

## FALL 2020 CLASS FORMATS

### How are classes being offered this fall?

- The health and safety of faculty, staff and students are the Moore School's top priority. To maintain social distancing and keep students and faculty safe, new instructional formats are being offered this fall, many combining traditional face-to-face instruction with live-streaming enhancement. This means classes are broadcast live to students located outside the classroom where they will participate in class in real-time over the internet.

### Why does my schedule show my classes as web-based or online?

- If you see "online" or "web" on your schedule, this **does not** necessarily mean your class is completely online. While well-structured online classes offer high-quality education, this fall only around 10% of Moore School classes will be fully online without a live teaching component. Instead, the Moore School will be offering as many face-to-face, live-streaming classes as possible.
- As a result, the majority of classes will be held in in real-time, allowing students to benefit from face-to-face or live interactions, participate in class discussions and ask questions while offering the opportunity to learn remotely should the student become ill or be unable or uncomfortable leaving their current location.
- This face-to-face/live-stream model is the format that has been used by our top-ranked Professional MBA program for decades. Academic research shows that this type of instruction provides the same student outcomes and the same degree of student satisfaction as traditional face-to-face classes.

### Will the full class meet in person every week for face-to-face classes?

- Some classes will meet in person every week for face-to-face classes, but some, due to social distancing requirements and class size limitations, will have students attending face-to-face classes on a rotational basis; for example half in the classroom and half remotely via live-stream. Some classes may even be taught remotely in a virtual face-to-face format if, due to health concerns, faculty are unable to be in the classroom physically. In all of these combinations, high-quality education similar to traditional face-to-face classes will be delivered.

### Will live-streamed classes be recorded?

- Yes, all live-streamed classes will be recorded and made available to students. Recording classes allows students to access the course content in the event that they become ill and are unable to attend classes, face-to-face or virtually, or have other valid reasons that prevent them from attending class at the scheduled date and time.

### What other class formats are being offered?

- The university is offering a wide variety of class formats in addition to face-to-face classes including virtual class sessions held in real-time. View the full list of available class formats and schedule codes on the next page.

To help you understand the format in which classes in the fall will be taught, below is a guide for instructional delivery formats. Most Moore School classes have in-classroom, face-to-face meeting days. We will also offer classes with virtual, face-to-face class meetings, while only around 10% (designated DWEB) are “fully online,” meaning you complete coursework on your own time and without regular class meetings. Your schedule is being updated daily as adjustments are made to the fall schedule, so please review it regularly for changes.

FORMAT	CODE	DESCRIPTION	EXAMPLE
Face-to-Face (Traditional)	TRAD	100% F2F. Instructor teaches in Moore School classroom. Full class cohort attends with content simultaneously live-streamed to students who are remote by choice or circumstance.	MKTG 465, meets M, W 9:40–10:55 a.m., room 127
Face-to-Face (Traditional/ Rotational)	B3WEB/BWEB*	100% Rotating F2F. Instructor teaches in Moore School classroom. Class is simultaneously live-streamed. Class cohorts are assigned to attend in-person on specific days of the week on a rotational basis due to social-distancing requirements in classroom; they participate via live-stream on days when they're not in the classroom.	ACCT 501, meets M, W 11:10 a.m.–12:25 p.m., room 141. Students with last names A–K attend F2F on M and watch live-stream remotely on W; L–Z attend F2F on W and watch live-stream remotely on M.
Blended/Hybrid (up to 49% web) or Blended (50% or more web)	B3WEB/BWEB	F2F+Web. Instructor teaches in Moore School classroom each week, either one or two class meetings, depending on schedule. See example. Full (or partial) class cohort attends regularly (or rotationally), with content simultaneously live-streamed to students who are remote by choice or circumstance. Instructor also provides online content and assignments that are to be completed each week.	MGSC 291, meets M, W, F 10:50–11:40 a.m., M, W in room 136; F via Web. (B3WEB). MGSC 485, meets T, TH 11:40 a.m.–12:55 p.m.; T in room 109, TH via Web (BWEB).
100% Web Synchronous	DWEBS	100% F2F Virtual. Instructor teaches via live-stream from remote location at regularly scheduled class meeting times OR instructor shows self-created, pre-recorded content during regularly scheduled class times and is simultaneously available for student questions. In both cases, full class cohort participates virtually at the same time.	MGMT 250, meets online M, W, F 9:40–10:30 a.m.
100% Web Mix Asynchronous & Synchronous	DWEBM	Virtual F2F/Mix. Instructor teaches virtually F2F once per week via live-stream from remote location at a regularly scheduled class time. Full class cohort participates at the same time. Instructor also provides online content and assignments that are to be completed each week.	ECON 221, meets T 10:05–11:20 a.m. Students meet virtually once per week during a regularly scheduled class time and complete coursework online each week on own time.
100% Web Mix Asynchronous & Synchronous	DWEBM	Web Mix. Instructor provides online content and assignments that are to be completed each week and has required, virtual meetings with students at times that are convenient to students.	ECON 221. Students complete coursework online each week on their own time and have required, virtual meetings with instructor at times convenient to students.
100% Web Asynchronous	DWEB	100% Online. Instructional content is online and students complete coursework on their own time, by required due dates. No virtual, face-to-face, or live-streamed instructional content and no required virtual meetings with students.	ACCT 222. Students complete coursework online each week and meet with instructor virtually as needed.
Two-Way AV between System Campuses	DTWS**	F2F Traditional / F2F Traditional Virtual. Instructor teaches in Moore School classroom each week and students choose whether to attend or view class via live-stream at a regional classroom or satellite campus or alternate remote location.	MGMT 778. TH 6:00–9:00 p.m.
