

# Exercise Science

## Arnold School of Public Health

Dr. Ciaran Fairman is currently recruiting graduate students interested in pursuing either a Master of Science or Doctorate of Philosophy in Kinesiology with an emphasis on exercise oncology. Our lab focuses on investigating exercise, nutrition and behavioral strategies in individuals with cancer during and after their treatment. Students in our lab will earn experience in research methods, laboratory techniques and gain clinical experience working with various populations. Upcoming studies include:

- Feasibility and impact of exercise and nutritional supplementation intervention in individuals with sarcopenia following cancer treatment: The ERASE Sarcopenia trial.
- Examining the Feasibility, Uptake and Effectiveness of an Exercise Medicine Program for Individuals with Cancer.
- Examining the impact of a communication/dissemination intervention targeting health behaviors for individuals with cancer.

For more information, feel free to check out our [lab manual](#) which covers our goals, culture and philosophy. Additionally, feel free to reach out to Dr. Fairman at [cfairman@mailbox.sc.edu](mailto:cfairman@mailbox.sc.edu) with any questions.
