Arnold School of Public Health
Department of Health Promotion, Education, and Behavior
University of South Carolina

Undergraduate Minor In
Nutrition and Food Systems

Why this minor is important?

- Nutrition and food systems are inextricably linked to the health of our communities and to planetary health.
- The rapidly changing food systems is altering planetary nutritional intake.
- There is a shortage of trained professionals to guide communities in transforming food systems to promote environmental sustainability, improve nutritional health, and address social justice.

What you will gain from this minor?

- Take courses that focus on production, processing, retail, consumption, and disposal of food.
- Integrate interdisciplinary course work into your academic curriculum.
- The ability to incorporate it into your major including, but not limited to:
  - exercise science
  - psychology
  - sociology
  - anthropology
  - political science
  - global studies
  - nursing
  - women's studies
- Be able to find work in many settings such as:
  - Nonprofit governmental organizations
  - Nonprofit organizations
  - Government agencies
  - Private organizations
  - Philanthropic organizations
  - Universities

Minor goals

- Understand political, social, and economic contests for changes in world food systems.
- Understand connections between soil, water, and air health, the food supply, and human health and chronic disease.
