | 125 |
| In-Car Video Cameras | 136 | 35 |

Most agencies indicated that they use either desktop computers (85\%) and/or a mainframe computer system ( $69 \%$ ). The response to the internet access question indicates that virtually all agencies have some type of computer, with internet access, available to officers (98\%). The
usage of laptop computers in the field is much less common, with fewer than half of all agencies indicating usage of these devices (46\%). This will likely change over the years with the continuing decline in computer prices and the increased reliance on computer aided dispatch. Few agencies use either car or hand held digital terminals (14\% and 7\%, respectively). These devices are useful for quick exchange of information between dispatchers, officers, and investigators. However, they are expensive and difficult to integrate into routine patrol work. Most agencies (83\%) use a radar device for identifying vehicles traveling over the speed limit. Laser and smart-trailers are less common ( $21 \%$ and $27 \%$, respectively). Finally, $80 \%$ of reporting agencies indicate that they are currently using in-car video cameras.

## Vehicles and Transportation

Vehicles and transportation devices represent one of the key tools for law enforcement officers. Although it is assumed that virtually all law enforcement agencies use patrol vehicles, there are variations in the other modes of transportation employed, as depicted in Table 15.

Table 15. Vehicles or Transportation Devices

| Vehicle Type | Available | Not Available |
| :--- | :---: | :---: |
| Unmarked Cars | 151 | 17 |
| Take Home Cars | 122 | 45 |
| Motorcycles | 19 | 149 |
| Boats | 32 | 139 |
| Helicopters | 10 | 161 |
| Planes | 6 | 165 |
| Bikes | 65 | 106 |
| Horses | 8 | 163 |
| Other Vehicles | 92 | 76 |

The vast majority of reporting agencies use some unmarked cars ( $90 \%$ ), and most agencies (73\%) provide take home cars to some officers or deputies. The use of motorcycles (11\%), boats
(19\%), and horses (5\%) are relatively rare among reporting agencies. Surprisingly, bikes are used by $38 \%$ of reporting agencies. A few agencies have access to helicopters and planes, although these are typically in the largest agencies.

## SWAT Teams and Dogs

Fifty or $30 \%$ of agencies reported maintaining Special Weapons and Tactics (SWAT) teams. Sheriffs' agencies are most likely to repot having such units, with $66 \%$ or 21 of the 32 agencies indicating they have them. Twenty-four of 107 municipal police departments ( $22 \%$ ) reported having a SWAT unit, while 3 of the 9 state agencies, 1 of the 17 special police departments, and the county police department reported they operate SWAT units.

Figure 16. Number of Agencies with SWAT Units by Agency Size

Notes: $1=1-6,2=7-18,3=19-47,4=48-450$ sworn.

Although 105 or $61 \%$ of responding agencies did not indicate how many of their officers were assigned to a SWAT unit, the 54 agencies that did report figures indicated the size of their SWAT teams ranged from 1 to 30 officers (12 agencies indicated they had zero officers assigned). Over half (56\%) of all SWAT teams had between 12 and 30 officers. Note that since so many reporting agencies did not answer this question, these figures are unlikely to reflect the true distribution of the number of officers assigned to SWAT units in South Carolina. Figure 16 above indicates the mean number of SWAT officers relative to the size of the agency.

Regarding dogs, 83 law enforcement agencies indicated they retain them (either for use in tracking suspects or locating drugs/weapons/explosive devices) while 88 agencies do not keep dogs. Nearly all sheriffs' agencies used dogs for law enforcement purposes ( $88 \%$ ), while $46 \%$ of municipal police departments, a third of state agencies, and the county police department reported doing so. None of the responding special police departments indicated they used dogs.

## Training and Accreditation

South Carolina is fortunate to have a single training academy to serve all law enforcement agencies in the state. However, post-academy training policies vary significantly among agencies. Several questions were posed regarding their post-academy training programs and the length of those programs.

A substantial majority, 116 of the 171 reporting agencies ( $69 \%$ ), indicated that they require postacademy training. These post-academy training programs fall into two categories-classroom hours and supervised hours. The number of required classroom hours ranged from 2 to 440. The average number of classroom training hours was 48 and the median was about 40 hours. Thus,
about one fifth (22\%) of agencies required no classroom training following the academy, about one forth (27\%) required approximately 40 hours (or one week) of classroom training, and about another fourth of reporting agencies required either more than 40 hours of classroom training. The figures for the number of classroom training hours should be viewed with caution since 66 or $39 \%$ of the reporting agencies did not answer this question.

Even a greater proportion of agencies required a post-academy period of supervised hours, generally considered to be a probationary period during which new officers are evaluated and trained by senior officers. The range of supervised hours was substantial; the low was 4 hours and the high was 960 hours. Of the 119 agencies answering this question, all but 6 or $95 \%$ indicated they required supervised hours following completion of the academy. The mean number of required hours was 226 and the median was approximately 200 hours. The figures for the number of supervised hours should be viewed with caution since 52 or $30 \%$ of the reporting agencies did not answer this question.

When asked about accreditation, 22 (13\%) of the 170 agencies indicated they are accredited by a national accrediting agency. Another 36 (24\%) of 147 responding agencies indicated they are currently seeking accreditation by a national accrediting agency ( 24 or $14 \%$ did not answer this question). To recognize the diligence of those agencies that have gained accreditation, and to provide a resource to those agencies currently pursuing accreditation, the following list is provided.

Table 16. Accredited Law Enforcement Agencies in South Carolina BUREAU OF PROTECTIVE SERVICES CHARLESTON COUNTY AVIATION AUTH. POLICE DEPT. CHARLESTON COUNTY SHERIFF'S OFFICE CHARLESTON POLICE DEPARTMENT

## Drug Investigations and Drug Testing

Drug investigations have long been an important responsibility of law enforcement agencies.
Several questions were posed to agencies regarding the separation of drug investigations from traditional investigations. These findings are presented in Table 17. Just under half (48\%) of agencies had a drug unit and just over half (55\%) participated in a multiagency drug task force.

The subsequent table describes how many personnel are assigned to drug units. The average number was 4 and the median was 2 .

Table 17. Drug Investigations

| Question | Yes | No |
| :--- | :---: | :---: |
| Is there a Drug Unit in Agency? | 82 | 89 |
| Agency participates in a Multiagency Drug Task Force? | 93 | 75 |

Table 18. Number of Personnel in Drug Unit

|  | \# in Unit | \# Agencies | Percent | Cumulative Percent |
| :---: | :---: | :---: | :---: | :---: |
|  | 0 | 14 | 14.9 | 14.9 |
|  | 1 | 20 | 21.3 | 36.2 |
|  | 2 | 16 | 17.0 | 53.2 |
|  | 3 | 8 | 8.5 | 61.7 |
|  | 4 | 8 | 8.5 | 70.2 |
|  | 5 | 2 | 2.1 | 72.3 |
|  | 6 | 4 | 4.3 | 76.6 |
|  | 7 | 4 | 4.3 | 80.9 |
|  | 8 | 5 | 5.3 | 86.2 |
|  | 9 | 2 | 2.1 | 88.3 |
|  | 10 | 3 | 3.2 | 91.5 |
|  | 12 | 4 | 4.3 | 95.7 |
|  | 15 | 2 | 2.1 | 97.9 |
|  | 21 | 1 | 1.1 | 98.9 |
|  | 22 | 1 | 1.1 | 100.0 |
|  | Total | 94 | 100.0 |  |
|  | Missing | 77 |  |  |
| Total |  | 171 |  |  |

Notes: Figures should be viewed with caution as 77 or $45 \%$ of responding agencies did not answer this question.

A related set of questions was asked concerning the agency's internal drug testing. The following table describes those questions and the responses.

Table 19. Drug Testing Policies

| lrr |
| :--- |
| Drug Policy for Testing Employees |
| Drug Policy for Testing Applicants |
| Random Drug Testing | 135 | No |
| :--- |
| Probation Officers Drug Tested |
| Promotion Candidates Drug Tested |
| Drug Investigators Drug Tested |
| Non-Sworn Personnel Drug Tested |
| Post-Accident Drug Testing | 111 | 34 |
| :--- |

A majority of agencies conducted random drug testing (66\%), had an existing policy for testing current employees (80\%), and regularly drug tested applicants for employment (73\%). Few agencies conducted drug testing of promotion candidates (4\%), probation officers (4\%), nonsworn personnel (11\%), or drug investigators (14\%). Forty-one percent of agencies indicated they conducted drug tests following accidents.

## Crime Mapping and Surveys

As the technological capacity of law enforcement agencies has evolved, and as the personal computer has become more powerful, crime mapping has become more prevalent among policing units. In 1996, the National Institute of Justice reported that nationally fewer than 10\% of law enforcement agencies possessed any crime mapping capability.

Table 20. Crime Mapping Capabilities and Interest

| Does your agency... | Yes | No |
| :--- | ---: | ---: |
| Have any crime mapping capabilities | 80 | 89 |
| Make crime statistics available to officers? | 80 | 85 |
| Map calls to street addresses? | 45 | 124 |
| Map arrests to street addresses? | 32 | 137 |
| Map crimes to beats or census tracts? | 17 | 152 |
| Have any interest in crime mapping training? | 133 | 33 |

Based on the responses of the participants in the Census, it appears that crime mapping has become more common over the past few years. Nearly half (47\%) of all participating agencies possess some crime mapping capacity. Although relatively few agencies map calls to a high level of specificity (by mapping calls to street addresses, mapping arrests to street addresses, or mapping crimes to beats or tracts), many agencies have some use for crime mapping.

Additionally, a majority of agencies (80\%) expressed interest in training in crime mapping.

An additional tool that law enforcement agencies may utilize is surveys of the public. Law enforcement agencies conduct surveys for a variety of reasons, ranging from public relations concerns to ascertaining community needs. We asked a series of questions pertaining to the use of surveys.

Table 21. Public Surveys

| Does your agency... | Yes | No |
| :--- | :---: | :---: |
| Conduct surveys of the public? | 80 | 90 |
| Survey public satisfaction of the police? | 58 | 112 |
| Survey perceptions of crime? | 45 | 125 |
| Survey victims of crime? | 36 | 134 |

Nearly half (47\%) of responding agencies indicated they had conducted some type of public survey. About a third of agencies (34\%) indicated they had asked residents about satisfaction with the police, $27 \%$ asked about perceptions of crime in the community, and $21 \%$ asked victims of crime about their experience.

## Terrorism and Home Security

One of the most pressing issues for local law enforcement this decade is the threat of terrorism.
Since September 11, 2001, local law enforcement has been tasked with the substantial responsibility of serving as the last line of defense in the fight to maintain homeland security. Although federal agencies may receive the most attention, local agencies play a significant role. To determine what practices and training efforts are currently underway in South Carolina, a series of questions regarding terrorism were developed and included in the survey.

## Table 22. Terrorism Policies and Funding

| Has your agency.... | Yes | No |
| :--- | :---: | :---: |
| Developed a policy regarding terrorism threats or incidents? | 52 | 115 |
| Requested federal funding for terrorism response? | 64 | 100 |
| Requested state funding for terrorism response? | 43 | 111 |
| Requested city/county funding for terrorism response? | 21 | 126 |

Just under one third (31\%) of the agencies developed a formal policy specific to responding to terrorist threats. Fewer than half requested federal (39\%), state (28\%), or local (city or county) funding (14\%) to prepare for a terrorism or weapons of mass destruction (WMD) response. It should be noted that not all agencies need to prepare for a response to terrorism. The cost of equipping and training every local law enforcement agency would be prohibitive. However, there should be some type of coordination regarding who is in charge in the event of a local threat or incident. To determine whether agencies have moved to this level of preparation, agencies were asked to indicate who coordinates their response to an incident.

Table 23. Terrorism Response Coordinator

| Who Coordinates Terrorism Response? | Number | Percent |
| :--- | :---: | :---: |
| Chief or Sheriff | 124 | 75 |
| Fire or EMS Director | 7 | 4 |
| Task Force Director | 7 | 4 |
| Undetermined | 7 | 4 |
| Other | 20 | 12 |

Overwhelmingly, the agency director is the point person in coordinating a response. In some cases, a fire or EMS director coordinates the response, and in several cases there is a task force or emergency response coordinator. When asked to describe the "Other" response, 10 (of the 20) respondents named a specific office such as the Emergency Preparations Director or the Emergency Management Department. The remainder of the answers included other local and
state law enforcement officers (e.g., County Sheriff, SLED Director) or specific officers within the agency (e.g., Captain of Patrol).

The next level of preparation concerns training-typically by responding to hypothetical scenarios. These exercises assist agencies by pointing to the weaknesses, overlaps, and deficits in their response plans. When asked if scenario-based training had been conducted by their agency, $63(38 \%)$ indicated they had engaged in this type of training. The fire department, EMS, and other law enforcement agencies were frequently included in the scenarios. However, SLED, hospitals, and federal agencies reportedly were rarely included in these exercises.

Table 24. Terrorism Scenario Training

| Question | Yes | No |
| :--- | :---: | :---: |
| Conducted training for terrorism/WMD response? | 63 | 103 |
| Was SLED involved in training scenario? | 22 | 149 |
| Was EMS involved in training scenario? | 61 | 110 |
| Was the Fire Department involved in training? | 64 | 107 |
| Were Hospitals involved in training scenario? | 33 | 138 |
| Other state or local law enforcement <br> agencies involved in training scenario? | 54 | 117 |
| Were federal law enforcement agencies involved <br> in training scenario? | 18 | 153 |

## Operating Budget

Over the past several years, tax revenues have declined across South Carolina while inflation and the push towards homeland security have driven the costs of law enforcement steadily higher. Thus in times of leaner state, county, and local budgets, the law enforcement community is being asked to do more with less funding. The following tables describe the operating, training, and overtime budgets of reporting agencies.

Table 25. Annual Operating Budget: All Agencies
Budget Figure
Highest Reported Operating Budget
\$42,412,489
Lowest Reported Operating Budget \$7,670
Mean Operating Budget
\$3,567,810
Median Operating Budget
\$1,083,272
Notes: Thirty (18\%) agencies did not answer this question.

## Figure 17. Average Annual Operating Budget by Agency Type

Notes: 1 = sheriff, 2 = county, 3 = municipal, $4=$ state, $5=$ special

The average operating budget for municipal police departments was approximately $\$ 2,400,000$ with a median of $\$ 753,750$ and range of $\$ 7,670$ to $\$ 31$ million. Sheriffs' agencies reported an average operating budget of about $\$ 6,200,000$ with a median of $\$ 2,730,383$ and range of $\$ 238,124$ to $\$ 21,776,071$. State agencies averaged nearly $\$ 17,900,000$ with a median of $\$ 18,258,535$ and a range of $\$ 533,273$ to $\$ 42,412,489$. Special police departments had an average
operating budget of about $\$ 1$ million with a median of $\$ 637,246$ and a range of $\$ 79,901$ to $\$ 3,388,481$, while the county police department reported an operating budget of just over $\$ 12$ million.

Training budgets were much lower than total operating budgets, with $93 \%$ of agencies reporting a total training budget of less than $\$ 100,000$. (Note that 34 or $20 \%$ of agencies did not answer this question.) Ten agencies reported training budgets of over $\$ 100,000$, with two of those agencies reporting training budgets of over one million. Most agencies (61\%) have a training budget of $\$ 10,000$ or under. Only $20 \%$ of agencies have a training budget of $\$ 2,000$ or less.

Municipal police departments reported an average training budget of $\$ 40,172$ with a median of $\$ 5,600$ and a range of zero dollars to $\$ 1,900,000$. Sheriffs' agencies reported an average training budget of $\$ 37,570$ with a median of $\$ 15,775$ and a range of $\$ 1,500$ to $\$ 345,000$. The average for state agencies was $\$ 14,167$, the median was $\$ 7,500$, and the range was zero to $\$ 35,000$. The average for special police departments was $\$ 209,039$, the median was $\$ 11,260$, and the range was $\$ 2,724,492$, while the training budget for the county police department was reported as \$7,671.

Overtime pay represents another significant component of total operating budgets ( 35 or $21 \%$ of agencies did not report overtime pay). Although the average overtime pay total for fiscal year 2003 was $\$ 102,245$, the median $\$ 25,000$. The range was zero to $\$ 2,100,000$. However, only two agencies had overtime costs of over \$1 million and only $18 \%$ of reporting agencies had overtime costs of over $\$ 100,000$. Just over one third of agencies (36\%) had overtime costs of $\$ 10,000$ or less.

Municipal police Departments reported an average overtime pay total of $\$ 81,837$ with a median of $\$ 13,696$ and a range of zero dollars to $\$ 2,100,000$. Sheriffs' agencies reported an average overtime pay total of $\$ 215,156$ with median of $\$ 96,780$ and a range of zero dollars to $\$ 808,240$. The average for state agencies was $\$ 24,667$, the median was $\$ 9,002$, and the range was zero dollars to $\$ 80,000$. Special jurisdiction police departments reported an average overtime pay total of $\$ 47,752$ with a median of $\$ 30,000$ and a range of zero to $\$ 144,946$, while the county police department reported $\$ 443$, 791 in overtime costs.

In addition to such broad categories as operating and training budgets, some agencies make specific types of pay available to officers or sheriffs' deputies. Several questions were posed to agencies regarding these types of pay and their availability. As the following table indicates, relatively few agencies offer hazardous duty (1\%), shift differential (7\%), or education incentive pay (19\%), while a larger number offer tuition assistance (38\%) and merit pay (42\%).

## Table 26. Pay Categories and Their Availability

| Pay Type | Yes | No |
| :--- | :---: | :---: |
| Hazardous Duty Pay Provided | 2 | 167 |
| Shift Differential Pay Provided | 11 | 159 |
| Education Incentive Pay Provided | 32 | 138 |
| Merit Pay Provided | 71 | 97 |
| Tuition Assistance Provided | 64 | 103 |
| Other Type of Pay Available | 14 | 157 |

When asked to describe the "Other Type of Pay" category, several participants indicated they provide cost of living adjustments, some provide language incentive pay, several provide overtime pay, and several provide a Christmas bonus.

## Salary

The largest component of most operating budgets is salary. Participating agencies were asked to indicate the minimum and maximum salaries for each of the most common positions in an agency. The following tables present the range of maximum salaries, the range of minimum salaries (the high and low in each category), the average salary and the median (the $50^{\text {th }}$ percentile-half of the scores are above the median and half are below) salary figures for both the maximum salary figures and the minimum salary figures. It is important to keep in mind that not all agencies have all positions (i.e. Major, or Senior Patrolman). Additionally, some agencies elected not to provide all salary figures and some agencies indicated there is no "maximum salary" for certain, or all, positions.

## Table 27. Chief, Sheriff's Salary

|  | Salary Figure |
| :--- | :---: |
| Range of Maximum Salaries | $\$ 20,800-123,200$ |
| Range of Minimum Salaries | $\$ 21,000-75,587$ |
| Mean Maximum Salary | $\$ 59,328$ |
| Median Maximum Salary | $\$ 55,703$ |
| Mean Minimum Salary | $\$ 42,281$ |
| Median Minimum Salary | $\$ 40,000$ |

Notes: 37 agencies did not supply maximum and 43 did not supply minimum salary figures.

Table 28. Deputy Chief or Assistant Chief's Salary

|  | Salary Figure |
| :--- | :---: |
| Range of Maximum Salaries | $\$ 23,000-90,680$ |
| Range of Minimum Salaries | $\$ 21,000-63,681$ |
| Mean Maximum Salary | $\$ 51,289$ |
| Median Maximum Salary | $\$ 49,406$ |
| Mean Minimum Salary | $\$ 35,338$ |
| Median Minimum Salary | $\$ 36,435$ |

Notes: 99 agencies did not supply maximum and 101 did not supply minimum salary figures.

Table 29. Major's Salary

|  | Salary Figure |
| :--- | :---: |
| Range of Maximum Salaries | $\$ 28,500-94,575$ |
| Range of Minimum Salaries | $\$ 21,395-60,371$ |
| Mean Maximum Salary | $\$ 50,117$ |
| Median Maximum Salary | $\$ 58,509$ |
| Mean Minimum Salary | $\$ 33,640$ |
| Median Minimum Salary | $\$ 39,528$ |

Notes: 126 agencies did not supply maximum and 125 did not supply minimum salary figures.

## Table 30. Captain's Salary

|  | Salary Figure |
| :--- | :---: |
| Range of Maximum Salaries | $\$ 21,000-77,392$ |
| Range of Minimum Salaries | $\$ 20,000-66,543$ |
| Mean Maximum Salary | $\$ 50,272$ |
| Median Maximum Salary | $\$ 50,208$ |
| Mean Minimum Salary | $\$ 34,574$ |
| Median Minimum Salary | $\$ 37,111$ |

Notes: 88 agencies did not supply maximum and 90 did not supply minimum salary figures.

Table 31. Lieutenant's Salary

|  | Salary Figure |
| :--- | :---: |
| Range of Maximum Salaries | $\$ 21,000-66,656$ |
| Range of Minimum Salaries | $\$ 19,900-50,387$ |
| Mean Maximum Salary | $\$ 42,710$ |
| Median Maximum Salary | $\$ 45,000$ |
| Mean Minimum Salary | $\$ 30,528$ |
| Median Minimum Salary | $\$ 30,912$ |

Notes: 63 agencies did not supply maximum and 67 did not supply minimum salary figures.

Table 32. Sergeant's Salary

|  | Salary Figure |
| :--- | :---: |
| Range of Maximum Salaries | $\$ 21,000-59,386$ |
| Range of Minimum Salaries | $\$ 19,900-40,277$ |
| Mean Maximum Salary | $\$ 37,716$ |
| Median Maximum Salary | $\$ 38,000$ |
| Mean Minimum Salary | $\$ 27,800$ |
| Median Minimum Salary | $\$ 27,500$ |

Notes: 40 agencies did not supply maximum and 46 did not supply minimum salary figures.

## Table 33. Senior Patrol Officer's Salary

|  | Salary Figure |
| :--- | :---: |
| Range of Maximum Salaries | $\$ 17,000-52,773$ |
| Range of Minimum Salaries | $\$ 19,000-41,359$ |
| Mean Maximum Salary | $\$ 33,801$ |
| Median Maximum Salary | $\$ 33,000$ |
| Mean Minimum Salary | $\$ 25,964$ |
| Median Minimum Salary | $\$ 25,484$ |
| Notes: 66 agencies did not supply maximum and 69 did not supply minimum salary figures; a Senior |  |
| Patrol Officer is one with 3-5 years of experience |  |

Table 34. Entry Level Patrol Officer's Salary

|  | Salary Figure |
| :--- | :---: |
| Range of Maximum Salaries | $\$ 17,000-49,065$ |
| Range of Minimum Salaries | $\$ 10,000-32,098$ |
| Mean Maximum Salary | $\$ 31,257$ |
| Median Maximum Salary | $\$ 30,664$ |
| Mean Minimum Salary | $\$ 23,192$ |
| Median Minimum Salary | $\$ 23,335$ |

Notes: 41 agencies did not supply maximum and 31 did not supply minimum salary figures; salaries are for non-jail personnel only. The minimum starting salary of $\$ 10,000$ is suspicious. Repeated calls to the relevant agency to verify the amount failed to elicit a reply. It is excluded from the data in the Highlights section; the next lowest minimum starting salary reported is $\$ 17,000$.

## Appendix A: Participating Agencies

Below is a complete list of agencies (in random order) which returned completed, usable surveys.
The leaders of these agencies, and the personnel who assisted in the completion of the survey,
deserve our thanks and commendation.
