Data Storage Protection Statement

All sensitive data will be stored in Microsoft OneDrive for Business provided through the UofSC Office 365 implementation.

All data stored in OneDrive are encrypted at rest and in motion. UofSC has a service level agreement with Microsoft certifying that the campus implementation of OneDrive is HIPPA/FERPA compliant for data storage.

In the event any relevant data must be removed from the OneDrive environment, additional encryption technologies such as Axcrypt (Windows) or FileVault (Mac) will be used by the data steward to secure data.
