Dr. Allison Munn is an Assistant Professor of Nursing at Francis Marion University (FMU) and a native of the Pee Dee Region of South Carolina. Dr. Munn graduated from Clemson University in 2001 with a Bachelor of Science in Nursing degree, and she returned to the Pee Dee after graduation to work in the field of Pediatrics. During eleven years of bedside nursing, Dr. Munn encountered many disadvantaged children and families who had poor health outcomes associated with limited access to healthcare and prenatal services. These experiences, along with a desire to pursue a career in research and academia prompted Dr. Munn’s entry into the Medical University of South Carolina (MUSC) Ph.D. of Nursing Science program (vulnerable populations focus). Dr. Munn completed the MUSC Ph.D. program in 2016 and began teaching at FMU as full-time nursing faculty in January of 2017. Dr. Munn teaches courses in the undergraduate and graduate nursing programs including undergraduate Pediatrics and Research, graduate Biostatistics, and the Doctor of Nursing Practice Capstone II course. Dr. Munn’s research interests are breastfeeding and Baby-Friendly practices, with an emphasis on the influence of Baby-Friendly practices on breastfeeding outcomes for rural southeastern United States African American mothers.
