Mission:

The mission of the Continuum of Care (COC) is to ensure continuing development and delivery of appropriate services to those children with the most severe and complex emotional or behavioral health challenges whose needs are not being adequately met by existing services and programs.

In order to carry out this mission, the COC provides intensive care coordination through a care planning process called Wraparound. Wraparound is a team based approach to caring for families with complicated needs. COC ensures the special needs of our families are met by augmenting existing resources to create a full-service array that ensures our youth have access to services and supports needed in order to be served in the least restrictive, most appropriate setting.

Services Provided

The COC provides intensive Wraparound care coordination for your child and your family. Wraparound is an effective, evidence-based process of care coordination and planning that builds on the collective action of a team which helps the family reach their vision for the future. This team, called the Child & Family Team, includes youth, families, natural supports, and professional service providers.

Through monthly meetings, your Child & Family Team will develop a community-based plan of care that includes strategies to assure that youth and their families can experience success in their communities, homes, and schools. If therapeutic admissions are necessary, we strive for solid discharge planning that is short term and ensures return to home and community.

The COC uses Wraparound to ensure that families have access to the full array of services and supports needed to meet their needs and experience continued success long after Wraparound care coordination has ended.
