

# Cancer Prevention & Control Program

## COLLOQUIUM SERIES

### “Inflammation, the Tumor Microenvironment and Progression of Colorectal Cancer”

**Raymond N. DuBois, MD, PhD**  
Dean, College of Medicine  
Professor, Departments of Biochemistry and Medicine  
Medical University of South Carolina

Raymond DuBois, MD, PhD, is an internationally renowned expert for his studies on the molecular and genetic basis for colorectal cancer. His laboratory examines the molecular mechanisms by which inflammatory mediators affect epithelial biology, the tumor microenvironment, carcinogenesis and development. Dr. DuBois was named Dean of the College of Medicine at the Medical University of South Carolina in March 2016. For three years prior to coming to MUSC, Dr. DuBois was Executive Director of the Biodesign Institute at Arizona State University with a joint clinical appointment at the Mayo Clinic. He served as Provost and Executive Vice President and Professor of Cancer Medicine and Cancer Biology at The University of Texas MD Anderson Cancer Center in Houston from 2007-2012. From 1998 to 2004 he directed Vanderbilt's Division of Gastroenterology, Hepatology and Nutrition, and served as Director of the Vanderbilt-Ingram Cancer Center from 2005-2007. During his career as a physician-scientist, DuBois has published over 140 peer reviewed journal articles, more than 60 article reviews, 25 book chapters, and three books. He is a co-inventor of a method to identify and prevent cellular genes needed for viral growth and cellular genes that function as tumor suppressors in mammals.
