

ELEMENTARY EDUCATION, B.A.

Teach 2nd through 6th grade.

Make a difference. Become an Elementary Teacher.

THE PROGRAM

You will gain the professional knowledge and skills necessary to be a highly effective teacher in grades 2-6. Your studies will focus on engaging children in inquiry-based lessons, developing elementary curriculum, and using student data to inform instruction. You will have experiences in authentic elementary classroom settings, where you will work side-by-side with award-winning professors and experienced classroom teachers. You will learn innovative teaching methods through these guided experiences in diverse elementary school settings.

State reciprocity and our national accreditation make it easy to become certified in most states. Our graduates are also well-prepared to enroll in master's degree programs during their first years of teaching.

EMBEDDED COURSES

In addition to your many field experiences and internships, you will benefit from embedded methods courses that meet in local elementary schools, are co-led by university-based education faculty and school-based teachers. These embedded courses are a focal point for the program and provide opportunities for you to immediately put into practice in a real elementary classroom setting the instructional strategies you learn.

PROGRAM ACCREDITATION

This program has been accredited by:

- Council for the Accreditation of Educator Preparation (CAEP)
- Association for Childhood Education International (ACEI)

2020-2021

TYPICAL PROGRAM FOR ELEMENTARY EDUCATION, B.A.

FRESHMAN

Fall

Reading and Composition
