**School of Medicine
Greenville**

*University of South Carolina
School of Medicine Greenville develops
inquisitive physicians who take responsibility
for the health care needs of the diverse
communities we serve. Located in one of the
most beautiful cities in the Southeast,
UofSC School of Medicine Greenville
invites you to explore our M.D. program
and come see for yourself the extraordinary
offerings of our school and our community.*

Marjorie R. Jenkins, M.D., MEHP, FACP
Dean, University of South Carolina
School of Medicine Greenville

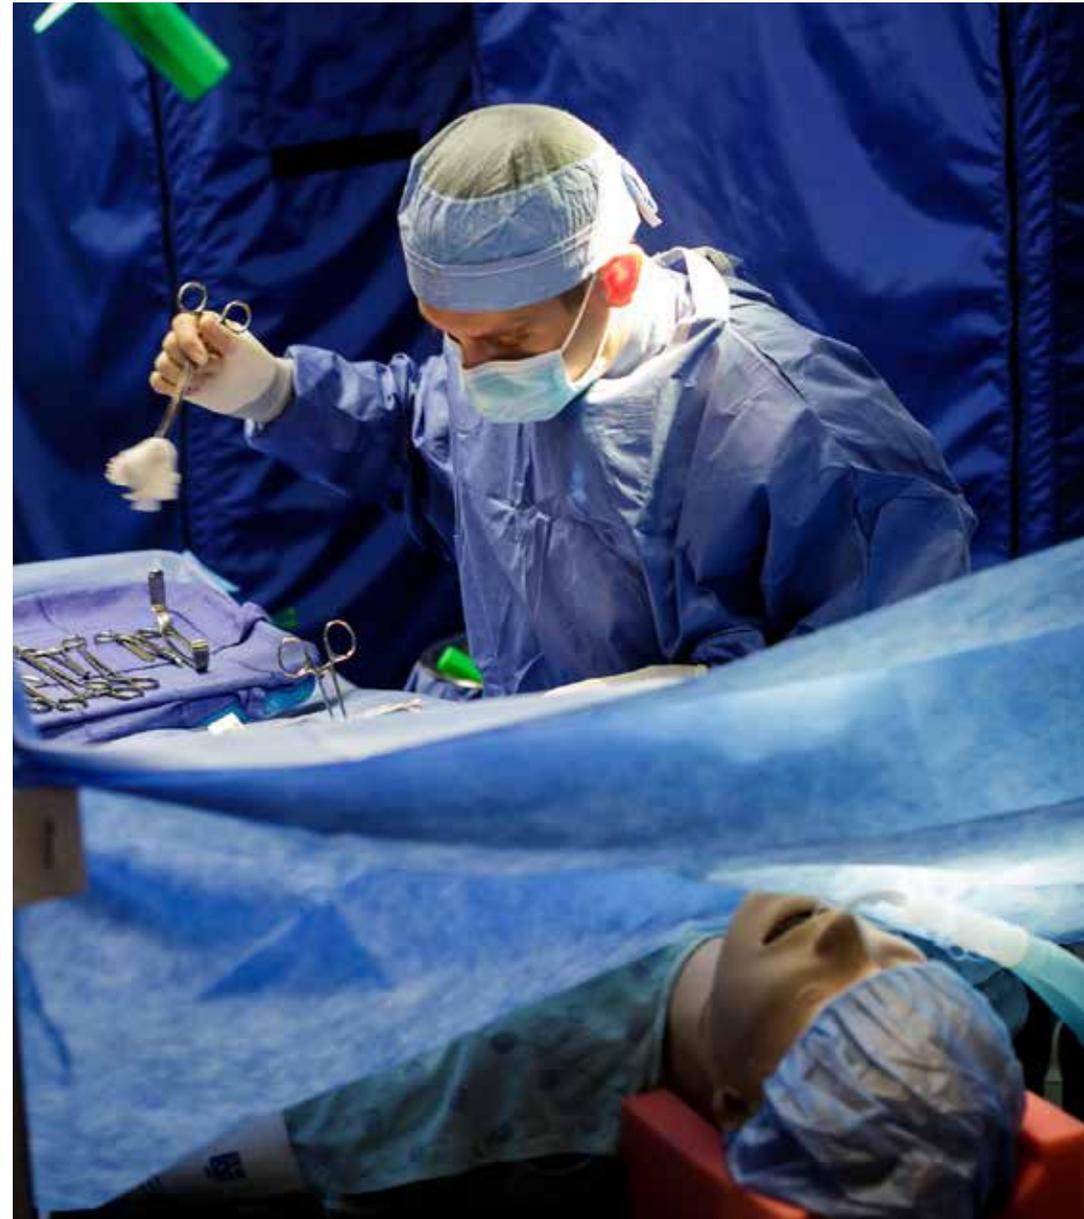

From the first week, students are immersed in a real-world health care delivery system, taught by experienced biomedical scientists and clinical faculty in partnership with Prisma Health using a state-of-the-art, integrated curriculum.

The University of South Carolina School of Medicine Greenville is a four-year medical school located in the heart of the Upstate on the Prisma Health Greenville Memorial Medical Campus.

Our students leverage the advantages of a comprehensive medical education custom built by a 20-year partnership between the state's largest public university and the region's largest health system.

We welcome you to explore our innovative curriculum.

REAL WORLD EXPERIENCE

M.D. PROGRAM

From the essentials of biomedical sciences to EMT training, your first two years at the School of Medicine Greenville will offer engaging, hands-on experience with practicing clinicians. As you move forward through the third and fourth years, you will learn to care for patients while developing the skills necessary to deliver transformative care in the clinical environment.

CLINICAL TEACHING

An essential part of the UofSC School of Medicine Greenville's curriculum focuses on clinical teaching in partnership with Prisma Health, the state's largest network of hospitals and practices, giving medical students unprecedented access to broad clinical expertise. Innovative, real-world training spans all four years and encompasses a wide array of medical and surgical cases, creative research projects including clinical trials and real-time experience that keeps pace with today's practice of medicine.

MEDICAL RESIDENCY PROGRAMS

Our partner health system, Prisma Health, has 13 ACGME accredited residency programs and 12 fellowship programs. Our graduates match in diverse programs across the country.

A GROUNDBREAKING APPROACH

EMERGENCY MEDICAL TECHNICIAN TRAINING

You will be introduced to the world of medicine and learn relevant patient care skills during the first weeks of medical school by participating in an emergency medical technician (EMT) certification course. You'll continue to hone your skills and immerse yourself in our community by working with professional EMTs, and by following patients from pick-up in the field to the emergency department, to the hospital and to discharge and follow-up.

LIFESTYLE MEDICINE

The UofSC School of Medicine Greenville implements lifestyle medicine into its curriculum to promote self-care among the student body as you navigate the complexities of medical school, as well as to create a pipeline for students to share your knowledge with future patients and their communities. A variety of lifestyle medicine-related activities are available in the medical school, including yoga and community gardening. Greenville and the natural amenities of South Carolina's Upstate region offer you an array of opportunities for outdoor activities and healthy living.

PRISMA HEALTH UPSTATE AT A GLANCE

Our partnership with Prisma Health in the Upstate of South Carolina creates unique opportunities for our students to engage with medical professionals in every step of the clinical environment.

- South Carolina's largest health care system
- Delivers more than 7,000 babies annually
- The Upstate region's only 24-hour Children's Emergency Center with Bryan Level III Neonatal Intensive Care Unit
- The only Level I Emergency Trauma Center in Greenville, and one of only three in the state
- More than 350 active clinical trials annually in areas such as oncology, pediatrics, and women's health.

MED SCHOOL LIFE

Our students take advantage of the many social, educational and **community outreach opportunities** to enrich their lives while supporting their academic, professional and personal growth. A wide variety of interest groups will welcome you to explore academic and social opportunities through workshops, lectures, lunch-and-learn sessions, volunteer opportunities and other activities.

A pivotal part of student life, the **Colleges Program** at the medical school promotes camaraderie, community, wellness and mentorship. Students will join one of five Colleges, where you will participate in teambuilding and civic engagement, guided by several faculty mentors and an academic success coach to promote an environment of well-being. Throughout the year, the Colleges compete in various activities, including blood drives, penny wars and volunteering opportunities. Annually, the Colleges participate in a spirit week competition that concludes with the College Cup.

Located on the Prisma Health Greenville Memorial Medical Campus, the 90,000 square-foot UofSC School of Medicine Greenville is recognized as an **Apple Distinguished School** for our innovative use of technology to inspire creativity, collaboration and critical thinking. Our technologically advanced clinical learning environment, state-of-the-art simulation center and anatomy lab are examples of learning spaces that serve to leverage technology and encourage innovation.

For a full list of student organizations at the School of Medicine Greenville, visit the Student Life tab at greenvillemed.sc.edu.

Applicants are selected by an admissions committee composed of members of the biomedical science and clinical faculties and team members at the UofSC School of Medicine Greenville and Prisma Health as well as select community representatives. The committee uses a holistic process to consider all aspects of an applicant with the goal of assembling the next generation of doctors whose talents, resilience, dedication, leadership skills, and compassion can meet the needs of our increasingly diverse communities.

The admissions committee recommends that applicants complete more than the minimum requirements in the area of natural sciences. However, the committee welcomes applicants with preparation in the humanities and liberal arts who have completed the required coursework.

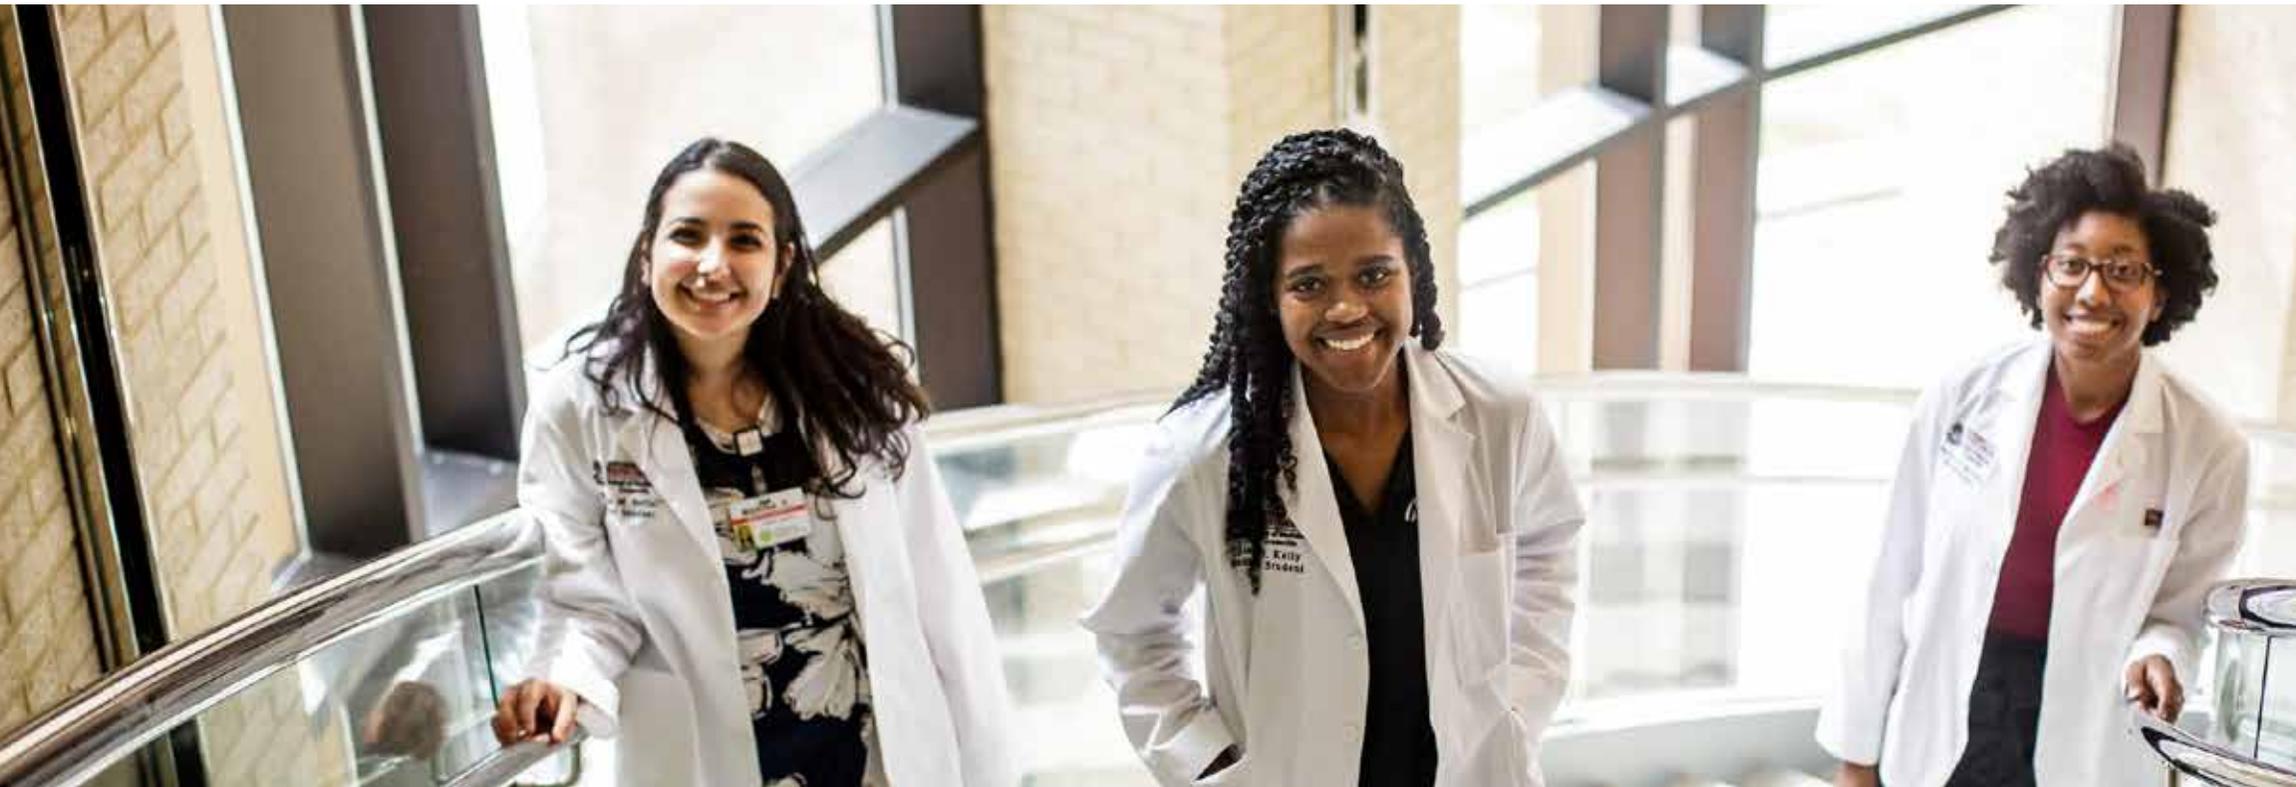

All applicants are required to take the Medical College Admissions Test (MCAT) and submit an application through the American Medical College Application Service (AMCAS). Visit greenvillemed.sc.edu/apply for more information regarding the admissions process.

The University of South Carolina
School of Medicine Greenville is the first
medical school in the country to:

Require all first year medical students to receive EMT certification.

Fully incorporate exercise physiology and nutrition into all four years of undergraduate medical education curriculum.
